LORELAI SANTOS

21 Lessons for the 21st Century Springer
Focusing on events in Rwanda, Armenia, and the former Yugoslavia as well as the Holocaust, Genocide and Gender in the Twentieth Century investigates how historically- and culturally-specific ideas led to genocidal sexual violence. Expert contributors also consider how these ideas, in conjunction with issues relating to femininity, masculinity and understandings of gendered identities,

contributed to perpetrators' tools and strategies for ethnic cleansing and genocide. The 2nd edition features: * Five brand new chapters which explore: imperialism, race, gender and genocide; the Cambodian genocide; memory and intergenerational transmission of Holocaust trauma; and genocide, gender and memory in the Armenian case. * An extended and enhanced introduction which makes use of recent scholarship on gender and violence. * Historiographical and bibliographical updates throughout. * Key

primary document - excerpt from the 1948 UN Convention on the Prevention and Punishment of Genocide. Updated and revised in its second edition, *Genocide and Gender in the Twentieth Century* is the authoritative study on the complex gender dimensions of ethnic cleansing and genocide in the 20th century. [Vol 2: The Performance and Persistence of Autocracies](#) Springer
Práce poskytuje srovnání teoretických přístupů k problematice stylu, a to v rámci českého a anglosaského (především britského) kontextu. Cílem bylo ukázat a srovnat odlišná metodologická pojetí založená na odlišných teoretických východiscích – proto byly zvoleny dva

odlišné kulturní okruhy: pozornost je však samozřejmě věnována také vztahů mezi nimi. Dvacáté století bylo vybráno úmyslně, jako období, v němž se v obou prostředích stylistika konstituovala jako moderní teoretická disciplína opírající se o základnu lingvistiky a literární vědy. Práci mohou využít jak domácí, tak zahraniční studenti a vyučující, především bohemisté a anglisté.
Comparing autocracies in the early Twenty-first Century Routledge
What happens when the rich are allowed to hide their money in tax havens, and what we should do about it The Panama Papers were a reminder of how the superrich are allowed to hide their wealth from the rest of us.

Dirty Secrets uncovers the extent of the corruption behind this crisis and shows what needs to be done in the face of this unregulated spread of rampant greed. Tax havens, we are often told, are part of the global architecture of capitalism, providing a freedom from regulation necessary to make markets work. In this book, leading authority Richard Murphy uncovers the truth behind this lie. The fact of the matter is that this increasingly popular practice threatens the foundations of democracy, sowing mistrust and creating a regime based upon opacity. As Murphy shows, how we manage our economy is a political decision, and one that can be

changed. Dirty Secrets proposes ways to regulate tax havens and what the world might look like without them.

Crossing the Quality Chasm Del Rey

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was

talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process

of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

PISA 21st-Century Readers Developing Literacy Skills in a Digital World CRC Press

This book focuses on the key issues that affect military families when soldiers are deployed overseas, focusing on the support given to military personnel and families before, during and after missions.

Today's postmodern armies are expected to provide social-psychological support both to their personnel in military operations abroad and to their families at home. Since the end of the Cold War and even more so after 9/11, separations between military personnel and their families have become more frequent as there has been a multitude of missions carried out by multinational task forces all over the world. The book focuses on three central questions affecting military families. First, how do changing missions and tasks of the military affect soldiers and families? Second, what is the effect of deployments on the ones left behind? Third, what is the national

structure of family support systems and its evolution? The book employs a multidisciplinary approach, with contributions from psychology, sociology, history, anthropology and others. In addition, it covers all the services, Army, Navy/Marines, Air Force, spanning a wide range of countries, including UK, USA, Belgium, Turkey, Australia and Japan. At the same time it takes a multitude of perspectives such as the theoretical, empirical, reflective, life events (narrative) approach, national and the global, and uses approaches from different disciplines and perspectives, combining them to produce a volume that enhances our

knowledge and understanding of military families. This book will be of much interest to students of military studies, sociology, war and conflict studies and IR/political science in general.

Rethinking Teacher Education for the 21st Century ANU Press

From two leading child and adolescent mental health experts comes a guide for the parents of every college and college-bound student who want to know what's normal mental health and behavior, what's not, and how to intervene before it's too late. "The title says it all...Chock full of practical tools, resources and the wisdom that comes with years of experience, The Stressed Years of their

Lives is destined to become a well-thumbed handbook to help families cope with this modern age of anxiety." — Brigid Schulte, Pulitzer Prize-winning journalist, author of *Overwhelmed* and director of the Better Life Lab at New America All parenting is in preparation for letting go. However, the paradox of parenting is that the more we learn about late adolescent development and risk, the more frightened we become for our children, and the more we want to stay involved in their lives. This becomes particularly necessary, and also particularly challenging, in mid- to late adolescence, the years just before and after students head off to college. These years

coincide with the emergence of many mood disorders and other mental health issues. When family psychologist Dr. B. Janet Hibbs's own son came home from college mired in a dangerous depressive spiral, she turned to Dr. Anthony Rostain. Dr. Rostain has a secret superpower: he understands the arcane rules governing privacy and parental involvement in students' mental health care on college campuses, the same rules that sometimes hold parents back from getting good care for their kids. Now, these two doctors have combined their expertise to corral the crucial emotional skills and lessons that every parent and student can learn for a successful

launch from home to college.

Defence Industries in the 21st Century Verso Books

The global 'financial' crisis at the turn of the decade has accelerated changes in the relative standing of major regions. As both the US and Eurozone economies have confronted a series of setbacks and struggles to find their second breath, so Asia, Latin America and even Africa have picked up the slack and have been able to maintain high levels of growth. The resilience of the Global South questions whether we are witnessing an evolution towards a regional rebalancing or even global restructuring. This responding volume has four interrelated topics. It

explores the transformation taking place in/with regard to the financing of development in the Global South and the apparition of new players in the field. The emergence of 'New Regionalisms' in the South and the usefulness of these experiences for comparative studies of regional relationship is explicated. It turns its attention to new forms of transnational governance that are emerging and the role that a novelty of actors play in this 'new multilateralism'. Finally, it looks into the implications of this trio of novel directions and players for analyses and policies.

21st Century Learning for 21st Century Skills

Random House

The global system of

alliances that the United States built after the Second World War underpinned the stability and prosperity of the postwar order. But during the 20th century, the multilateral NATO alliance system in Europe and the bilateral San Francisco alliance system in Asia rarely interacted. This changed in the early 21st century, as US allies came together to fight and stabilise conflicts in the Middle East and Central Asia. This volume presents the first-ever comparative study of US alliances in Europe and Asia from the perspectives of US allies: the challenges, opportunities and shifting dynamics of these fundamental pillars of order. This volume is essential

reading for those interested in contemporary and future regional and global security dynamics.

Private Law in Louisiana and Scotland
Edinburgh University Press

Returning to a theme featured in some of the earlier volumes in the Edinburgh Studies in Law series, this volume offers an in-depth study of 'mixed jurisdictions' - legal systems which combine elements of the Anglo-American Common Law and the European Civil Law traditions. This new collection of essays compares key areas of private law in Scotland and Louisiana. In thirteen chapters, written by distinguished scholars on both sides of the

Atlantic, it explores not only legal rules but also the reasons for the rules, discussing legal history, social and cultural factors, and the law in practice, in order to account for patterns of similarity and difference.

Contributions are drawn from the Law Schools of Tulane University, Louisiana State University, Loyola University New Orleans, the American University Washington DC, and the Universities of Aberdeen, Strathclyde and Edinburgh.

The Knowledge Gap

SAGE Publications
This book constitutes the refereed proceedings of the 7th European Conference on Technology Enhanced Learning, EC-TEL 2012, held in Saarbrücken,

Germany, in September 2012. The 26 revised full papers presented were carefully reviewed and selected from 130 submissions. The book also includes 12 short papers, 16 demonstration papers, 11 poster papers, and 1 invited paper. Specifically, the programme and organizing structure was formed through the themes: mobile learning and context; serious and educational games; collaborative learning; organisational and workplace learning; learning analytics and retrieval; personalised and adaptive learning; learning environments; academic learning and context; and, learning facilitation by semantic means.

21st Century Skills

 Book of Extremes Why the 21st Century Isn't Like the 20th Century Springer
Helping Your Kid Survive and Thrive During Their College Years Routledge
 Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project
 Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of

the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems,

Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

Comparing US Alliances in the 21st Century John Wiley & Sons

The conservation and management of cultural landscapes, interpreted as the result of the interrelationships among economic, social and environmental factors through time and space, emerges as essential components in the definition and application of a modern approach to sustainable development. Cultural landscapes are the

result of management practices and knowledge accumulated in human history and contribute not only to the cultural heritage of the world, but also to biodiversity and aesthetic beauty, providing also multiple goods and services for the development of rural areas. However, landscapes are severely endangered not only by some effects of the socioeconomic development, but also by inappropriate policies in agriculture, forestry and nature conservation. This interdisciplinary book presents a range of different methods developed to analyse, restore and manage cultural landscapes, reporting a number of case studies from Europe and north

America, but raising some questions about the need for a revision of some past orientations.

Review of the Draft Climate Science Special Report

Masarykova univerzita

This book focuses on current trends, potential challenges and further developments of teacher education and professional development from a theoretical, empirical and practical point of view. It intends to provide valuable and fresh insights from research studies and examples of best practices from Europe and all over the world. The authors deal with the strengths and limitations of different models, strategies, approaches and policies related to

teacher education and professional development in and for changing times (digitization, multiculturalism, pressure to perform).

21st Century Skills

BoD - Books on Demand
Essay from the year 2007 in the subject English Language and Literature Studies - Culture and Applied Geography, grade: 2,0, Ruhr-University of Bochum, language: English, abstract: "Passing" and "passing" stories have been a great topic in literature and in the movie scene since the beginning of the 20th century. That does not mean that "passing" has not been a topic in life before, but the literary interest in it began much later. There are stories and

movies about race "passing", class "passing" and gender "passing", but class passing does not seem to be too interesting, as there are millions of people pretending to be richer or better than they actually are; it is almost a normal thing in society today. It does not make you suffer hard when you're not as rich or famous as you would like to be, although it makes you suffer in other ways when you are really poor. But this is not the main topic of class "passing" anyway, the suffering of the poor. Race and gender "passing" are much more interesting, but not because the people suffer in those stories, but because it takes a great and strong character to race- or gender-"pass".

Race and gender “passing” are much harder to perform than class “passing”.

Insights from the Global South John Wiley & Sons

The papers in this volume analyze the deployment of Big Data to solve both existing and novel challenges in economic measurement. The existing infrastructure for the production of key economic statistics relies heavily on data collected through sample surveys and periodic censuses, together with administrative records generated in connection with tax administration. The increasing difficulty of obtaining survey and census responses threatens the viability of existing data collection approaches.

The growing availability of new sources of Big Data—such as scanner data on purchases, credit card transaction records, payroll information, and prices of various goods scraped from the websites of online sellers—has changed the data landscape. These new sources of data hold the promise of allowing the statistical agencies to produce more accurate, more disaggregated, and more timely economic data to meet the needs of policymakers and other data users. This volume documents progress made toward that goal and the challenges to be overcome to realize the full potential of Big Data in the production of economic statistics.

It describes the deployment of Big Data to solve both existing and novel challenges in economic measurement, and it will be of interest to statistical agency staff, academic researchers, and serious users of economic statistics.

7th European Conference on Technology Enhanced Learning, EC-TEL 2012, Saarbrücken, Germany, September 18-21, 2012, Proceedings

Verlag Barbara Budrich
#1 NEW YORK TIMES BESTSELLER • In *Sapiens*, he explored our past. In *Homo Deus*, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues.

“Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century.”—Bill Gates, *The New York Times* Book Review NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari's *21 Lessons for the 21st Century* is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As

technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than ever, Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data

is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari's unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, *21 Lessons for the 21st Century* is essential reading. "If

there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's 21 Lessons for the 21st Century would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: 'What is happening in the world today, and what is the deep meaning of these events?'"—BookPage (top pick)

21st Century Technologies Promises and Perils of a Dynamic Future OECD Publishing Provides a comprehensive survey of the key events and personalities of this period.

Global Allies Harvard University Press Defence Industries in the 21st Century explores the transformation in the global defence industrial production through examining the interaction between international and domestic factors. With the global defence industry and arms market likely continue to expand and mature, the ways in which this progression could influence international politics remain obscure. In practice, as the contents of this book show, the defence industrial bases and arms export policies of emerging states display significant variance. This variance is the result of a unique balance between domestic and

international factors that has shaped the defence industrialisation behaviour and policies of the less industrialised states. One of the most important conclusions of the book is that the interplay between domestic and international factors clearly influences the variation in the emerging states' defence industrialisation policies, as well as their success or failure. While international factors create opportunities, they also limit the options available to emerging economies. Domestic factors also play an important role by shaping the policy choices of the states' decision makers. Exploring the balance

between international and domestic factors and the ways in which they influence defence industrialisation in emerging states, Defence Industries in the 21st Century will be of great interest to scholars of Defence Industries, Arms Manufacturing, and Defence, Strategic and Security Studies more generally. The chapters were originally published in Defence Studies, Comparative Strategy and All Azimuth.

Paradigm Shifts in 21st Century Teaching and Learning Routledge

This anthology introduces the Framework for 21st Century Learning from the Partnership for 21st Century Skills as a way to re-envision learning and prepare students for a rapidly

evolving global and technological world. Highly respected education leaders and innovators focus on why these skills are

necessary, which are most important, and how to best help schools include them in curriculum and instruction.
