 Featuring a wide range of exercises,

examples, and images, this textbook provides a practical way of analyzing the discourses of the global media industries. Building on a comprehensive introduction to the history and theory of global media communication, specific case studies of lifestyle and entertainment media are explored with examples from films, global women's magazines, Vietnamese news reporting and computer war games. Finally, this book investigates how global media communication is produced, looking at the formats, languages and images used in creating media materials, both globally and in localized forms. At a time when the media is becoming increasingly global, often with the same films, news

and television programmes shown all over the world; *Global Media Discourse* provides an accessible, lively introduction into how globalization is changing the language and communicative practices of the media. Integrating a range of approaches, including political economy, discourse analysis and ethnography, this book will be of particular interest to students of media and communication studies, applied linguistics, and (critical) discourse analysis.

Even in a country where outstanding achievements have become almost a commonplace, the Japanese architect, Kisho Kurokawa, appears as both a remarkable and a remarkably successful man. With buildings in the United States and Eastern and Western Europe as well as in Japan, he has established an international reputation as a leading figure amongst the younger generation of architects. At the age of forty he already had thirty-five major buildings and seventeen books to his credit; four new towns are being built to his designs; he heads a company of over a hundred employees, he runs a think-tank and an urban design bureau and for variety he has his own television programme with a regular audience of some 30 million. Behind these statistics lies a prodigious vitality expressed in original and stimulating buildings. -- from book jacket.

Available now to FDA-regulated organizations, this manual allows facility managers to look at their operation's regulatory compliance through the eyes of the government. Because this is the primary reference manual used by FDA personnel to conduct field investigation activities, you can feel confident you are preparing appropriate planning or action. This manual includes revised instructions regarding the release of information and covers FDA's policies and expectations on a comprehensive range of topics: FDA's authority to enter and inspect, inspection notification, detailed inspection procedures, recall monitoring, inspecting import procedures, computerized data requests, federal/state inspection relationships, discussions with management regarding privileged information, seizure and prosecution, HACCP, bioengineered food, dietary supplements, cosmetics, bioterrorism, and product disposition. The Manga Guide to Statistics capitalizes on the international manga phenomenon. This first in a series of EduManga titles from No Starch Press (co-published with Ohmsha, Ltd. of Japan), *The Manga Guide to Statistics* uses manga to introduce the reader to the world of statistics. Rather than learning from a dry textbook, readers follow the animated adventures of Rui and her teacher, Mamoru Yamamoto, as Rui interacts with a colorful cast of characters. The book consists of seven chapters, each containing a cartoon, text to supplement the cartoon, an exercise and answer section, and a summary. Readers learn about working with numerical and categorical data; probability; relationships between two variables; tests of

independence; even how to perform calculations in Microsoft Excel. Other titles in the series will cover topics like databases, electricity, and physics.

In these two essays, two of the most important French thinkers of our time reflect on each other's work. In so doing, novelist/essayist Maurice Blanchot and philosopher Michel Foucault develop a new perspective on the relationship between subjectivity, fiction, and the will to truth. The two texts present reflections on writing, language, and representation that question the status of the author/subject and explore the notion of a "neutral" voice that arises from the realm of the "outside." This book is crucial not only to an understanding of these two thinkers, but also to any overview of recent French thought.
