JOYCE JAMARCUS

McDougal, Littell Literature and Language Rowman & Littlefield

Our collected work contains mathematics education research papers. Comparative studies of school textbooks cover content selection, compilation style, representation method, design of examples and exercises, mathematics investigation, the use of information technology, and composite difficulty level, to name a few. Other papers included are about representation of basic mathematical thought in school textbooks, a study on the compilation features of elementary school textbooks, and a survey of the effect of using new elementary school textbooks.

World History Grades 9-12 Grove Publishing

Criticizes the way history is presented in current textbooks, and suggests a more accurate approach to teaching American history.

Secondary Textbook Review McDougal Littell/Houghton Mifflin

English studies today are driven by demanding curriculum, but this need is often met with unenthusiastic students. "Fun" work—like movie days or projects—is often seen as what to do after the real work is finished. But what if instructors could blend the two pieces together more effectively, motivating students with interesting material while still achieving curriculum goals? This text attempts to fuse the pieces in to a cohesive philosophy. Yin and Yang in the English Classroom: Teaching With Popular Culture Texts is designed to

provide college professors and high school teachers with both halves they need to tackle the job of teaching students literature and writing skills: theoretical foundations of, and practical applications for, the modern classroom. In addition to theory and research, each chapter also offers ready-to-use activities and projects that can be immediately brought into the classroom. Whether you're new and need a guide to begin your journey as a teacher, or you're experienced and want to add some spice to your classroom, this text can offer new ways to fold popular culture effectively into your teaching toolbox. Other key features of this book include: Clear, easy-to-read sections for each chapter, including a Review of Current Literature and Classroom Connections Student-centered solutions to increase engagement with popular culture and technology Step-by-step plans for taking the activities from the page to the classroom easily Geometry Houghton Mifflin Our high school chemistry program has been redesigned and updated to give your students the right balance of concepts and applications in a program that provides more active learning, more real-world connections, and more engaging content. A revised and enhanced text, designed especially for high school, helps students actively develop and apply their understanding of chemical concepts. Hands-on labs and activities emphasize cutting-edge applications and help students connect concepts to the real world. A new, captivating design, clear writing style, and innovative technology resources support your students in getting the most out of their textbook. - Publisher.

Algebra Holt McDougal

High-interest, nonfiction articles help students learn about science and social studies topics while developing skills in reading comprehension. Each story is followed by questions that cover main idea, details, vocabulary, and critical reasoning. The format is similar to that of standardized tests, so as students progress through the book's units, they are preparing for success in testing.

McDougal, Littell Literature: Orange level
The New Press

An anthology of American literature for the upper grades, including Native American literature, writings by leaders of the Revolution, and short stories, poems, and plays by authors such as Melville, Twain, Faulkner, O'Neill, and Flannery O'Connor.

McDougal, Littell Literature McDougal Littell/Houghton Mifflin

Make algebra equations easy for students in grades 7 and up using Algebra II Practice! This 128-page book is geared toward students who struggle in algebra II and covers the concepts of inequalities, linear equations, polynomial products and factors, rational expressions, roots, radicals, complex numbers, quadratic equations and functions, and variations. The book supports NCTM standards and includes clear instructions, examples, practice problems, definitions, problem-solving strategies, an assessment section, answer keys, and references.

McDougal, Littell Literature, Yellow Level Teacher Created Resources

This book is intended as a resource for teachers and curriculum developers who select textbooks for secondary English courses. It includes a compilation of 32 factual textbook reviews obtained from the application of a review instrument, which was based on the California

"Model Curriculum Standards: Grades Nine through Twelve, English Language Arts" and the "English-Language Arts Framework for California Public Schools: Kindergarten through Grade Twelve." The instrument described in the book was applied to selected English composition/grammar and reading/literature textbooks. The book suggests that the resulting reviews can be used by teachers as a screening device to reduce the number of books they review and pilot studies they conduct; thus educators will have more time to do in-depth reviews of two or three textbooks which appear to match their course requirements and their students' academic needs. The book also states that the review instrument can be adapted by districts to reflect their own English objectives and test results. Every review in the book includes two parts and a publisher's description (which appears in the Appendix)--a section which depicts the extent to which the emphasis on content and process is given to each of the topics in the textbooks reviewed, and a section which includes topics on content and processes which might be found only in teachers' editions. The book does not make assessments regarding the quality of the books reviewed, but rather provides information which teachers may find useful in making quality judgments and selecting specific textbooks for English programs.
