we shall consider the "integer"section of

the architecture only: instructions operate

on integer registers(add, sub, etc.),

memory (load, store) and PC (branches, unconditional and conditional).
 3Introducing modern computer architectures
 Solution architecture is the process of developing solutions based on predefined processes, guidelines and best practices with the objective that the developed solution fits within the enterprise architecture in terms of information architecture, system portfolios, integration requirements and many more. It can then be viewed as a combination of roles, processes and documentation that are intended to address specific business needs, requirements or problems through the design and development ...
