This book traces the role of the UGTT (the Tunisian General Labour Union) during Tunisia's 2011 revolution and the transition period that ensued - Tunisia being the Arab country where trade unionism was the strongest and most influential in shaping the outcomes of the uprising. The UGTT; From its role as the cornerstone of the nationalist movement in the colonial era, has always had a key place in Tunisian politics: not so much a labour union but as an organisation that has always linked social struggles to political and national demands. Examining

the role played by the UGTT in Tunisia's revolution and more generally in the restructuring of the Tunisian political arena during the three years following the popular uprising. This book asks searching questions such as; how did UGTT interact with the popular uprising that led to the departure of Ben Ali? What was the role played by the UGTT in the "political transition" leading to the adoption on January 26, 2014 of the first democratic constitution in the country's history? How successful was the UGTT in neutralizing the risk of self-implosion caused by the different political and social crises? And what are the challenges that the UGTT faces in the new political landscape? This volume will be of key reading interest to scholars and researchers of social movements, labour movements, organizational studies, political transitions and Arab revolutions and also likely to be of interest to practitioners especially among activists, unionists and advocates within civil society.

The Leadership Pipeline Routledge

In this important work, Dr. Felipe Fierro offers a comprehensive view on the subject of Introduction to the Study of

Law, in which he revives the use of Gnoseology, Philosophy, History and Logic as Auxiliary Sciences; and exposes how the abandonment of such has contributed to the exponential growth of Skepticism and Relativism, currently prevailing in the legal world. The above, through extensive experience in teaching Law from the Aristotelian-Thomistic platform, based on the elementary assumption that we must first prove the existence of the object of study, and contrast main legal branches in topics such as: what is Law?, why is Science?, what are Law, Justice, Facultative rights and the Common Good?; supported by extensive and select bibliography. In addition, the being, nature, concept, essence and properties of the sources, fundamentals and classification are described. But important elements such as knowledge, order, principles, Jurisprudence, and Natural law, fundamental legal concepts, the legislative process, the Constitution, interpretation and others are not absent. Morality and Legal Law are obligatory markers, which although considered in their own field, are not excluded, but different as to object and method. Predominantly, Justice is exposed as one of the great values of the Law, and main theories in order to offer future lawyers the basis regarding the current Science of Law and its significance.
