political geography. The editors devise a conceptual structure for the field, bringing political geography into line with trends in contemporary geography as a whole and with other social sciences. Not only do the selections contain a wide variety of contributions from other fields, but the introductory essays and annotated bibliographies suggest related research. The structure of the book enjoys close parallels in other social sciences. The organization of the book reflects the editors' definitions and structuring of political geography. Part I, "Heritage," includes works that have contributed to the theoretical development of the field. Part II, "Structure," comprises the concern to which political geographers have devoted most of their past attention. Parts III and IV, "Process" and "Behavior," form the subject where much future theoretical and practical effort is needed. Part V, "Environment," provides the context in which spatial structure, process, and behavior occur. The Structure of Political Geography includes selections from sociobiology, history, international relations, political economy, political science, social psychology, and sociology. The classics in the field are an essential inclusion since the book would be incomplete without them. The selections in the volume, originally published in 1971, remain useful and pertinent to political geographers of diverse persuasion and to social scientists interested in geographical approaches. The fact that there is a clear focus and conceptual interdependence in political geography is the volume's greatest contribution.

Annual Report of the Superintendent of Public Instruction of the Commonwealth of Virginia Oswaal Books and Learning Private Limited

An increasing amount of work in many aspects of human geography is concerned with the effects caused by different types of institutions. Included in this book, originally published in 1982, is material from Britain, Ameican and Europe and it is shown that differences in institutional powers in these places, especially those vested in the State, relate directly to their own particular urban and environmental policies and problems. Each chapter, written by an expert on this subject, considers key institutions in a number of fields and draws conclusions about how this 'institutionalist' approach can be used by geographers.
