The Rebirth of Area Studies W. W. Norton & Company

Area Studies became increasingly common after World War II as a means of responding to perceived 'external threats' from the Soviet Union and China. After the Cold War and in the face of increasingly rapid globalisation, it seemed inevitable that Area Studies – institutionally and intellectually – would slowly degenerate. But this has not been the case, and there has recently been a resurgence of interest in it as an effective and positive research paradigm. Responding to this renewed interest, this book brings together an esteemed group of contributors at the cutting edge of the field to consider the state of Area Studies today and its prospects for the future. The Rebirth of Area Studies demonstrates that numerous aspects of the research paradigm in fact recommend it as well-suited for the present moment and the challenges posed by globalisation, both as a means to overcome disciplinary limitations and to increase self-reflexivity. Area Studies research is grounded in place-specific knowledge, yet by definition it transcends nation as the basic unit of analysis and thus empowers comparative and trans-national approaches. This book outlines a new, critical Area Studies for the 21st century – self-reflexive, aware of its limitations and conscious of its origins in geopolitical, strategic or ideological considerations – and is essential reading for historians, geographers and political scientists.

Ataturk: Lessons in Leadership From the Greatest General of the Ottoman Empire

Bloomsbury Publishing USA

Mustafa Kemal Atatürk was a Muslim visionary, revolutionary statesman, and founder of the Republic of Turkey. The West knows him best as the leading Ottoman officer in World War I's Battle of Gallipoli—a defeat for the Allies, and the Ottoman empire's greatest victory. Gaining fame as an exemplary military officer, he went on to lead his people in the Turkish War of Independence, abolishing the Ottoman Sultanate, emancipating women, and adopting western dress. Deeply influenced by the Enlightenment, Atatürk sought to transform the empire into a modern and secular nation-state, and during his presidency, embarked upon a program of impressive political, economic, and cultural reforms. Militarily and politically he excelled at all levels of conflict, from the tactical, through the operational, to the strategic, and into the rarified realm of grand strategy. His ability to integrate the immediate with the ultimate serves as an important lesson for leaders engaged in the twenty-first century's great military struggles. He became the only leader in history to successfully turn a Muslim nation into a Western parliamentary democracy and secular state, leaving behind a legacy of modernization and military and political leadership.

Sports fans have long been fascinated with boxing and the brutal demonstration of physical and psychological conflict. Accounts of the sport appear as far back as the third millennium BC, and Greek and Roman sculptors depicted the athletic ideals of the ancient era in the form of boxers. In the present day, boxers such as Muhammad Ali, Joe Frazier, Sugar Ray Robinson, Oscar De La Hoya, Manny Pacquiao, and Floyd Mayweather, Jr. are recognized throughout the world. Boxing films continue to resonate with audiences, from the many Rocky movies to Raging Bull, The Fighter, Million Dollar Baby, and Ali. In *Boxing: A Concise History of the Sweet Science*, Gerald R. Gems provides a succinct yet wide ranging treatment of the sport, covering boxing's ancient roots and its evolution, modernization, and global diffusion. The book not only includes a historical account of boxing, but also explores such issues as social class, race, ethnic rivalries, religious influences, gender issues, and the growth of female boxing. The current debates over the moral and ethical issues relative to the sport are also discussed. While the primary coverage of the political, social, and cultural impacts of boxing focuses on the United States, Gems' examination encompasses the

sport on a global level, as well. Covering important issues and events in the history of boxing and featuring numerous photographs, *Boxing: A Concise History of the Sweet Science* will be of interest to boxing fans, historians, scholars, and those wanting to learn more about the sport.

A "superlative [and] exhaustively researched" biography of "one of the most complex and controversial figures in twentieth-century world history" (Library Journal). Mustafa Kemal Atatürk was virtually unknown until 1919, when he took the lead in thwarting the victorious Allies' plan to partition the Turkish core of the Ottoman Empire. He divided the Allies, defeated the last Sultan, and secured the territory of the Turkish national state, becoming the first president of the new republic in 1923, fast creating his own legend. This revealing portrait of Atatürk throws light on matters of great importance today—resurgent nationalism, religious fundamentalism, and the reality of democracy. "One of the world's most respected specialists on Turkey." —The New York Times "Mango gives this man, one of the least-known nation-builders of the last century, full treatment, from his earliest days to his ascension to power and his death, from cirrhosis at the age of 57. Few leaders have so modernized an ancient society, instituting radical changes in dress, religion, government, education—even the alphabet . . . Mango's admiration for Ataturk doesn't keep him from displaying the dictator's arrogance, ruthlessness and authoritarianism; his Turkish expertise enables him to flesh out Ataturk's complex life via sources he translated himself . . . a rounded, finely detailed portrait." —Publishers Weekly "Thanks to Andrew Mango's new biography, the best in the English language, a man both demonized and idolized appears to us in three dimensions." —The Washington Post "A superb biography." —Dallas Morning News "The best concise account I have ever seen of the decline of the Ottoman Empire. The narrative is gripping." —Geoffrey Lewis, author of *Modern Turkey*

Starting with the basic question "what is this place?", award-winning journalist and novelist Ece Temelkuran guides us through her "beloved country". In challenging the authoritarian AKP government – for which she lost her job as a journalist – Temelkuran draws strength and wisdom from people, places and artistic expression. The result is a beautifully rendered account of the struggles, hopes and tragedies which make Turkey what it is today. Lamenting the commercialisation and authoritarianism which increasingly characterises Turkish society, Temelkuran sees hope in the Gezi Park protests of 2013, the electoral breakthrough of the progressive HDP party in 2015 and in the simple kindness of ordinary people. Much more than either straightforward history or memoir, *Turkey: the Insane the Melancholy* is like sitting with a friendly stranger who, over raki or coffee, reveals the secrets of this rich and complex country – the historic "bridge" between east and west.

This book examines the Kemalist ideology of Turkey from two perspectives. It discusses major problems in the existing interpretations of the topic and how the incorporation of Soviet perspectives enriches the historiography and our understanding of that ideology. To address these questions, the book looks into the origins, evolution, and transformational phases of Kemalism

between the 1920s and 1970s. The research also focuses on perspectives from abroad by observing how republican Turkey and particularly its founding ideology were viewed and interpreted by Soviet observers. Paying more attention to the diplomatic, geopolitical, and economic complexities of Turkish-Soviet relations, scholars have rarely problematized those perceptions of Turkish ideological transformations. Looking at various phases of Soviet attitudes towards Kemalism and its manifestations through the lenses of Communist leaders, party functionaries, diplomats and scholars, the book illuminates the underlying dynamics of Soviet interpretations.

Only two years after the Second Vatican Council concluded in 1965, Catholics around the world welcomed the publication of *The Rhine Flows Into the Tiber*, a history of the Council published worldwide in four languages. Widely hailed for its balanced, factual reporting, this eye-opening insider's account was written by Rev. Ralph M. Wiltgen, a priest and professional journalist who was an eyewitness with unparalleled access to the principal figures and events of the Council. The *Inside Story of Vatican II* is a revised, updated edition of that ground-breaking contemporary account, which details in particular the crucial influence on the Council's proceedings exerted by its German-speaking bishops. As Catholics continue to debate the meaning and impact of Vatican II, they will find this book an indispensable guide for understanding what actually took place there behind the scenes.

Islam and the Trajectory of Globalization Harvard University Press

A biography of the founder of modern Turkey that chronicles the ideas that shaped him When Mustafa Kemal Atatürk became the first president of Turkey in 1923, he set about transforming his country into a secular republic where nationalism sanctified by science—and by the personality cult Atatürk created around himself—would reign supreme as the new religion. This book provides the first in-depth look at the intellectual life of the Turkish Republic's founder. In doing so, it frames him within the historical context of the turbulent age in which he lived, and explores the uneasy transition from the late Ottoman imperial order to the modern Turkish state through his life and ideas. Shedding light on one of the most complex and enigmatic statesmen of the modern era, M. Sükrü Hanioğlu takes readers from Atatürk's youth as a Muslim boy in the volatile ethnic cauldron of Macedonia, to his education in nonreligious and military schools, to his embrace of Turkish nationalism and the modernizing Young Turks movement. Who was this figure who sought glory as an ambitious young officer in World War I, defied the victorious Allies intent on partitioning the Turkish heartland, and defeated the last sultan? Hanioğlu charts Atatürk's intellectual and ideological development at every stage of his life, demonstrating how he was profoundly influenced by the new ideas that were circulating in the sprawling Ottoman realm. He shows how Atatürk drew on a unique mix of scientism, materialism, social Darwinism, positivism, and other theories to fashion a grand utopian framework on which to build his new nation. Now with a new preface, this book provides the first in-depth look at the intellectual life of the Turkish Republic's founder.

A Military History of the Ottomans Macmillan

The definitive biography of the father of modern Turkey, a powerful figure in the still-unfolding drama of the Middle East. With the collapse of the Ottoman Empire after the First World War came the emergence of new nations, chief among them Turkey itself. It was the creation of one man, the soldier-statesman Mustafa Kemal, who dragged his country from the Middle Ages to the twentieth century, and in defeating Western imperialists inspired 'the cause of the East'. Lord Kinross writes of the intrigues of empires, the brutalities of civil war, personal courage - showing us Atatürk, the incarnation of glory - as well as of Kemal's youthful ambition, and his problems with his wife.

A Sense of the Enemy Penguin

This revised edition builds upon and updates its twin themes of Turkey's continuing incorporation into the capitalist world and the modernization of state and society. It begins with the forging of closer links with Europe after the French Revolution, and the changing face of the Ottoman Empire in the 19th century. Zürcher argues that Turkey's history between 1908 and 1950 should be seen as a unity, and offers a strongly revisionist interpretation of Turkey's founding father, Kemal Atatürk. In his account of the period since 1950, Zürcher focuses on the growth of mass politics; the three military coups; the thorny issue of Turkey's human rights record; the alliance with the West and relations with the European Community; Turkey's ambivalent relations with the Middle East; the increasingly explosive Kurdish question; and the continuing political instability and growth of Islam.

This text is Jones's account of his part in British Scientific Intelligence between 1939 and 1949. It was his responsibility to anticipate German applications of science to warfare, so that their new weapons could be countered before they were used. Much of his work had to do with radio navigation, as in the Battle of the Beams, with radar, as in the Allied Bomber Offensive and in the preparations for D-Day and in the war at sea. He was also in charge of intelligence against the V-1 (flying bomb) and the V-2 (rocket) retaliation weapons and, although the Germans were some distance behind from success, against their nuclear developments.

"A delightfully original take on...the prospects for liberal democracy in the broader Islamic Middle East."—Matthew Kaminski, Wall Street Journal As the Arab Spring threatens to give way to authoritarianism in Egypt and reports from Afghanistan detail widespread violence against U.S. troops and women, news from the Muslim world raises the question: Is Islam incompatible with freedom? In *Islam without Extremes*, Turkish columnist Mustafa Akyol answers this question by revealing the little-understood roots of political Islam, which originally included both rationalist, flexible strains and more dogmatic, rigid ones. Though the rigid traditionalists won out, Akyol points to a flourishing of liberalism in the nineteenth-century Ottoman Empire and the unique "Islam-liberal synthesis" in present-day Turkey. As he powerfully asserts, only by accepting a secular state

can Islamic societies thrive. *Islam without Extremes* offers a desperately needed intellectual basis for the reconcilability of Islam and liberty.

Islam without Extremes: A Muslim Case for Liberty Bloomsbury Publishing

The Ottoman Empire began in 1300 under the almost legendary Osman I, reached its apogee in the sixteenth century under Suleiman the Magnificent, whose forces threatened the gates of Vienna, and gradually diminished thereafter until Mehmed VI was sent into exile by Mustafa Kemal (Atatürk). In this definitive history of the Ottoman Empire, Lord Kinross, painstaking historian and superb writer, never loses sight of the larger issues, economic, political, and social. At the same time he delineates his characters with obvious zest, displaying them in all their extravagance, audacity and, sometimes, ruthlessness.

Mustafa Kemal was one of the 20th century's greatest combat commanders. Born in Salonika to a middle-class family, this book follows the life of a great commander who served in the Italo-Turkish War of 1911-12 and the Balkan Wars of 1912-13 before taking command of the 19th Division based in Gallipoli during World War I. His sterling service led to his promotion to corps command during the fighting against the Russians in the Caucasus. Following the end of the war he took command of the nationalist forces struggling against the occupation of Turkey, and managed to defeat Greek forces that sought to occupy Smyrna, thus preserving Turkey's territorial integrity. Labelled as the 'Man of Destiny' by Winston Churchill, his services in Gallipoli and the War of Independence were pivotal to the success of his armies. After leading the nationalist army to victory, he established the modern Turkish Republic and became Turkey's first ever president taking the name Atatürk, meaning Father of the Turks, as his own.

MUSTAPHA KEMAL ATATURK, the great Turkish dictator, is a figure of great significance to the modern world. He did in Turkey what, in effect, Nasser and the other present-day "strong men" are trying to do in their countries, and he is their model and ideal. In fact, Nasser said of this book specifically "This has been the most important book in my life." Besides being of great historical importance, this book, first published in 1933, is also a fascinating study of an extremely complex and controversial figure, in which an iron self-discipline and a sudden capacity for self-abandonment existed side by side and indeed reinforced each other. Richly illustrated with maps and drawings.

Ataturk, the Rebirth of a Nation Bloomsbury Publishing

A joint biography of John Foster Dulles and Allen Dulles, who led the United States into an unseen war that decisively shaped today's world During the 1950s, when the Cold War was at its peak, two immensely powerful brothers led the United States into a series of foreign adventures whose effects are still shaking the world. John Foster Dulles was secretary of state while his brother, Allen Dulles, was director of the Central Intelligence Agency. In this book, Stephen Kinzer places their extraordinary lives against the background of American culture and history. He uses the framework of biography to ask: Why does the United States behave as it does in the world? The Brothers explores hidden forces that shape the national psyche, from religious piety to Western movies—many of which are about a noble gunman who cleans up a lawless town by killing bad guys. This is how the Dulles brothers saw themselves, and how many Americans still see their country's role in the world. Propelled by a quintessentially American set of fears and delusions, the Dulles brothers launched violent campaigns against foreign leaders they saw as threats to the United States. These campaigns helped push countries from Guatemala to the Congo into long spirals of violence, led the United States into the Vietnam War, and laid the foundation for decades of hostility between the United States and countries from Cuba to Iran. The story of the Dulles brothers is the story of America. It illuminates and helps explain the modern history of the United States and the world. A Kirkus Reviews Best Nonfiction Book of 2013

Path of Fire and Light Routledge

The book examines the growing tension between social movements that embrace egalitarian and inclusivist views of national and global politics, most notably classical liberalism, and those that advance social hierarchy and national exclusivism, such as neoliberalism, neoconservatism, and national populism. In exploring issues relating to tensions and conflicts around globalization, the book identifies historical patterns of convergence and divergence rooted in the monotheistic traditions, beginning with the ancient Israelites that dominated the Near East during the Axial age, through Islamic civilization, and finally by considering the idealism-realism tensions in modern times. One thing remained constant throughout the various historical stages that preceded our current moment of global convergence: a recurring tension between transcendental idealism and various forms of realism. Transcendental idealism, which prioritize egalitarian and universal values, pushed periodically against the forces of realism that privilege established law and power structure. Equipped with the idealism-realism framework, the book examines the consequences of European realism that justified the imperialistic venture into Africa, the Middle East, and Latin America in the name of liberation and liberalization. The ill-conceived strategy has, ironically, engendered the very dysfunctional societies that produce the waves of immigrants in constant motion from the South to the North, simultaneously as it fostered the social hierarchy that transfer external tensions into identity politics within the countries of the North. The book focuses particularly on the role played historically by Islamic rationalism in translating the monotheistic egalitarian outlook into the institutions of religious pluralism, legislative and legal autonomy, and scientific enterprise at the foundation of modern society. It concludes by shedding light on the significance of the Muslim presence in Western cultures as humanity draws slowly but consistently towards what we may come to recognize as the Global Age.
