 Comprised of the accounts of twelve heterosexual couples in which the man is on the Autism Spectrum, this book invites both partners to discuss their own perspectives of different key issues, including anxiety, empathy, employment and socialising. Autism expert Tony Atwood contributes a commentary and a question and answer section for each of the twelve accounts. The first book of its kind to provide perspectives from both sides of a relationship on a variety of different topics, *Neurodiverse Relationships* is the perfect companion for couples in neurodiverse relationships who are trying to understand one another better.

Targeted Muscle Reinnervation Amer Physical Therapy Assn Through his professional and church experiences, Dr. Wolthuis worked with and observed the power-brokers, the ordinary, and the down-trodden. As he visited several refugee camps, he saw thousands who practiced daily Christ-like charity and exemplified "doing it unto the least of these my brethren."

Best's Insurance Reports, Life-health National Academies Press Implement TMR with Your Patients and Improve Their Quality of Life Developed by Dr. Todd A. Kuiken and Dr. Gregory A. Dumanian, targeted muscle reinnervation (TMR) is a new approach to accessing motor control signals from peripheral nerves after amputation and providing sensory feedback to prosthesis users. This practical approach has many advantages over other neural-machine interfaces for the improved control of artificial limbs. Targeted Muscle Reinnervation: A Neural Interface for Artificial Limbs provides a template for the clinical implementation of TMR and a resource for further research in this new area of science. After describing the basic scientific concepts and key principles underlying TMR, the book presents surgical approaches to transhumeral and shoulder disarticulation amputations. It explores the possible role of TMR in the prevention and treatment of end-neuromas and details the principles of rehabilitation, prosthetic fitting, and occupational therapy for TMR patients. The book also describes transfer sensation and discusses the surgical and functional outcomes of the first several TMR patients. It concludes with emerging research on using TMR to further improve the function and quality of life for people with limb loss. With contributions from renowned leaders in the field, including Drs. Kuiken and Dumanian, this book is a useful guide to implementing TMR in patients with high-level upper limb amputations. It also supplies the foundation to enable improvements in TMR techniques and advances in prosthetic technology.

Epidemiology and Prevention of Vaccine-Preventable Diseases, 13th Edition E-Book John Wiley & Sons

Social factors, signals, and biases shape the health of our nation. In Perspectives on Health Equity and Social Determinants of Health, authors call for collective action across sectors to reverse the debilitating and often lethal consequences of health inequity.

Principles and Practice National Academy of Medicine That's how Wendell Potter introduced himself to a Senate committee in June 2009. He proceed to explain how insurance companies make promises they have no intention of keeping, how they flout regulations designed to protect consumers, and how they make it nearly impossible to understand information that the public needs. Potter quit his high-paid job as head of public relations at a major insurance corporation because he could no longer abide the routine practices of the insurance industry, policies that amounted to a death sentence for thousands of Americans every year. In Deadly Spin, Potter takes

readers behind the scenes of the insurance industry to show how a huge chunk of our absurd healthcare expenditures actually bankrolls a propaganda campaign and lobbying effort focused on protecting one thing: profits. With the unique vantage of both a whistleblower and a high-powered former insider, Potter moves beyond the healthcare crisis to show how public relations works, and how it has come to play a massive, often insidious role in our political process-and our lives. This important and timely book tells Potter's remarkable personal story, but its larger goal is to explain how people like Potter, before his change of heart, can get the public to think and act in ways that benefit big corporations-and the Wall Street money managers who own them.

Plunkett's Insurance Industry Almanac 2009: Insurance Industry Market Research, Statistics, Trends & Leading Companies CRC Press

Plunkett's Health Care Industry Almanac is the only complete reference to the American Health Care Industry and its leading corporations. Whatever your purpose for researching the health care field, you'll find this massive reference book to be a valuable guide. No other source provides this book's easy-to-understand comparisons of national health expenditures, emerging technologies, patient populations, hospitals, clinics, corporations, research, Medicare, Medicaid, managed care, and many other areas of vital importance. Included in the market research sections are dozens of statistical tables covering every aspect of the industry, from Medicare expenditures to hospital utilization, from insured and uninsured populations to revenues to health care expenditures as a percent of GDP. A special area covers vital statistics and health status of the U.S. population. The corporate analysis section features in-depth profiles of the 500 major for-profit firms (which we call "The Health Care 500") within the many industry sectors that make up the health care system, from the leading companies in pharmaceuticals to the major managed care companies. Details for each corporation include executives by title, phone, fax, website, address, growth plans, divisions, subsidiaries, brand names, competitive advantage and financial results. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

'My first serious blackout marked the line between sanity and insanity. Though I would have moments of lucidity over the coming days and weeks, I would never again be the same person ...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. Brain on Fire is Susannah's story of her terrifying descent into madness and the desperate hunt for a diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najar, finally proved - using a simple pen and paper - that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possession through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, Brain on Fire is a searingly personal yet universal book, which asks what happens when your identity is suddenly destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. Brain on Fire is a mesmerizing story' -Mira Bartók, New York Times bestselling author of The Memory Palace Susannah Cahalan is a reporter on the New York Post, and the recipient of the 2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in

the New York Times, and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites.
