Mayumi's Kitchen

Addison-Wesley Longman
Prepared as part of
UNEP's contribution to the
11th World Lakes
Conference (held in
Nairobi, Kenya in
November 2005), this
publication examines the
environmental changes
taking place to Africa's
lakes by analysing ground
photographs, current and

historical satellite images
and scientific evidence.
Changes highlighted
include the rapid
shrinking of Lake Songor
in Ghana, partly as a
result of intensive salt
production, and the
extraordinary changes in
the Zambezi river system
as a result of the building
of the Cabora Basa dam
site. Other impacts, some
natural and some human-
made and which can only
be truly appreciated from
space, include the

extensive deforestation
around Lake Nakuru in
Kenya, and the falling
water levels of Lake
Victoria which is now
about a metre lower than
it was in the early 1990s.
The analysis recognises
the importance of Africa's
lakes as a source of
livelihoods for many local
communities, their
contribution to the socio-
economic development of
the continent and the
need for the sustainable
management of these

resources in order to help overcome poverty and meet internationally agreed development goals by 2015.

A riveting Vietnam War story--and one of the most dramatic in aviation history--told by a New York Times bestselling author and a prominent aviation historian Every war has its "bridge"--Old North Bridge at Concord, Burnside's Bridge at

Antietam, the railway bridge over Burma's River Kwai, the bridge over Germany's Rhine River at Remagen, and the bridges over Korea's Toko Ri. In Vietnam it was the bridge at Thanh Hoa, called Dragon's Jaw. For seven long years hundreds of young US airmen flew sortie after sortie against North Vietnam's formidable and strategically important bridge, dodging a heavy concentration of anti-aircraft fire and enemy MiG planes. Many American airmen were

shot down, killed, or captured and taken to the infamous "Hanoi Hilton" POW camp. But after each air attack, when the smoke cleared and the debris settled, the bridge stubbornly remained standing. For the North Vietnamese it became a symbol of their invincibility; for US war planners an obsession; for US airmen a testament to American mettle and valor. Using after-action reports, official records, and interviews with surviving pilots, as well as untapped Vietnamese

sources, Dragon's Jaw chronicles American efforts to destroy the bridge, strike by bloody strike, putting readers into the cockpits, under fire. The story of the Dragon's Jaw is a story rich in bravery, courage, audacity, and sometimes luck, sometimes tragedy. The "bridge" story of Vietnam is an epic tale of war against a determined foe.

In the fifth of the River Cottage Handbook series, John Wright reveals the

rich pickings to be had on the seashore - and the team at River Cottage explain how to cook them to perfection. For the forager, the seashore holds surprising culinary potential. In this authoritative, witty book John Wright takes us on a trip to the seaside. But before introducing us to the various species to be harvested, he touches on such practicalities as conservation and the ethics of foraging; safety from tides, rocks and food poisoning; the law and access to the shore, our

right to fish, landing sizes and seasons; and equipment such as nets, pots and hooks. Next comes the nitty-gritty: all the main British seashore species that one might be tempted to eat. The conservation status, taste and texture, availability, seasonality, habitat, collecting technique and biology of each species is covered; there are also quite a few gratuitous but fascinating diversions. The species covered include crustacea (brown shrimp, common crab, lobster, prawn, shore

crab, spider crab, squat lobster, velvet swimming crab); molluscs (clams, cockle, dog whelk, limpet, mussel, oyster, razor clam, winkle); mushrooms; plants (alexanders, babbington's orache, fennel, frosted orache, marsh samphire, perennial wall rocket, rock samphire, sea beet, sea buckthorn, sea holly, sea kale, sea purslane, sea rocket, spear-leaved orache, wild cabbage, wild thyme); and seaweed (carragheen, dulse, gut weed, laver, pepper dulse, sea lettuce, sugar kelp,

kelp). Finally, there are thirty brilliant recipes. Introduced by Hugh Fearnley-Whittingstall, *Edible Seashore* is destined to join the other handbooks in the series as an indispensable household reference.

This volume examines the relationships between the German colonial administration, the Basel Mission, the British Baptist Missionary Society and other missionary societies that characterized the setting up of Basel Mission education in Cameroon against the backdrop of intense rivalry. Spanning a period of 82 years, the book meticulously documents the kick off, expansion and elaboration of the Basel Mission's efforts to institutionalise education as well as its objectives

and operational modalities. *Basel Mission Education in Cameroon* deepens our understanding of European imperialism and its legacy in postcolonial societies. Policy makers and educationists in Cameroon and Africa at large will find this volume very instructive as they forge educational systems that serve the needs of current and future generations of Africans. Aneji Eko was technically illiterate, but she represents a resource for understanding the complexities of African and Nigerian cultures. This is an account of matriarchy and the complex ties of kinship, their influences in shaping childhood culture, and how they determined cultural expectations across ethnic groups. *Atlas of CT Angiography* Bloomsbury Publishing This collection of the proceedings of the 3rd conference on bi- and multilingual universities,

held at the Free University of Bozen-Bolzano from 20 to 22 September 2007, tries to give a state-of-the-art insight into theoretical and practical approaches towards implementing bi- and multilingual models and policies in higher education institutions in various parts of the world. **Kasher in the Rye** Tiger Tales This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical

applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases

include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology. *Noisy Trucks Wee Society* "The finest, most moving and powerful memoir I have ever read."—MAYIM BIALIK Rising young comedian Moshe Kasher is

lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But Kasher in the Rye is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was

more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland , California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations. Fundamentals of Flight

This book presents the latest trends in attacks and protection methods of Critical Infrastructures. It describes original research models and applied solutions for protecting major emerging threats in Critical Infrastructures and their underlying networks. It presents a number of emerging endeavors, from newly adopted technical expertise in industrial security to efficient modeling and

implementation of attacks and relevant security measures in industrial control systems; including advancements in hardware and services security, interdependency networks, risk analysis, and control systems security along with their underlying protocols. Novel attacks against Critical Infrastructures (CI) demand novel security solutions. Simply adding more of what is done already (e.g. more thorough risk assessments, more expensive Intrusion

Prevention/Detection Systems, more efficient firewalls, etc.) is simply not enough against threats and attacks that seem to have evolved beyond modern analyses and protection methods. The knowledge presented here will help Critical Infrastructure authorities, security officers, Industrial Control Systems (ICS) personnel and relevant researchers to (i) get acquainted with advancements in the field, (ii) integrate security research into their industrial or research

work, (iii) evolve current practices in modeling and analyzing Critical Infrastructures, and (iv) moderate potential crises and emergencies influencing or emerging from Critical Infrastructures.

Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from *Walking Through Clear Water in a Pool Painted Black* and other publications. Also the best of Cookie's art columns from *Details* magazine, and the funniest of her advice columns from the *East Village Eye*, on everything from homeopathic medicine to how to cut your cocaine

with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before Bright Lights, Big City, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.
