The United States Pharmacopeia. U.S. Pharmacopeia

The USP-NF is a combination of two compendia, the United States Pharmacopeia (USP) and the National Formulary (NF). It contains standards for medicines, dosage forms, drug substances, excipients, biologics, compounded preparations, medical devices, dietary supplements, and other therapeutics. The current version of USP-NF standards deemed official by USP are enforceable by the U.S. Food and Drug Administration for medicines manufactured and marketed in the United States. Learn more about the USP-NF and how it is developed.

The United States Pharmacopeia
National Academies Press

For the first time, a single reference identifies medical technology assessment programs. A valuable guide to the field, this directory contains more than 60 profiles of programs that conduct and report on medical technology assessments. Each profile includes a listing of report citations for that program, and all the reports are indexed under major subject headings. Also included is a cross-listing of technology assessment report citations arranged by type of technology headings, brief descriptions of approximately 70 information sources of potential interest to technology assessors, and addresses and

descriptions of 70 organizations with memberships, activities, publications, and other functions relevant to the medical technology assessment community.

Pharmacopeia

Resumen: The United States Pharmacopeia-National Formulary (USP-NF) is a book of public pharmacopeial standards. It contains standards for medicines, dosage forms, drug substances, excipients, medical devices, and dietary supplements. USP-NF in English is available in print, online, and CD formats. Starting November 2006, The USP-NF is a single-volume combination of two official compendia, the United States Pharmacopeia (USP) and the National Formulary (NF).

Monographs for drug substances and preparations are featured in the USP. Monographs for dietary supplements and ingredients appear in a separate section of the USP. Excipient monographs are in the NF. A monograph includes the name of the ingredient or preparation. the definition. packaging, storage, and labeling requirements. and the specification. The specification consists of a series of tests, procedures for the tests, and acceptance criteria.
