...Chapter 23: The

Evolution of

Populations This

chapter begins with the

idea that we focused

on as we closed the

last chapter:

Individuals do not

evolve! Populations

evolve. The Overview

looks at the work of

Peter and Rosemary

Grant with Galápagos

finches to illustrate this

point, and the rest of

the chapter examines the change in populations over time. As in the lastChapter 23: The Evolution of PopulationsChapter 23 - The Evolution of Populations. It consists of all alleles at all gene loci in all individuals of a population. If only one allele exists at a particular locus in a population, that allele is said to be fixed in the gene pool, and all individuals will be homozygous for that gene.Chapter 23 - The Evolution of Populations | CourseNotesWe hope your visit has been a productive one.
