Jiggle spans the fields of women's studies, cultural studies, and media studies as it examines the significance of women's embodied experience with the most intimate strictures of femininity: foundation garments. Feminist theory of the body, the cultural production and consumption of fashion and beauty cultures, femininity and female subjectivity are woven together to tell the story of how women are shaped physically, culturally, socially and

politically by shaping garments. *Modern Families* Vintage Canada
 Although almost forgotten today, Ina Lohr played a significant role in Basel's 20th-century musical world. In 1930, she became Paul Sacher's musical assistant, helping in the preparations for performances of the Basel Chamber Orchestra, of which he was the director. Just three years later, she was one of the courageous pioneers who under the direction of Paul Sacher founded the now internationally renowned Schola Cantorum Basiliensis. As Ina Lohr was instrumental in creating its program, her work indirectly had an enormous impact on the Early Music Movement. Through her biography, we learn to see Early Music within the complex cultural and religious matrix of her time, forcing ourselves to transcend our own boundaries to understand her life.

"Spring focuses on the lute in Britain, but also includes two chapters devoted to continental developments: one on the transition from medieval to renaissance, the other on renaissance to baroque, and the lute in Britain is never treated in isolation. Six chapters cover all aspects of the lute's history and its music in England from 1285 to well into the eighteenth century, whilst other chapters cover the instrument's early history, the lute in consort, lute song accompaniment, the theorbo, and the lute in Scotland."--Jacket.

This book describes a pathway for sustainable phosphorus management via the Global Transdisciplinary Processes for Sustainable Phosphorus Management project (Global TraPs). Global TraPs is a multi-stakeholder forum in which scientists from a variety of disciplines join with key actors in practice to jointly identify critical questions and to articulate what new knowledge, technologies and policy processes are needed to ensure that future phosphorus use is sustainable, improves food security and environmental quality and provides benefits for the poor. The book offers insight into economic scarcity and identifies options to improve efficiency and reduce environmental impacts of anthropogenic phosphorus flows at all stages of the supply and use chain.

World Development Report 1978 Hal Leonard Corporation

This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

A single significant Jacobean country house, Theobalds, provides the focus for this study. James Sutton here delves into the cultural and political aspirations of the two men most closely associated with Theobalds: William Cecil, Lord Burghley (1520-1598), who constructed the building, and his second-born son and political scion, Robert, 1st Earl of Salisbury (1563-1612). Attending to the opulent materials and hegemonic spatial codes that enabled Theobalds' fabrication, this book also demonstrates the enormous costs - economic, political, social, but especially familial and personal - of building to envious show in the period. Neither celebrating nor castigating the Cecils' conspicuous consumption at their Hertfordshire estate, the author offers a balanced appraisal of the aesthetic strategies through which they promulgated a family narrative. The forms of display he emphasizes are those in which Theobalds was particularly strong:

architecture, gardening, the decorative arts, and above all, the occasional drama. Through its detailed rhetorical analysis of one house and one family, this book provides a fresh view of the complex passage from Elizabethan to Jacobean style. poetics, *Materializing Space at an Early Modern Prodigy House* deepens our understanding of how early modern English men and women chose to be represented, both to themselves and to others.

A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. *The Case for Marriage* is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. *The Case for Marriage* combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. *The Case for Marriage* is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of *The Book of Virtues* "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- *The Wall Street Journal*

To a certain extent the dementias have been forgotten diseases until just recently when they were brought to the attention of the general public and health authorities as a result of the increasing number of cases in the aging population, especially among famous people, and because of the efforts of private foundations. The goals of the present volume are to present the dementias to health practitioners, to provide some basic information on their epidemiology and biological basis and to discuss the diagnostic and clinical problems that physicians and institutions face when caring for demented patients. This book

explores the various types of dementias and is not limited to Alzheimer's disease although, as expected, more information is available and presented on this pathology. On the other hand, a few fundamental questions on dementia can only be answered through a comparison of the various forms. Examples of such questions are the following: Is the loss of cerebral tissue sufficient to cause dementia? Are there thresholds or is there a continuous progression toward the irreversible development of dementia? Are there common pathways in the dementing process? Are there common risk factors? Comparative analysis allows the common and distinctive patterns of the various dementias to be defined, ultimately leading to more focused therapeutic interventions.

With nearly 400 scores to his credit, Ennio Morricone is one of the most prolific and influential film composers working today. He has collaborated with many significant directors, and his scores for such films as *The Good, the Bad, and the Ugly*; *Once Upon a Time in America*; *Days of Heaven*; *The Mission*; *The Untouchables*; *Malèna*; and *Cinema Paradiso* leave moviegoers with the conviction that something special was achieved—a conviction shared by composers, scholars, and fans alike. In *Composing for the Cinema: The Theory and Praxis of Music in Film*, Morricone and musicologist Sergio Miceli present a series of lectures on the composition and analysis of film music. Adapted from several lectures and seminars, these lessons show how sound design can be analyzed and offer a variety of musical solutions to many different kinds of film. Though aimed at composers, Morricone's expositions are easy to understand and fascinating even to those without any musical training. Drawing upon scores by himself and others, the composer also provides insight into his relationships with many of the directors with whom he has collaborated, including Sergio Leone, Giuseppe Tornatore, Franco Zeffirelli, Warren Beatty, Ridley Scott, Roland Joffé, the Taviani Brothers, and others. Translated and edited by Gillian B. Anderson, an orchestral conductor and musicologist, these lessons reveal Morricone's passion about musical expression. Delivered in a conversational mode that is both comprehensible and interesting, this groundbreaking work intertwines analysis with practical details of film music composition. Aimed at a wide audience of composers, musicians, film historians, and fans, *Composing for the*

Cinema contains a treasure trove of practical information and observations from a distinguished musicologist and one of the most accomplished composers on the international film scene.

In its seventeenth-century heyday, the English broadside ballad was a single large sheet of paper printed on one side with multiple woodcut illustrations, a popular tune title, and a poem. Inexpensive, ubiquitous, and fugitive—individual elements migrated freely from one broadside to another—some 11,000 to 12,000 of these artifacts pre-1701 survive, though many others have undoubtedly been lost. Since 2003, Patricia Fumerton and a team of associates at the University of California, Santa Barbara have been finding, digitizing, cataloging, and recording these materials to create the English Broadside Ballad Archive. In this magisterial and long-awaited volume, Fumerton presents a rich display of the fruits of this work. She tracks the fragmentary assembling and disassembling of two unique extant editions of one broadside ballad and examines the loose network of seventeenth-century ballad collectors who archived what were essentially ephemeral productions. She pays particular attention to Samuel Pepys, who collected and bound into five volumes more than 1,800 ballads, and whose preoccupations with black-letter print, gender, and politics are reflected in and extend beyond his collecting practices. Offering an extensive and expansive reading of an extremely popular and sensational ballad that was printed at least 37 times before 1701, Fumerton highlights the ballad genre's ability to move audiences across time and space. In a concluding chapter, she looks to Shakespeare's *The Winter's Tale* to analyze the performative potential ballads have in comparison with staged drama. A broadside ballad cannot be "read" without reading it in relation to its images and its tune, Fumerton argues. To that end, *The Broadside Ballad in Early Modern England* features more than 80 illustrations and directs its readers to a specially constructed online archive where they can easily access 48 audio files of ballad music.

Frank R. Paul is almost universally recognized as the "Father of Science Fiction Illustration," and rightly so, since his work has influenced and inspired generations of artists and visionaries over the past eighty years. From Flash Gordon to Luke Skywalker, Paul's presence is still being felt in the twenty-first century. Jerry Weist, noted Science Fiction historian, scholar, and founding editor of the prestigious EC comic fanzine *Squa Tront*, has turned his keen insight towards Paul, who envisioned a world of futuristic cities, space travel, and alien life forms. These fantastic visions were realized in the pages of *Amazing Stories* and hundreds of other science fiction pulps and digest magazines. Weist, who authored *Ray Bradbury: An Illustrated Life* (in collaboration with Bradbury) has brought together informative text on Paul and a visual record of nearly every one of his incredible covers, as well as some of his very best, and rarely seen, pen and ink interior illustrations. Featuring an Introduction by Hugo Award-winning science fiction illustrator Vincent Di Fate, this will be a visual feast for lovers of classic science fiction art.

The Millennium Dome, *Braveheart* and *Rolls Royce* cars. How do cultural icons reproduce and transform a sense of national identity? How does national identity vary across time and space, how is it contested, and what has been the impact of globalization upon national identity and culture? This book examines how national identity is represented, performed, spatialized and materialized through popular culture and in everyday life. National identity is revealed to be inherent in the things we often take for granted - from landscapes and eating habits, to tourism, cinema and music. Our specific experience of car ownership and motoring can enhance a sense of belonging, whilst Hollywood blockbusters and national exhibitions provide contexts for the ongoing, and often contested, process of national identity formation. These and a wealth of other cultural forms and practices are explored, with examples drawn from Scotland, the UK as a whole, India and Mauritius. This book addresses the considerable neglect of popular cultures in recent studies of nationalism and contributes to debates on the relationship between 'high' and 'low' culture.
