In Projecting
Citizenship, Gabrielle
Moser gives a
comprehensive
account of an unusual
project produced by
the British

government's Colonial
Office Visual
Instruction Committee
at the beginning of the
twentieth century—a
series of lantern slide
lectures that combined
geography education
and photography to
teach schoolchildren
around the world what
it meant to look and to
feel like an imperial

citizen. Through detailed archival research and close readings, Moser elucidates the impact of this vast collection of photographs documenting the land and peoples of the British Empire, circulated between 1902 and 1945 in classrooms from Canada to Hong Kong, from the West Indies to Australia. Moser argues that these photographs played a central role in the invention and representation of imperial citizenship. She shows how citizenship became a photographable and teachable subject by tracing the intended readings of the images that the committee hoped to impart to viewers and analyzing how spectators may have used their

encounters with these photographs for protest and resistance. Interweaving political and economic history, history of pedagogy, and theories of citizenship with a consideration of the aesthetic and affective dimensions of viewing the lectures, *Projecting Citizenship* offers important insights into the social inequalities and visual language of colonial rule.

Citizenship and Social Class, and Other Essays Penn State Press

In recent times, the notion of citizenship has become increasingly prominent as the traditional boundaries of the nation-state face challenges from globalization, multiculturalism, and economic

restructuring. In this context, Citizenship in a Globalizing World is a welcome addition in the field of political science as it takes a detailed look at the topic of citizenship, from the origins of both citizenship and the state, to various theories of citizenship and what it means in the modern context, when it has to coexist with forces of globalization and the rise of new social groups.

Confessions of a Recovering Environmentalist and Other Essays

Springer Science & Business Media
The twelve studies contained in this volume discuss some key-aspects of citizenship from its emergence in Archaic Greece until the

Roman period before AD 212, when Roman citizenship was extended to all the free inhabitants of the Empire. The book explores the processes of formation and re-formation of citizen bodies, the integration of foreigners, the question of multiple-citizenship holders and the political and philosophical thought on ancient citizenship. The aim is that of offering a multidisciplinary approach to the subject, ranging from literature to history and philosophy, as well as encouraging the reader to integrate the traditional institutional and legalistic approach to citizenship with a broader perspective, which encompasses aspects such as identity formation,

performative aspect and discourse of citizenship.

This volume explains how money is created and used, and how it is a part of the global system of trade and economics.

Citizenship in the World Two Crazy Boys Publishing

In this instant New York Times bestseller, a young and successful entrepreneur makes the case that politics has no place in business, and sets out a new vision for the future of American capitalism. There's a new invisible force at work in our economic and cultural lives. It affects every advertisement we see and every product we buy, from our morning

coffee to a new pair of shoes. "Stakeholder capitalism" makes rosy promises of a better, more diverse, environmentally friendly world, but in reality this ideology championed by America's business and political leaders robs us of our money, our voice, and our identity. Vivek Ramaswamy is a traitor to his class. He's founded multibillion-dollar enterprises, led a biotech company as CEO, he became a hedge fund partner in his 20s, trained as a scientist at Harvard and a lawyer at Yale, and grew up the child of immigrants in a small town in Ohio. Now he takes us behind the scenes into corporate boardrooms and five-star conferences, into Ivy League classrooms and

secretive nonprofits, to reveal the defining scam of our century. The modern woke-industrial complex divides us as a people. By mixing morality with consumerism, America's elites prey on our innermost insecurities about who we really are. They sell us cheap social causes and skin-deep identities to satisfy our hunger for a cause and our search for meaning, at a moment when we as Americans lack both. This book not only rips back the curtain on the new corporatist agenda, it offers a better way forward. America's elites may want to sort us into demographic boxes, but we don't have to stay there. Woke, Inc. begins as a critique of stakeholder capitalism and ends

with an exploration of what it means to be an American in 2021--a journey that begins with cynicism and ends with hope.

Earned Citizenship

Gareth Stevens
 Citizenship in the World is an Eagle-required merit badge. It is also good knowledge every-one should have about how governments work and what the major international political organizations, such as the UN, are. This short book is written to help merit badge counselors teach the BSA's "Citizenship in the World" merit badge. Because of that, it includes much of the basic text of the merit badge requirements. Not every section of the merit badge is discussed because youth don't have to do

every single item. Some are options (e.g., complete two of three items). Scouts will still need to do some research and activities on their own.

Amusing Ourselves to Death BRILL

A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their

own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save

us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live. Citizens in the Graeco-Roman World Farrar, Straus and Giroux

The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today. The majority of unauthorized immigrants in the U.S. have been here for more than five years, and are settling into American communities, working, forming

families, and serving in the military, even though they may be detained and deported if they are discovered. An open question remains as to what to do about unauthorized immigrants who are already living in the United States. On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated. On the other sits a deeper ethical dilemma that is the focus of this book: what do the state and citizens owe to unauthorized immigrants who have served their adopted country? Earned Citizenship argues that long-term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship

through service in their adopted communities. Their service would act as restitution for immigration law violations. Military service in particular would merit naturalization in countries with a strong citizen-soldier tradition, including the United States. The book also considers the civic value of caregiving as a service to citizens and the country, contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents. This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care, and its emphasis on

dependency work. As a whole, *Earned Citizenship* provides a non-humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation. *Merit* Oxford University Press

In 1948, former Broadway actor and WWII B-17 bomber pilot Garry Davis renounced his U.S. nationality as a personal action for world peace and declared himself a World Citizen. Since then the movement he set in motion has spread around the world. World Citizenship has become central to myriad activities promoting global peace through world law. Passport to

Freedom shows how World Citizenship can be a powerful moral and political tool that reveals the living reality of One World. But it is more. It is a sourcebook of theory and practice that can empower the individual citizen allied with humanity. Through numerous examples, Davis proves that world citizenship is not merely a noble theory. It works. Thousands of people have used the tools described in this book to enter and leave more and more countries and successfully challenge national authorities around the world. As an inspiring story and practical guide, this ground-breaking book will provide readers with their own "PASSPORT TO FREEDOM."

Intelligence, Genes, and Success Penguin
What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN
Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our

politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable

one.” –Jonathan Yardley, The Washington Post Book World
CITIZENSHIP IN THE NATION. Routledge
A scientific response to the best-selling *The Bell Curve* which set off a hailstorm of controversy upon its publication in 1994. Much of the public reaction to the book was polemic and failed to analyse the details of the science and validity of the statistical arguments underlying the book's conclusion. Here, at last, social scientists and statisticians reply to *The Bell Curve* and its conclusions about IQ, genetics and social outcomes.

Black & white print.
American Government

3e aligns with the topics and objectives of many government courses. Faculty involved in the project have endeavored to make government workings, issues, debates, and impacts meaningful and memorable to students while maintaining the conceptual coverage and rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon

what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. In order to help students understand the ways that government, society, and individuals interconnect, the revision includes more examples and details regarding the lived experiences of diverse groups and communities within the United States. The authors and reviewers sought to strike a balance between confronting the

negative and harmful elements of American government, history, and current events, while demonstrating progress in overcoming them. In doing so, the approach seeks to provide instructors with ample opportunities to open discussions, extend and update concepts, and drive deeper engagement.

Citizenship in a Globalizing World

Cornell University Press
The idea that citizens'

advancement should depend exclusively on merit, on qualities that deserve reward rather than on bloodlines or wire-pulling, was among the Founding ideals of the American republic, Joseph F. Kett argues in this provocative and engaging book. Merit's history, he contends, is best understood within the context of its often conflicting interaction with the other ideals of the Founding, equal rights and government by consent. Merit implies difference; equality suggests sameness. By sanctioning selection of those lower down by those higher up, merit potentially conflicts with the republican ideal that citizens consent to the decisions that affect their lives. In Merit,

which traces the history of its subject over three centuries, Kett asserts that Americans have reconciled merit with other principles of the Founding in ways that have shaped their distinctive approach to the grading of public schools, report cards, the forging of workplace hierarchies, employee rating forms, merit systems in government, the selection of officers for the armed forces, and standardized testing for intelligence, character, and vocational interests. Today, the concept of merit is most commonly associated with measures by which it is quantified. Viewing their merit as an element of their selfhood-essential merit-members of the

Founding generation showed no interest in quantitative measurements. Rather, they equated merit with an inner quality that accounted for their achievements and that was best measured by their reputations among their peers. In a republic based on equal rights and consent of the people, however, it became important to establish that merit-based rewards were within the grasp of ordinary Americans. In response, Americans embraced institutional merit in the form of procedures focused on drawing small distinctions among average people. They also developed a penchant for increasing the number of winners in competitions-what

Kett calls "selection in" rather than "selection out"-in order to satisfy popular aspirations. Kett argues that values rooted in the Founding of the republic continue to influence Americans' approach to controversies, including those surrounding affirmative action, which involve the ideal of merit.

Global Citizenship

A Times Literary Supplement's Book of the Year 2020 A New Statesman's Best Book of 2020 A Bloomberg's

Best Book of 2020 A Guardian Best Book About Ideas of 2020 The world-renowned philosopher and author of the bestselling Justice explores the central question of our time: What has become of the common good? These are dangerous times for democracy. We live in an age of winners and losers, where the odds are stacked in favor of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the American credo that "you can make it if you try". The consequence is a brew of anger and frustration that has fueled populist protest and extreme polarization, and led to deep distrust of both government and our fellow citizens--leaving

us morally unprepared to face the profound challenges of our time. World-renowned philosopher Michael J. Sandel argues that to overcome the crises that are upending our world, we must rethink the attitudes toward success and failure that have accompanied globalization and rising inequality. Sandel shows the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind, and traces the dire consequences across a wide swath of American life. He offers an alternative way of thinking about success—more attentive to the role of luck in human affairs, more conducive

to an ethic of humility and solidarity, and more affirming of the dignity of work. The Tyranny of Merit points us toward a hopeful vision of a new politics of the common good. Citizenship in the World

First Published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.
