"This volume provides readers with a glimpse into Paulus Gerdes's seminal work on the mathematics of an African tradition - 'sona' geometry, a drawing and narrative tradition from Angola with embedded mathematical ideas. The work represented in this book contributes significantly to efforts by other African mathematicians and mathematics educators to recuperate and valorize mathematical ideas and reasoning that reside in African material culture and cultural practices [...]. Moreover, Gerdes is a prolific contributor of work that reinforces a growing literature available in English of a dynamic research program in ethnomathematics. Uncoveirng the mathematical ideas embedded in a Cokwe cultural practice and providing access to the richness of these ideas are part of the concerns of ethnomathematics. As an ethnomathematician, Gerdes is not a neutral researcher but rather a public intellectual committed to finding ways not only to understand the mathematics of the Cokwe 'sona' tradition but also to raise important questions such as [...] when he observes that the profoundness of the mathematical ideas expressed in the 'sona' 'had started to build up.' With this, his reader is then prompted to ask questions: What happened to the building up of the 'sona' tradition and its

mathematical ideas? Why was this development arrested? Answering these questions along with enjoying the beautiful presentation of the mathematics of the 'sona' tradition are the gifts that readers will receive from this wonderful volume"--Arthur B. Powell, p. [4] of cover.

Social action art in book form, *Perception: A Photo Series* encourages readers to look, and then look again. Tired of reading negative and disparaging remarks directed at Indigenous people of Winnipeg in the press and social media, artist KC Adams created a photo series that presented another perspective. Called "Perception Photo Series," it confronted common stereotypes of First Nation, Inuit and Métis people to illustrate a more contemporary truthful story. First appearing on billboards, in storefronts, in bus shelters, and projected onto Winnipeg's downtown buildings, Adam's stunning photographs now appear in the book, *Perception: A Photo Series*. Meant to challenge the culture of apathy and willful ignorance about Indigenous issues, Adams hopes to unite readers in the fight against prejudice of all kinds. *Perception* is one title in *The Debwe Series*.

Published to accompany the first exhibition in Paris of highlights from The Museum of Modern Art, New York, *Being Modern* tells the stories behind 120 select artworks and design objects acquired by MoMA between the late 19th century and the present, providing a unique insight into the making of one of the greatest collections of modern and contemporary art in the world. Featuring work from all six of the Museum's departments, from Edward Hopper's *House by the Railroad* (1925) to the recently acquired original set of 176 digital emoji, the catalogue highlights the diversity and topicality of MoMA's collection, and provides a fresh perspective on the modernist canon. The book is organized chronologically according to the year each artwork entered MoMA's collection. Short texts by museum curators accompany each work, providing an overview of its significance as well as a behind-the-scenes look at the acquisitions process, often an untold aspect of a museum's history. Rather than presenting the collection as a flawlessly structured, stable entity, the book reveals its complex evolution and wide-ranging scope, demonstrating multiple ways of looking at MoMA's multidisciplinary collection.

Those who advocate ideas about "postmodernity" and "post-industrialism" offer radical critiques of existing social and political institutions. But they provide very little in place of those institutions. It is all very well to criticize the limitations of social democracy, the welfare state, trade unionism, and social classes as agents of change, but once these have been thrown into crisis what other institutions do we have to depend on? *The Reinvention of Politics*, suggests we should think again about forging a new model of politics for our times. An active, devolved civil society, Beck argues, can sustain the claim that modernity is inherently democratic. For many issues now - for example, those involving technology, environment protest, the family, or gender relations - belong to the domain of what the author calls "subpolitics". The postmodern critique of modernity, in Beck's view, is based on mistaken generalizations about a transitional phase in the evolution of modern society. What is needed, he argues, is the reinvention of politics, corresponding to the new demands of a society which remains modern, but which has progressed beyond the earlier form of industrial society. This book will be essential reading for second-year undergraduates and above in the fields of social and political theory, sociology and political science.

When Lily Rowan doesn't laugh at his jokes, Archie Goodwin knows something's wrong. Her niece Noreen has been running around with Sparky Linville, a club-hopping bad boy who's the terror of Manhattan nightlife, and the last time she went out with him, Noreen wasn't herself when she came home. They nearly come to blows, but Linville's bodyguard intervenes, and Goodwin retreats to plan his next move. In the morning, Linville is dead, and Goodwin is the chief suspect. America's urbanites have engaged in many tumultuous struggles for civil and worker rights since the Second World War. Heather Ann Thompson focuses in detail on the struggles of Motor City residents during the 1960s and early 1970s and finds that conflict continued to plague the inner city and its workplaces even after

Great Society liberals committed themselves to improving conditions. Using the contested urban center of Detroit as a model, Thompson assesses the role of such upheaval in shaping the future of America's cities. She argues that the glaring persistence of injustice and inequality led directly to explosions of unrest in this period. Thompson finds that unrest as dramatic as that witnessed during Detroit's infamous riot of 1967 by no means doomed the inner city, nor in any way sealed its fate. The politics of liberalism continued to serve as a catalyst for both polarization and radical new possibilities and Detroit remained a contested, and thus politically vibrant, urban center. Thompson's account of the post-World War II fate of Detroit casts new light on contemporary urban issues, including white flight, police brutality, civic and shop floor rebellion, labor decline, and the dramatic reshaping of the American political order. Throughout, the author tells the stories of real events and individuals, including James Johnson, Jr., who, after years of suffering racial discrimination in Detroit's auto industry, went on trial in 1971 for the shooting deaths of two foremen and another worker at a Chrysler plant. *Whose Detroit?* brings the labor movement into the context of the literature of Sixties radicalism and integrates the history of the 1960s into the broader political history of the postwar period. Urban, labor, political, and African-American history are blended into Thompson's comprehensive portrayal of Detroit's reaction to pressures felt throughout the nation. With deft attention to the historical background and preoccupations of Detroit's residents, Thompson has written a biography of an entire city at a time of crisis.

And when he arrives at his real destination, the American authorities have just one question: Is their terror suspect a Swedish citizen? In the process of uncovering the prisoner's true identity, Grip discovers the man's ties to a group of other suspects—a ruthless American arms dealer, a Czech hit man, a mysterious nurse from Kansas, and a heartbreakingly naive Pakistani. Hockey is the lens through which we see our lives—how we measure right and wrong, how we understand our hopes and fears. So it was for Dave Bidini in 1974, the last year Dave Keon played in Toronto. In a new grade in a new school, Bidini found himself the victim of a bully—a depredation he could understand only by thinking about what the Leafs' dauntless captain went through game after game. Throughout his twenty-two-year career, Keon was only in one hockey fight, in his last game as a Leaf on April 22, 1974. It was on this day that the eleven-year-old Bidini decided to fight back, an occasion that the writer looks back on with breathtaking courage and honesty. But while Bidini would remain a blue-blooded Leafs fan into adulthood, Keon became estranged from the franchise with which he'd won four Stanley Cups, two Lady Byngs, and the first ever Conn Smythe Trophy in 1967.
