Study Skills for Successful Students Stylus Publishing, LLC

'This is an essential guide for anyone aspiring to teach in Higher Education in the UK. Not just because it is packed with practical tips and even lecture notes but crucially because it explains the nature of university teaching in the wake of the 'widening participation' agenda... In summary this book is well worth reading' - Educate Journal This is a book for tutors, lecturers and teachers in further and higher education, who need to teach their students how to study, learn and communicate effectively. Based around the same techniques and contents as Tom and Sandra's book *Essential Study Skills*, which is itself based on many years experience of teaching and mentoring students in higher education, this book is intended to work with traditional and non-traditional students. The material will be suitable for institutions concerned with widening participation; with student retention; with quality enhancement; with equal opportunities and with professional and staff development. SAGE Study Skills are essential study guides for students of all levels. From how to write great essays and succeeding at university, to writing your undergraduate dissertation and doing postgraduate research, SAGE Study Skills help you get the best from your time at university. Visit the SAGE Study Skills website for tips, quizzes and videos on study success!

Teaching Study Skills and Strategies in Grades 4-8 Allen & Unwin

This highly practical resource has been designed to support professionals working with students who have SLCN (Speech, Language and Communication Needs) following a mainstream educational curriculum. Structured as a flexible 10-session programme, it takes a holistic approach to learning, encouraging students to take an active role in their studies by identifying individual learning strengths and building a "toolbox" of successful strategies for revision. With photocopyable pages and downloadable resources, the advice and skills explored in this programme can be adapted to suit students with a range of abilities and incorporated into a timetable that can be used flexibly, over as many weeks as necessary, with very little planning required. Sessions focus on: Learning about revision and study methods, using a combination of visual, auditory and kinaesthetic techniques Creating a study skills folder and revision timetable Teaching command words (words used in exam questions) and exam preparation Building healthy study habits and managing anxiety Being proud of achievements and

developing self esteem Setting goals and becoming independent Created to support a range of students, including those with a known diagnosis of autism, developmental language disorder, dyslexia, dyspraxia and attention deficit hyperactivity disorder, this is an invaluable resource for all professionals looking to support young adults in the build up to exams.

Miriam, a freshman Calculus student at Louisiana State University, made 37.5% on her first exam but 83% and 93% on the next two. Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of

students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.
