An Integrated Approach to Process, Tools, Cases, and Solutions Rowman & Littlefield Publishers

Two strengths distinguish this textbook from others. One is its presentation of subjects in the contexts where they occur. Students see different perspectives on subjects and learn how complex and dynamic the mergers and acquisitions environment is. The other is its use of current events. Of its 72 case studies, 3/4 are new or have been updated. The implications of Dodd-Frank and US

Supreme Court rulings affecting the Sarbanes-Oxley Act, among other regulatory changes, are developed to enhance teaching and learning experiences. Other improvements to the 6th edition have shortened and simplified chapters, increased the numbers and types of pedagogical supplements, and expanded the international appeal of examples. With a renewed focus on empirical and quantitative examples, the 6th edition continues to demonstrate how people work together on mergers and acquisitions and why the actions of specific individuals have far-reaching implications. Presents an integrated approach to the activities involved in mergers, acquisitions, business alliances, and corporate restructurings. All chapters have been revised, updated, and contain new content, and 14 include more extensive changes. Structural revisions make chapters more streamlined, shorter, and less complex. Case studies cover a dozen industries, and 75% are new or have been updated. All include discussion questions and answers.

Filmmakers and Financing Cambridge University Press

EU investment in China has increased dramatically since the early 1990s and is poised to increase further in light of China's recent accession to the World Trade Organisation. This book explores and critically appraises the existing legal framework governing EU-China investment relations, particularly EU investment in China. The current legal framework is composed of Chinese law, EU law and applicable international law, but the Chinese law is unsystematic and hard to discover and the EU has acquired only shared external investment competence which is vaguely defined. The applicable international treaties are incomplete, incoherent, or either too general or too specialised. Besides this, the international fora to settle investment disputes are still not readily available. Furthermore while law has played a very important role in decision-making by EU investors, the Chinese legal system is generally perceived as ineffective and lacking in effective enforcement of court and arbitration decisions. What the book demonstrates is that the time is ripe for a new international legal framework for foreign investment in China, and that as EU-China economic and political relations continue to improve, construction of such a framework is not only necessary, but also possible.

Business Ethics Psychology Press
