Routledge
This book examines the gender dimensions of a wide array of national and international security challenges. The volume examines gender dynamics in ten issue areas in both the traditional and human security sub-fields: armed conflict, post-conflict, terrorism, military organizations, movement of people, development, environment,

humanitarian emergencies, human rights, governance. The contributions show how gender affects security and how security problems affect gender issues. Each chapter also examines a common set of key factors across the issue areas: obstacles to progress, drivers of progress and long-term strategies for progress in the 21st century. The volume develops key scholarship on the gender

dimensions of security challenges and thereby provides a foundation for improved strategies and policy directions going forward. The lesson to be drawn from this study is clear: if scholars, policymakers and citizens care about these issues, then they need to think about both security and gender. This will be of much interest to students of gender studies, security studies,

human security and International Relations in general.

A Comprehensive Empirical Study

Routledge

Originally published as: A companion to political geography.

Routledge Handbook of Environmental Displacement and Migration

Springer

This book is a collection of works written by young scientists involved in the Integrated Disaster Risk Research (IRDR).

Integrated

Research on Disaster Risk (IRDR) is a decade-long research programme co-sponsored by the International Science Council (merged by International Council for Science (ICSU), the International Social Science Council (ISSC), and the United Nations Office for Disaster Risk Reduction (UNDRR). It is a global, multi-disciplinary approach to dealing with the challenges brought by natural

disasters, mitigating their impacts, and improving related policy-making mechanisms. The book examines multidisciplinary research and actions related to disaster risk reduction internationally. The Integrated Research on Disaster Risk (IRDR) Young Scientists programme is:

- A sub-programme within IRDR which promotes capacity building of young professionals

and encourages them to undertake innovative and need-based research which makes science-policy and science-practice linkages stronger. • IRDR Young Scientists Programme was started in late 2016. Currently, it is a community of 115 young researchers from over 40 countries after 3 batches of application. • IRDR network and partners provide academic advice and training

courses, workshops, and programmes for IRDR young scientists. • IRDR young scientists contribute to innovative research in the field of disaster risk reduction and participate in conferences and/or social media as the ambassador of IRDR. The book is of interest to researchers and scholars in the field of governance of sustainability and environmental governance. Postgraduate

students will benefit this book within courses on environmental governance, on climate change governance, and on transformation and social change processes. Societal actors in climate change adaptation and other environmental governance fields on local, national, and international levels can benefit from the focus on societally relevant findings in the past 10 years of research on

adaptiveness. **Challenges and Opportunities** Routledge The Lake Chilwa Basin Climate Change Adaptation Programme was a seven-year research and development programme in Malawi that concluded in March 2017. The programme was designed to protect the livelihoods of the population and enhance resilience of the natural resource base upon which it depends. The Lake Chilwa

Basin is an important wetland ecosystem which is a designated Ramsar Site under the Ramsar Wetland Convention and a Man and Biosphere Reserve designated by UNESCO. This book provides a review of the research and programme interventions done based on the ecosystem approach (EA), a strategy for the integrated management of land, water and living resources. This is

designed to promote biodiversity conservation and sustainable use in an equitable way in its implementation of mitigation and climate change adaptation interventions. It is shown how: local and district institutions were strengthened to better manage natural resources and build resilience to climate change; cross-basin and cross-sector natural

resource management and planning for climate change throughout the Basin were built; household and enterprise adaptive capacity in Basin hotspots was built; and improved forest management and governance contributed in mitigating the effects of climate change. The study followed all the twelve key EA principles with involvement of all key stakeholders. It is one of the

first programmes to apply EA on such a wide temporal and spatial scale and provides key lessons to be learned for the protection of other fragile ecosystems in an era of climate change.

The Wiley Blackwell Companion to Political Geography
Springer Research, Action and Policy: Addressing the Gendered Impacts of Climate Change presents the voices of women from

every continent, women who face vastly different climate events and challenges. The book heralds a new way of understanding climate change that incorporates gender justice and human rights for all. **Local and Global Postcolonial Political Ecologies**
Springer Die Veränderung der Umwelt sowie der Klimawandel haben direkte und indirekte Auswirkungen

auf die Lebensgrundlagen und die Gesundheit von Menschen. Das Ziel der Studie ist es, die gesundheitlichen Folgen in Nepal durch die Veränderung der Umwelt und den Klimawandel aus einer Gender-Perspektive zu erforschen. Dabei kommt eine Kombination aus gender-, feministischen-, sozialökologischen sowie sozial-epidemiologischen Theorien zum Einsatz. Die Studie bedient sich eines Mixed-methods-Designs. Die Daten wurden mit Hilfe von Literaturbesprechungen, Diskussionsgruppen, Fragebögen, Interviews mit zentralen Akteuren wie Experten und Politikern, sowie Diskussionen mit Gemeindemitgliedern erhoben. Die Studie zeigt auf, dass das Verständnis über den Klimawandel je nach Region und Lebensmittelpunkt unterschiedlich ist. Zudem wird das Verständnis durch soziokulturelle Faktoren wie Geschlecht, Ethnizität und Alter beeinflusst. Die Analyse von qualitativen und quantitativen Daten zeigt Differenzen im Zugang und in der Kontrolle von gesundheitsschützenden Ressourcen, der Teilhabe an politischen Prozessen sowie eine höhere Arbeitsbelastung von

<p>Frauen, wodurch diese einem größeren Risiko bezüglich Umweltveränderungen und des Klimawandels ausgesetzt sind.</p> <p><i>Engendering Climate Change</i> Routledge <i>Engendering Climate Change</i> Learnings from South Asia Taylor & Francis <u>The Ecolaboratory</u> Springer This book explores how climate institutions in industrialized countries work</p>	<p>to further the recognition of social differences and integrate this understanding in climate policy making. With contributions from a range of expert scholars in the field, this volume investigates policy-making in climate institutions from the perspective of power as it relates to gender. It also considers other intersecting social factors at different levels of governance,</p>	<p>from the global to the local level and extending into climate-relevant sectors. The authors argue that a focus on climate institutions is important since they not only develop strategies and policies, they also (re)produce power relations, promote specific norms and values, and distribute resources. The chapters throughout draw on examples from various institutions including</p>
---	--	--

national ministries, transport and waste management authorities, and local authorities, as well as the European Union and the UNFCCC regime. Overall, this book demonstrates how feminist institutionalist theory and intersectionality approaches can contribute to an increased understanding of power relations and social differences in climate policy-making and in climate-

relevant sectors in industrialized states. In doing so, it highlights the challenges of path dependencies, but also reveals opportunities for advancing gender equality, equity, and social justice. *Gender, Intersectionality and Climate Institutions in Industrialized States* will be of great interest to students and scholars of climate politics, international relations, gender

studies and policy studies. *Confronting Climate Change in Bangladesh* Routledge Approaching the issues of climate change and climate justice from a range of diverse perspectives including those of culture, gender, indigeneity, race, and sexuality, as well as challenging colonial histories and capitalist presents, *Climate Futures* boldly addresses the apparent

inevitability of climate chaos. Seeking better explanations of the underlying causes and consequences of climate change, and mapping strategies toward a better future, or at a minimum, the most likely best-case world that we can get to, this book envisions planetary social movements robust enough to spark the necessary changes needed to achieve deeply

sustainable and just economic, social, and political policies and practices. Bringing together insights from interdisciplinary scholars, policymakers, creatives and activists, *Climate Futures* argues for the need to get past us-and-them divides and acknowledge how lives of creatures far and near, human and non-human, are interconnected. *The Hindu*

Kush Himalaya Assessment Engendering Climate Change Learnings from South Asia The archaeologies of food and warfare have independently developed over the past several decades. This volume aims to provide concrete linkages between these research topics through the examination of case studies worldwide. Topics considered within the

book include: the impacts of warfare on the daily food quest, warfare and nutritional health, ritual foodways and violence, the provisioning of warriors and armies, status-based changes in diet during times of war, logistical constraints on military campaigns, and violent competition over subsistence resources. The diversity of perspectives included in this volume may be a product of new ways of

conceptualizing violence—not simply as an isolated component of a society, nor as an attribute of a particular societal type—but instead as a transformative process that is lived and irrevocably alters social, economic, and political organization and relationships. This book highlights this transformative process by presenting a cross-cultural perspective on the connection between war

and food through the inclusion of case studies from several continents.

Re-imagining Global Climate Justice

Routledge
This Handbook maps the expanding field of gender and EU politics, giving an overview of the fundamentals and new directions of the sub-discipline, and serving as a reference book for (gender) scholars and students at different

levels interested in the EU. In investigating the gendered nature of European integration and gender relations in the EU as a political system, it summarizes and assesses the research on gender and the EU to this point in time, identifies existing research gaps in gender and EU studies and addresses directions for future research. Distinguished contributors from the US, the UK and

continental Europe, and from across disciplines from political science, sociology, economics and law, expertly inform about gender approaches and summarize the state of the art in gender and EU studies. The Routledge Handbook of Gender and EU Politics provides an essential and authoritative source of information for students, scholars and researchers in EU studies/

politics, gender studies/ politics, political theory, comparative politics, international relations, political and gender sociology, political economy, European and legal studies/ law.

A Political Ecology of Women, Water and Global Environmental Change

Routledge
This handbook provides a comprehensive overview of feminist approaches to

questions of violence, justice, and peace. The volume argues that critical feminist thinking is necessary to analyse core peace and conflict issues and is fundamental to thinking about solutions to global problems and promoting peaceful conflict transformation. Contributions to the volume consider questions at the intersection of feminism, gender, peace, justice, and violence through interdisciplinary perspectives. The handbook engages with multiple feminisms, diverse policy concerns, and works with diverse theoretical and methodological contributions. The volume covers the gendered nature of five major themes:

- Methodologies and genealogies (including theories, concepts, histories, methodologies)
- Politics, power, and violence (including the ways in which violence is created, maintained, and reproduced, and the gendered dynamics of its instantiations)
- Institutional and societal interventions to promote peace (including those by national, regional, and international organisations, and civil society or informal groups/bodies)
- Bodies,

<p>sexualities, and health (including sexual health, biopolitics, sexual orientation) • Global inequalities (including climate change, aid, global political economy). This handbook will be of great interest to students of peace and conflict studies, security studies, feminist studies, gender studies, international relations, and politics. <i>Climate Futures</i></p>	<p>Langaa RPCIG This authored book assesses the spatial patterns of climate change and gender inequalities across the Global South, and analyzes the disproportionate impacts that climate change processes have on women in these regions. Though many books attempt to incorporate gender issues into climate change, this book examines the issue as a whole by addressing</p>	<p>the relationship between climate change and gender from a number of perspectives. The book incorporates case studies from various regions of the Global South, a designation broadly defined as the countries of Africa, Middle and South America, and most of Asia including the Middle East. In the book's two main sections, readers will learn about how climate change affects access to regional</p>
---	---	---

opportunities and resources, the obstacles created by climate change that affect women more strongly than men, and how affected female populations adapt to changing conditions and protect their local livelihoods. Section one, covering chapters 1 and 2, addresses the spatial patterns of climate change and gender inequalities/in-equities across the Global South

by analyzing long-term trends from the latest reports of the Intergovernmental Panel on Climate Change (IPCC) and the World Economic forum. Section two, covering chapters 3 through 7, discusses the critical issues related to climate change and gender inequality, and presents literature reviews and case studies in the Global South. The different issues and perspectives discussed

include health, water and food security, education, conflicts, migration, participation in decision-making processes, and changing urban social landscapes. The concluding chapter discusses policy initiatives and makes recommendations to some of the gender mainstreaming through empowerment and participation. This interdisciplinary book will appeal to

academics and policy-makers beyond just the fields of environmental sciences and gender studies, and may be adopted as a resource for graduate students and researchers.

Discourses, Policies and Practices

Taylor & Francis
This book focuses on the gendered experiences of environmental change across different geographies and social contexts in South Asia and on diverse

strategies of adapting to climate variability. The book analyzes how changes in rainfall patterns, floods, droughts, heatwaves and landslides affect those who are directly dependent on the agrarian economy. It examines the socio-economic pressures, including the increase in women's work burdens both in production and reproduction on gender relations. It

also examines coping mechanisms such as male migration and the formation of women's collectives which create space for agency and change in rigid social relations. The volume looks at perspectives from India, Pakistan, Bangladesh and Nepal to present the nuances of gender relations across borders along with similarities and differences across geographical,s

ocio-cultural and policy contexts. This book will be of interest to researchers and students of sociology, development, gender, economics, environmental studies and South Asian studies. It will also be useful for policymakers, NGOs and think tanks working in the areas of gender, climate change and development. Environmental Governance and Economic Development in Costa Rica Springer

This edited volume explores how a feminist political ecology framework can bring fresh insights to the study of rural and urban livelihoods dependent on vulnerable rivers, lakes, watersheds, wetlands and coastal environments. Bringing together political ecologists and feminist scholars from multiple disciplines, the book develops solution-oriented

advances to theory, policy and planning to tackle the complexity of these global environmental changes. Using applied research on the contemporary management of groundwater, springs, rivers, lakes, watersheds and coastal wetlands in Central and South Asia, Northern, Central and Southern Africa, and South and North America, the authors draw on a variety of methodologica

I perspectives and new theoretical approaches to demonstrate the importance of considering multiple layers of social difference as produced by and central to the effective governance and local management of water resources. This unique collection employs a unifying feminist political ecology framework that emphasizes the ways that gender interacts with other social and geographical locations of water resource users. In doing so, the book further questions the normative gender discourses that underlie policies and practices surrounding rural and urban water management and climate change, water pollution, large-scale development and dams, water for crop and livestock production and processing, resource knowledge and expertise, and critical livelihood studies. This book will be of interest to students and scholars of environmental studies, development studies, feminist and environmental geography, anthropology, sociology, environmental philosophy, public policy, planning, media studies, Latin American and other area studies, as well as women's and gender studies. Climate

Change and
the
Humanities

Oxford
University
Press

The term "climate justice" began to gain traction in the late 1990s following a wide range of activities by social and environmental justice movements that emerged in response to the operations of the fossil fuel industry and, later, to what their members saw as the failed global climate governance model that became so

transparent at COP15 in Copenhagen.

The term continues to gain momentum in discussions around sustainable development, climate change, mitigation and adaptation, and has been slowly making its way into the world of international and national policy.

However, the connections between these remain unestablished. Addressing the need for a comprehensive and integrated

reference compendium, The Routledge Handbook of Climate Justice provides students, academics and professionals with a valuable insight into this fast-growing field. Drawing together a multidisciplinary range of authors from the Global North and South, this Handbook addresses some of the most salient topics in current climate justice research,

including just transition, urban climate justice and public engagement, in addition to the field's more traditional focus on gender, international governance and climate ethics. With an emphasis on facilitating learning based on cutting-edge specialised climate justice research and application, each chapter draws from the most recent sources, real-world best practices and

tutored reflections on the strategic dimensions of climate justice and its related disciplines. The Routledge Handbook of Climate Justice will be essential reading for students and scholars, as well as being a vital reference tool for those practically engaged in the field. **Climate Urbanism** Routledge "Urban Climate Change Research Network, Center for Climate

Systems Research, Earth Institute, Columbia University." **Climate Hazards, Disasters, and Gender Ramifications** Zed Books Ltd. This book considers the gendered dimensions of climate change. It shows how gender analysis has been widely overlooked in debates about climate change and its interactions with poverty and demonstrates its importance

for those seeking to understand the impacts of global environmental change on human communities. Gender, Development, and Climate Change Nomos Verlag Globally climate-induced disasters have been impacting marginalised communities' lives, livelihood and gendered relations. This book explores the effects of Cyclone Aila (as a result of climate change) in

2009 on the rural livelihoods and gendered relations of two ethnically distinct forest communities – Munda, an indigenous group, and Shora, a Muslim group – dwelling near the Sundarbans Forest in Bangladesh. Examining the cyclone's medium- to long-term impacts on livelihoods and comparative aspects of gendered relations between these two contrasting

communities, this book addresses a gap in current critical development studies. It adopts an ethnographic research design and analyses the alterations to livelihood activities and reconfiguration of gender relations within the Munda and Shora communities since 2009. The study primarily contends that post-Aila, livelihoods and gendered relations have been substantially

transformed in both communities, making the case that the improvement of local infrastructure, as an important part of the geographical location, has noticeably progressed the living conditions and livelihoods of some members of the Munda and Shora communities. Connecting climate-induced changes with the construction and alteration of gendered livelihood

patterns, the book will be of interest to a wide range of academics in the fields of Asian Studies, Sociology of Environment, Social Anthropology, Human Geography, Gender and Cultural Studies, Human Geography, Disaster Management and Forestry and Environmental Science. *A Critical Approach to Climate Change Adaptation* Edward Elgar Publishing
Despite the

clear link between climate change and human rights with the potential for virtually all protected rights to be undermined as a result of climate change, its catastrophic impact on human beings was not really understood as a human rights issue until recently. This book examines the link between climate change and human rights in a comprehensive manner. It looks at

human rights approaches to climate change, including the jurisprudential bases for human rights and the environment, the theoretical framework governing human rights and the environment, and the different approaches to this including benchmarks. In addition to a discussion of human rights implications of international environmental law principles in the climate change regime, the book explores how the human rights framework can be used in relation to mitigation, adaption, and adjudication. Other chapters examine how vulnerable groups -women, indigenous peoples and climate "refugees" - would be disproportionately affected by climate change. The book then goes on to discuss a new category of people created by climate change, those who will be rendered stateless as a result of states disappearing and displaced by climate change, and whether human rights law can adequately address these emerging issues.
