aspects of geography, from climate change and water pollution to food security, social justice and human development. BSc Geography (Human and Physical) with Professional ... Human Environment We need the physical environment to meet our needs We obtain food from plants and animals, wood from trees and water from rivers Materials we use from the physical environment is called natural resources When we extract and use these natural resources we often change the physical environment Physical and Human Geography - SlideShare Physical geography focuses on natural processes of the earth, including climate and plate tectonics, whereas human geography studies the effect and behavior of humans and how they relate to the physical world. The two fields of geography are interrelated. Physical geography is concerned with the lithosphere, atmosphere, hydrosphere and biosphere. What Is the Difference Between Physical and Human Geography? Physical geography involves all the planet's physical systems. Human geography incorporates studies of human culture, spatial relationships, interactions between

humans and the environment, and many other research areas that involve the different subspecialties of geography. 1.2 Geography as a Science - Physical Geography and ... Physical geography is the study of our planet and its systems (ecosystems, climate, atmosphere, hydrology). Understanding the climate and how it's changing (and the potential results of those changes) affect people now and can help plan for the future. Because the study of Earth is vast, numerous sub-branches of physical geography specialize in different areas, from the upper limits of the sky to the bottom of the ocean. What Is Physical Geography? - ThoughtCo KS1 Geography learning resources for adults, children, parents and teachers organised by topic. KS1 Geography - BBC Bitesize Historical geography is the study of the human, physical, fictional, theoretical, and "real" geographies of the past. Historical geography studies a wide variety of issues and topics. A common theme is the study of the geographies of the past and how a place or region changes through time.
