Research & Education Association
Research & Education Association (REA)
is an organization of educators,
scientists, and engineers specializing in
various academic fields. Founded in
1959 with the purpose of disseminating
the most recently developed scientific
information to groups in industry,
government, high schools, and
universities, REA has since become a
successful and highly respected
publisher of study aids, test preps,
handbooks, and reference works. REA's
Test Preparation series includes study
guides for all academic levels in almost
all disciplines. Research & Education
Association publishes test preps for
students who have not yet completed
high school, as well as high school
students preparing to enter college.
Students from countries around the
world seeking to attend college in the
United States will find the assistance
they need in REA's publications. For
college students seeking advanced
degrees, REA publishes test preps for
many major graduate school admission
examinations in a wide variety of
disciplines, including engineering, law,
and medicine. Students at every level, in
every field, with every ambition can find
what they are looking for among REA's
publications. While most test preparation
books present practice tests that bear
little resemblance to the actual exams,
REA's series presents tests that
accurately depict the official exams in
both degree of difficulty and types of
questions. REA's practice tests are
always based upon the most recently
administered exams, and include every
type of question that can be expected on

the actual exams. REA's publications
and educational materials are highly
regarded and continually receive an
unprecedented amount of praise from
professionals, instructors, librarians,
parents, and students. Our authors are
as diverse as the fields represented in
the books we publish. They are well-
known in their respective disciplines and
serve on the faculties of prestigious high
schools, colleges, and universities
throughout the United States and
Canada. CHAPTER 1 - ABOUT THE SAT II:
MATH LEVEL IC SUBJECT TEST ABOUT
THIS BOOK This book provides you with
an accurate and complete
representation of the SAT II: Math Level
IC Subject Test. Inside you will find a
complete course review designed to
provide you with the information and
strategies needed to do well on the
exam, as well as six practice tests based
on the actual exam. The practice tests
contain every type of question that you
can expect to appear on the SAT II: Math
Level IC Subject Test. Following each
test you will find an answer key with
detailed explanations designed to help
you master the test material. ABOUT
THE TEST Who Takes the Test and What
Is It Used For? Students planning to
attend college take the SAT II: Math
Level IC Subject Test for one of two
reasons: (1) Because it is an admission
requirement of the college or university
to which they are applying; OR (2) To
demonstrate proficiency in Mathematics.
The SAT II: Math Level IC exam is
designed for students who have taken
more than three years of college
preparatory mathematics (two years of
algebra and one year of geometry). Who
Administers The Test? The SAT II: Math
Level IC Subject Test is developed by the
College Board and administered by
Educational Testing Service (ETS). The

test development process involves the assistance of educators throughout the country, and is designed and implemented to ensure that the content and difficulty level of the test are appropriate. When Should the SAT II: Math Level IC be Taken? If you are applying to a college that requires Subject Test scores as part of the admissions process, you should take the SAT II: Math Level IC Subject Test by November or January of your senior year. If your scores are being used only for placement purposes, you may be able to take the test in the spring. For more information, be sure to contact the colleges to which you are applying. When and Where is the Test Given? The SAT II: Math Level IC Subject Test is administered five times a year at many locations throughout the country; mostly high schools. The test is given in November, December, January, May, and June. To receive information on upcoming administrations of the exam, consult the publication *Taking the SAT II: Subject Tests*, which may be obtained from your guidance counselor or by contacting: College Board SAT Program P.O. Box 6200 Princeton, NJ 08541-6200 Phone: (609) 771-7600 Website: <http://www.collegeboard.com> Is There a Registration Fee? You must pay a registration fee to take the SAT II: Math Level IC. Consult the publication *Taking the SAT II: Subject Tests* for information on the fee structure. Financial assistance may be granted in certain situations. To find out if you qualify and to register for assistance, contact your academic advisor. What Kind of Calculator Can I Use? Your calculator should be, at the minimum, a scientific calculator. It can be programmable or non-programmable. Bear in mind, however, that for perhaps 60 percent of the test items, the

calculator will afford you no advantage and, moreover, may actually work against you. No pocket organizers, hand-held minicomputers, paper tape, or noisy calculators may be used. In addition, no calculator requiring an external power source will be allowed. Finally, no sharing of calculators will be permitted - you must bring your own. Make sure you are thoroughly familiar with the operation of your calculator before the test. Your performance on the test could suffer if you spend too much time searching for the correct function on your calculator. HOW TO USE THIS BOOK What Do I Study First? Remember that the SAT II: Math Level IC Subject Test is designed to test knowledge that has been acquired throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II: Math Level IC Subject Test. To begin your studies, read over the review and the suggestions for test-taking, take one of the practice tests to determine your area(s) of weakness, and then restudy the review material, focusing on your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II: Math Level IC Subject Test. When Should I Start Studying? It is never too early to start studying for the SAT II: Math Level IC test. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn

the test material. The sooner you learn the format of the exam, the more comfortable you will be when you take the exam. **FORMAT OF THE SAT II: MATH LEVEL IC** The SAT II: Math Level IC is a one-hour exam consisting of 50 multiple-choice questions. Material Tested The follo

Do your students attempt to memorize facts and mimic examples to make it through algebra? James Stewart, author of the worldwide, best-selling calculus texts, saw this scenario time and again in his classes. So, along with longtime coauthors Lothar Redlin and Saleem Watson, he wrote COLLEGE ALGEBRA specifically to help students learn to think mathematically and to develop genuine problem-solving skills. Comprehensive and evenly-paced, the text has helped hundreds of thousands of students. Incorporating technology, real-world applications, and additional useful pedagogy, the Seventh Edition promises to help more students than ever build conceptual understanding and a core of fundamental skills.
