LAYLA MATHEWS

Women's Education, Autonomy, and Reproductive Behaviour Harper Collins

This new, corpus-driven approach to the study of language and style of literary texts makes use of the Dickens' 4.6 million-word corpus for a detailed examination of patterns of lexical collocations. It offers new insights into Dickens' linguistic innovation, together with a nuanced understanding of his use of language to achieve stylistic ends. At the centre of the study is a close analysis of the two narratives in *Bleak House*, read as a focal point for consideration of Dickens' stylistic development through his whole writing life.

Science and Archaeology Cambridge University Press

This work is a critical investigation into the relationship between religious affiliation, on the one hand, and fertility, family size preferences and family planning behaviour, on the other. Dr Chamie works from a set of unique data: the 1971 Fertility and Family Planning Survey in Lebanon. This survey is not only a national study of Lebanese fertility but also a large-scale survey (2,800 people) offering the opportunity to study Arab Christian-Muslim differentials. Lebanon's demographic situation has far greater scientific and practical importance than might be supposed from its relatively small population. From observing the important religious communities at different stages of social and economic development, Dr Chamie has thus been able to analyse the interacting effects of religion and socio-economic development on reproductive behaviour.

National Negro Health Week ... OUP Oxford

"A thoroughly modern, personally unique encyclopedia for specific meditations for physical, emotional and spiritual health and healing." —C. Norman Shealy, MD, PhD, founder of the American Holistic Medical Association and president of Holos Institutes of Health *The Best Meditations on the Planet* gives you one hundred meditations that can be used to improve your emotional, mental, and physical well-being. Rewire your brain for happiness, to bolster your immune system against illness, or decrease anxiety. There are unique meditations for just about everything; like #23 Manage Anger by Disconnecting Your Buttons; #49 Improve Your Athletic Ability; or #85 Unblock Your Creativity. If you've always wanted to reap the benefits of meditation but were concerned that it is too hard or takes too much time, we'll get you meditating and experiencing benefits immediately.

A Disorder Peculiar to the Country Verso Books

A National Book Award Finalist "The best novel yet about 9/11.... A brilliant new comedy of manners, *A Disorder Peculiar to the Country* is about the way a conflict takes on a logic and momentum of its own." —Salon "Savagely hilarious." —Elle Joyce and Marshall each think the other is killed on September 11—and must swallow their disappointment when the other arrives home. As their bitter divorce is further complicated by anthrax scares, suicide bombs, and foreign wars, they suffer, in ways unexpectedly personal and increasingly ludicrous, the many strange ravages of our time. In this astonishing black comedy, Kalfus suggests how our nation's public calamities have encroached upon our most private illusions.

Territories, Boundaries and Cultures in the Neolithic Near East Springer

A wonderful companion to Gregg Dreise's highly acclaimed *My Culture and Me*, this joyful picture book celebrates Australia's Indigenous heritage and the diversity we enjoy today. Hello and welcome to our corroboree. Hello and welcome to our gathering. Father Sky, Mother Earth, together here with

me. Different colours, different people, together in harmony.

The New Yale Book of Quotations Kingston Imperial

"In *A Nation on Fire*, journalist Clay Risen relies on dozens of interviews and reams of newly declassified documents to offer a sweeping day-by-day, city-by-city account of the riots, from the looting and burning in Washington to explosions of violence in Chicago, Baltimore, Kansas City, and 117 other cities, large and small. Taking readers inside the Oval Office, the Pentagon, and city halls across the country, he introduces them to key players at every level - from the first army soldier to enter Washington to the crack team of Johnson aides who managed the crisis from inside the White House to the civil rights leaders who helped avert violence in Memphis, where King was shot." --BOOK JACKET.

ReSignifications British Archaeological Reports Oxford Limited

Strongly anti-feminist--Jim Kepner. There is some (unsympathetic) discussion of homosexuality (see pp. 37f.), and of Kate Millett and other "women libbers" whom the wife of our recent senatorial aspirant very much dislikes.--P. Thorslev.

A Nation on Fire Cambridge University Press

In the last decade it has evolved from James' individual attempt to understand the clash of ancient and modern cultures he witnessed growing up in Australia to what it is today - a powerful expression of partnership and reconciliation in action through art, music and film that has become a global example of true collaboration across deep cultural divides. From its humble beginnings as a photographic and film exhibition in New York in 1999, *NOMAD TWO WORLDS* endured the years leading up to the global event known in the political narrative simply as *The Apology*, the 2008

public apology made to Indigenous Australians by the then Australian Prime Minister, Kevin Rudd. Developing NOMAD TWO WORLDS has involved a decade of groundwork, including travel to remote regions of northern Western Australia with senior Indigenous custodians who have provided access to sites of great cultural significance to the Aboriginal people of that region. Burial grounds, gorges, stunning coastlines and desert locations, often restricted and secret, were allowed to be photographed and filmed by James in the spirit of meaningful reconciliation. The result, an unprecedented artistic collaboration of hand embellished art photographs, form the heart of a NOMAD TWO WORLDS installation. The ABC Documentary released in 2011 'Becoming Jangala' is a detailed look back at the creation of NOMAD TWO WORLDS and the special bond between Bieundurry and James and can be viewed on this site.

Hello and Welcome John Wiley & Sons

Roger and Patricia Jeffery are well known for their work on religion and gender in South Asia. In their latest book, a study of the demographic processes of two castes in rural north India, they ask why fertility levels are higher among the Muslim Sheikhs than the Hindu Jats. They conclude that explanations can only partially be attributed to gender relationships and religion, and it is the economic and political interests of both groups which are the defining factors. Their marginal economic position provides little incentive for the Sheikhs to raise small families, while the Jats, who are locally dominant, are encouraged to use birth control and educate their children. The authors go on to demonstrate the significance of this analysis for a wider understanding of the problems of population and politics in India generally. The book will be invaluable for students of South Asia and for anyone interested in the demography of developing countries.

The Mamasani Archaeological Project Stage One Te Neues Publishing Group

Now in paperback, this book has succeeded in its aim to introduce the global climate problem and the complex processes and interactions which play a part in climatic change to a wide range of scientists working in climatic research or the related fields of meteorology, oceanography, glaciology and hydrology. It is centred around the World Climate Research Programme, an international enterprise jointly sponsored by the scientific community (through the International Council of Scientific Unions) and the national weather centres (through the World Meteorological Organisation). If progress is to be made in understanding climatic change, it is necessary to observe and understand all components of the climate system and the interactions between them. This book is particularly relevant to many contemporary climatic problems and to the two most important questions arising from them: to what extent can changes in climate be predicted; and what is the extent of man's influence on climate. The Global Climate answers these questions, showing how the important processes may be observed, evaluated and modelled by computer.

New Serial Titles Cambridge University Press

Trauma in Contemporary Literature analyzes contemporary narrative texts in English in the light of trauma theory, including essays by scholars of different countries who approach trauma from a variety of perspectives. The book analyzes and applies the most relevant concepts and themes discussed in trauma theory, such as the relationship between individual and collective trauma, historical trauma, absence vs. loss, the roles of perpetrator and victim, dissociation, nachträglichkeit, transgenerational trauma, the process of acting out and working through, introjection and incorporation, mourning and melancholia, the phantom and the crypt, postmemory and multidirectional memory, shame and the affects, and the power of resilience to overcome trauma. Significantly, the essays not only focus on the phenomenon of trauma and its diverse manifestations but, above all, consider the elements that challenge the aporias of trauma, the traps of stasis and repetition, in order to reach beyond the confines of the traumatic condition and explore the possibilities of survival, healing and recovery.

This large volume presents the results of the first stage of the Iranian Center for Archaeological Research (ICAR)-University of Sydney field research in the highland region of Mamasani, south-western Iran. This comprised test soundings at Tol-e Nurabad and Tol-e Spid, and a regional survey of the Dasht-e Rostam-e Yek and Do plains. The research was conducted over two six-week seasons in 2003, with a subsequent one-month study season in 2004.

Nitrogen, Phosphorus and Sulphur--global Cycles CUP Archive

Quantitative studies of science and technology represent the research field of utilization of mathematical, statistical, and data-analytical methods and techniques for gathering, handling, interpreting, and predicting a variety of features of the science and technology enterprise, such as performance, development, and dynamics. The field has both strongly developed applied research as well as basic research characteristics. The principal purpose of this handbook is to present this wide range of topics in sufficient depth to give readers a reasonably systematic understanding of the domain of contemporary quantitative studies of science and technology, a domain which incorporates theory, methods and techniques, and applications. In addressing this domain, the handbook aims at different groups of readers: those conducting research in the field of science and technology, including (graduate) students, and those who are to use results of the work presented in this book.

The Global Climate Walter de Gruyter

This text provides an introduction to criminal law. It includes discussion of important case law developments in the law of provocation, consent, conspiracy and duress, and also discusses the Law Commission's proposals on the law of murder.

The unofficial Dyson DC07 workshop manual. All you need to know to perform any DIY repair to your Dyson DC07 vacuum cleaner. There is nothing that can go wrong with your Dyson DC07, which if you are practically inclined, you cannot source the parts and repair yourself for a fraction of the cost of a new Dyson. More importantly, armed with this book, you will have the information you need to get it right the first time and have your Dyson up and running again quickly - without breaking the bank! Everything is covered from filters and basic maintenance right through to a motor swap. You will also learn where to buy special tools and how to troubleshoot a faulty machine. Why pay excessive repair charges to vacuum cleaner engineers when you can do it yourself? Repairing and extending the life of your Dyson is green. It's a small cog in the large machine that is our future sustainability. This book is unofficial. That means it is not authorised, approved, or endorsed by Dyson Ltd.

The Unofficial Dyson DC07 Workshop Manual: All you need to know to perform any DIY repair to your Dyson DC07 Leuven University Press

Sagalassos, once the metropolis of the Western Taurus range (Pisidia, Turkey), was only thoroughly surveyed in 1884 and 1885 by an Austrian team directed by K. Lanckoronski. In 1986-1989 this work was resumed by a British-Belgian team co-directed by Dr. Stephen Mitchell (University College of Swansea) and by Prof. Dr. Marc Waelkens (Catholic University of Leuven). In 1990 Sagalassos became a full scale Belgian project and a leading center for interdisciplinary archaeological and archaeometrical research. Due to its altitude, the site is one of the best preserved towns from classical antiquity, with a rich architectural and sculptural tradition dating from the second century BC to the sixth century AD. From early Imperial times until the early Byzantine period a complete range of coarse and red slip wares was produced locally. Excavations are concentrated on the upper and lower agoras to document the political and commercial life in the town and also in the area where a late Hellenistic fountain house, which still functions to date, and a Roman library were discovered. Major efforts are undertaken to restore the excavated monuments in their old glory. Several disciplines integrate the town again within its ancient environment and document the central role which Sagalassos played in the area.
