"The purpose of this chapter is to provide

an overview of assurance, attestation, and
audit services. While the focus of this text
is the audit of financial statements, in this
chapter we define assurance and attest
engagements, and differentiate among the
types of assurance engagements. We also
discuss why there is a demand for audit
and assurance services, and then identify
the separate roles of the financial
statement preparer and the auditors. In
addition, we introduce regulatory bodies
and other organizations that impact the
audit profession. We also explain what is
communicated in the auditor's report as

well as discuss the audit expectation gap"-

This book is not about selling products -- it

is about selling yourself, your ideas, and your services. This book explains an innovative dialogue sales process, and the relationship sales principles that underpin it. In every sales situation, there is both a seller and a buyer and, at different times, either the buyer or the seller may take the lead. The dance they perform may or may not lead to a deal, but it will leave them knowing a little more about each other's strengths and weaknesses. These two dancers are "connected" and follow the same steps -- The five steps they follow are to plan, connect, dialogue, record, and follow up. The five steps are the basis of the dialogue process. In addition, this book provides easy-to-follow guidance for three groups of people: 1. Professionals wanting to sell their services and improve their business development; 2. Thought leaders, change agents, innovators, entrepreneurs, senior public servants, and advocates wanting to sell their ideas to others; 3. Mid-career job seekers and recent graduates aiming to sell themselves into a dream job role either full or part-time.
