AJM. Springer

This book constitutes the proceedings of the First International Conference on Emerging Trends in Engineering (ICETE), held at University College of Engineering and organised by the Alumni Association, University College of Engineering, Osmania University, in Hyderabad, India on 22–23 March 2019. The proceedings of the ICETE are published in three volumes, covering seven areas: Biomedical, Civil, Computer Science, Electrical & Electronics, Electronics & Communication, Mechanical, and Mining Engineering. The 215 peer-reviewed papers from around the globe present the latest state-of-the-art research, and are useful to postgraduate students, researchers, academics and industry engineers working in the respective fields. This volume presents state-of-the-art, technical contributions in the areas of civil, mechanical and mining engineering, discussing sustainable developments in fields such as water resource engineering, structural engineering, geotechnical and transportation engineering, mining engineering, production and industrial engineering, thermal engineering, design engineering, and production engineering.

Middle East Economic Digest SME

With special reference to India.

Lessons from the Bingham Canyon Manefay Slide Routledge International in perspective, this volume provides insights into the important problem of how to transfer Japanese practice to Western countries. It also examines key aspects of Japanese multinationals and discusses how they are developing their global strategies and how they are managing their local workforces. Topics covered include relations with suppliers, governments and competitors, leadership patterns and business philosophy. The impact of Japanese multinationals on the local economies of host countries is a particular focus. The dynamics of strategic alliances, technology transfers and research and development centres are also discussed.

Decisions - Federal Mine Safety and Health Review Commission Routledge

Procedural law is of vital importance in Europe. Nowadays, people and companies that intend to settle in Europe still are being confronted with a huge amount of different national procedures and a hallucinating number of regulations in the procedural field. Just consider the different procedural costs, strict time limits, prescription periods, notices of appeal, etc. Unlike other branches of law, historical or cultural impediments to the harmonisation of European procedural laws play a far more inferior role than technical aspects. Eventually, all comes down to the question: How can one lead a case to a result on a fast way and without high costs? In this publication, Europe's leading proceduralists share their views on the approximation of procedural laws. A specific in-depth analysis is made concerning enforcement, summary proceedings, fast-track proceedings and complex litigation. In 4 languages: English, Dutch, French and German.

Global Business Strategy

This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

The Sir Maurice Mawby Memorial Volume

The story of a crisis of epic proportion and the lessons of leadership, innovation, motivation, and teamwork that effectively saved lives and the mine. Rise to the Occasion tells the dramatic story of the men and women who safely led Utah's 107-year-old Bingham Canyon Mine through the largest mining highwall failure in history. The Manefay failure resulted in 144.4 million tons of rock plummeting more than 2,000 feet and traveling 1.5 miles within 90 seconds—without a single death or injury. The story is told through the eyes of an insider, as the author was brought into the mine just six short weeks before the failure and was a key member of the management team. It's a Story Only He Can Tell. Illustrated with 160 full-color aerial and ground photos, charts, and illustrations, Rise to the Occasion details the unfolding events of the preparation, failure, and recovery efforts in moment-by-moment accounts. The author then leads the reader to valuable lessons that were learned and how to apply these lessons to any organization that faces risks. The reader will learn to manage a crisis or normal operations by:

- Understanding, measuring, and acting on the greatest risks facing the organization.
- Creating a culture, based on communication, that inspires dedication, trust, and success.
- Wearing a "Black Hat" to challenge thinking that can blind an organization.
- Setting "impossible" goals that will not only be met but exceeded.
- Breaking down silos to improve teamwork and solve problems.
- Reducing bureaucracy and empowering people to increase innovation and expedite solutions.
- Using independent experts to provide different points of view and audit the processes.
