Finally, A Leg To Stand On**

Vintage  
From the best-selling author of *Gratitude* and *On the Move*, a final volume of essays that showcase Sacks's broad range of interests--from his passion for ferns, swimming, and horsetails, to his final case histories exploring schizophrenia, dementia, and Alzheimer's. Oliver Sacks, scientist and storyteller, is beloved by readers for his neurological case histories and his fascination and familiarity with human behavior at its most unexpected and unfamiliar. *Everything in Its Place* is a celebration of Sacks's myriad interests, told with his characteristic compassion and erudition, and in his luminous prose.

When Colleen Haggerty lost her leg in an accident during her senior year of high school, she could have retreated from life and let her disability become her defining quality—and no one would have blamed her for it. Instead, she went the opposite way. In the years following her accident, Haggerty explored her

physical world with vigor, testing the limits of her body by joining a ski team, playing with a co-ed soccer team, and taking up kayaking and backpacking. She also tested the limits of her heart, pursuing love and passion with restless men. In *A Leg to Stand On*, Haggerty recounts her life as a disabled woman, from redefining herself as a young woman after tragedy—fierce and able, but haunted by hard choices and suppressed grief—to choosing marriage and motherhood. That choice comes at great cost to the physical freedom Haggerty has fought for, but ultimately she redemption, fulfillment, and self-acceptance in the bargain. No one will read this book without being inspired to accept their past and create the future they always wanted.

**The Lost Platoon Book One**

She Writes Press  
"The Secret Sharer" takes place on a sailing ship in the Gulf of Siam (now the Gulf of Thailand), at the start of a voyage with cargo for Britain. The date is probably in the 1880s, when Conrad was at sea himself. In common with many of Conrad's stories, it is narrated in the first person. The narrator is

the ship's young captain, whose name is never given. He is unfamiliar with both his ship and his crew, having joined the ship only a fortnight earlier, and unsure of his ability to exert his authority over the officers and crew who have been together for some time. He makes the point several times that he is the "stranger" on board. After being towed downriver (presumably from Bangkok) by a steam tug, the ship is left at anchor near a group of small barren islands a few miles off shore, waiting for wind to begin its voyage. An incoming ship is anchored similarly a couple of miles away, awaiting a tug to go upriver. That night, the captain, being restless, unusually takes the watch. As the only man on deck in the small hours of the morning, he sees that a man has swum up to the ship's side. The naked swimmer is hesitant to talk or come on board, but seems pleased to discover he is speaking to the captain. Once on board, the man introduces himself as Leggatt and he and the captain find a natural rapport, almost as if Leggatt were the captain's other self, especially as the captain

has now fetched some of his own clothes for Leggatt to wear. Still on deck, Leggatt explains that he was the First Mate of the other ship, but was placed under arrest after being accused of murdering a crew member. The victim was a disobedient bully. During a storm which nearly sank their ship on their voyage here, Leggatt was physically wrestling with the man to make him to pull a rope when a freak wave threw them both against a bulwark and the man was killed. Leggatt, a "stranger" on the other ship just as the captain is on his, would certainly face the gallows on landing. However, he escaped his locked cabin and swam between islands to reach the narrator's ship. Though the captain could, and by all the rules should, arrest Leggatt, he instead leads him to concealment in his cabin. The captain has no plan yet, and hiding Leggatt seems impossibly difficult, given that his cabin is regularly serviced by his steward, the problem of food, a captain's movements being conspicuous to all, and the long voyage ahead. In the morning the captain of Leggatt's ship arrives by boat to inquire

if the escapee has been sighted. Our captain, not a natural liar, manages to bluff through, but is left terrified as to what his own officers make of his strained behavior....

Customized for the Salem Volcanoes (Minor League Team in Salem Oregon) This book gets rid of all the myths and misunderstandings of the baseball swing. For the first time in 120 years of baseball, we now fully understand the swing from a precise analytical perspective - - and here it is! There are two books: Book 1 (this book) is the stand-alone manual written specifically (in baseball language) for fans, ballplayers, and coaches of all levels, including Little League coaches and their dads. It

carefully walks you through the swing telling you what is happening, how, and why. It's unlike anything you have ever seen in the baseball literature. You'll be amazed. For FANS, certain chapters are written specifically for you, so you (1) know what to watch for during a game; (2) how to classify batters into different styles; and (3) the final chapter describes the styles of different Home Run Kings from Babe Ruth to Barry Bonds. You'll learn lots and enjoy the game that much more. Book 2 is Technical Supplements, which are referenced in Book 1, with lots of graphs and tables - - based on our computer model which exactly matches the swing. Book 2 is for coaches, trainers, weight trainers, as well as teachers and students of the swing. Perfect for a college course!

In his most extraordinary book, the bestselling author of *Awakenings* and "poet laureate of medicine" (The New York Times) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to

recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks's *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks's splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine's ultimate responsibility: "the suffering, afflicted, fighting human subject." *Chirps, Quirks, and Stories of 100 Birds from the Popular Public Radio Show* Sasquatch Books

Dr. Oliver Sacks's books *Awakenings*, *An Anthropologist on Mars*, and the bestselling *The Man Who Mistook His Wife for a Hat* have been acclaimed for their extraordinary compassion in the treatment of

patients affected with profound disorders. In *A Leg to Stand On*, it is Sacks himself who is the patient: an encounter with a bull on a desolate mountain in Norway has left him with a severely damaged leg. But what should be a routine recuperation is actually the beginning of a strange medical journey when he finds that his leg uncannily no longer feels like part of his body. Sacks's brilliant description of his crisis and eventual recovery is not only an illuminating examination of the experience of patienthood and the inner nature of illness and health but also a fascinating exploration of the physical basis of identity. This 1984 classic is now available in an expanded edition with a new foreword, written by Kate Edgar, executive director of the Oliver Sacks Foundation.

*Madame Bovary* is the French writer Gustave Flaubert's debut novel. The story focuses on a doctor's wife, Emma Bovary, who has adulterous affairs and lives beyond her means in order to escape the banalities and emptiness of provincial life. Though

the basic plot is rather simple, even archetypal, the novel's true art lies in its details and hidden patterns. Flaubert was a notorious perfectionist and claimed always to be searching for *le mot juste* ("the precise word"). *Madame Bovary* takes place in provincial northern France, near the town of Rouen in Normandy. The story begins and ends with Charles Bovary, a stolid, kindhearted man without much ability or ambition. Gustave Flaubert (1821-1880) was an influential French writer who was perhaps the leading exponent of literary realism of his country. The celebrated short story writer Maupassant was a protégé of Flaubert.

Losing a limb will impact every aspect of a person's life. This book describes the emotional process that a person may experience in adjusting to limb loss. Based on the author's own story and professional experience, it also includes input from many other amputees.

Dee Malchow is an amputation nurse specialist who underwent a below knee amputation at age 19 from a boating accident. Since then Dee has interacted with over 3000 amputees through her job, skiing, soccer, mission work in Sierra Leone, and prosthetic research. She received her Bachelor's and Master's Degree in

Nursing at the University of Washington. Dee is married to Jim Malchow and lives north of Seattle, Washington. They have two grown married children who have provided them with eight delightful grandchildren. See more at <http://deemalchow.weebly.com>

"Dee Malchow, RN writes with wisdom, emotion and incredible insight. Her book, based on her own experience, and in providing care and support to thousands of others with limb loss, provides help and guidance to those with amputation. As an Orthopaedic Surgeon, who has worked closely with Dee over the years, I continue to learn from her about how individuals cope, heal, struggle, and succeed. She has certainly taught me more than anyone else about being 'Alive and Whole.'" Douglas G Smith, MD, Professor of Orthopaedic Surgery, University of Washington

Sydney West enjoys

sampling summer boys,

but this year, one refuses to be a one-night stand...

Twenty-one-year-old

Sydney doesn't believe in relationships. Her parents'

toxic divorce has taught

her love is nothing but a

sinister fairytale. So every summer she parties,

hooks up, abandons her

lover before dawn, and

repeats. That is until she

meets gorgeous local

surfer Jason King at the

beach... When Jason fails

to flirt-or even give her a

second glance-she

decides something must

be wrong with him, and

it's safer to stay away. But when Sydney and Jason's best friends hook up and become Malibu's hottest couple, they are forced to spend more time together than either of them cares for. Armed with a sharp tongue, Sydney works to keep Jason at bay... In a moment of weakness, Sydney lets her guard down and confides in Jason, realizing he's more than just a hot guy—he's also a friend. And when Sydney's need for a summer boy results in her falling into bed with Jason, despite her better judgment, she runs away from him by morning. The problem is, he won't accept being another one-night stand, and will do anything to prove... Love really does exist.

This book tells the story of one man's journey from happiness to despair and back again. At thirty-two and at the peak of health, D.D. Mayers lived in a Kenyan paradise with his beautiful wife. Then tragedy struck; an accident left him

paralysed from the waist down, destined to spend the rest of his life in a wheelchair. Mayers takes the reader on an emotional yet witty and amusing tour of his life, guiding us from his childhood (and the 'pointless' schooling he receives) through to his emergence as a young man who somehow finds himself earning money as a professional actor. One role takes him to Kenya, where we meet his wonderful wife, and we join the two for a trip through the Middle East, many years before war ravaged much of its warmth and beauty. After moving to London for a number of years, the couple return to Kenya - only for them to experience a life-changing event. The gripping storytelling throughout the book takes us from the author's despair and feelings of worthlessness all the way through to a final, peaceful contentment. You will laugh and you will cry - but you won't be able to put the book down.

In essence, this story is about how a certain person was searching his bookshelf for something to read and in the end

found a book, which turned out to be the source, from which it is possible to obtain absolutely any kind of information about absolutely any person. Meaning, information to the smallest particulars and details about what his or her qualities of personality are, how he or she lives, what he or she really wants to achieve, what he or she hides, and much more. And, it does not matter, if the subject is some person, who lived in the distant past or lives in the present or someone, who will live in the future. Since, as it turned out later on, this literary monument is nothing other than the Catalog of human population. In other words, the encyclopedia of Homo sapiens; in essence, the same as encyclopedias, reference books for specialists, which contain complete information about representatives of a particular subspecies of animals, plants, etc. Although at some point, the course of this story turned banal: "bad guys" from security services, intelligence services, politics decided to not only use this source of knowledge for their dirty deeds, but also to

appropriate it solely for their personal use. And, the way they tried to do this is also banal: by physically destroying the author of discovery of the Catalog of human population and all of his colleagues. However, the ending of this story makes it stand out from the category of ordinary spy stories. At least because the main characters of this story managed to survive not due to favorable concatenation of circumstances or someone's help, but thanks to that knowledge, which they discovered in the ancient text, which turned out to be the Catalog of human population. Of course, such an outcome upset and continues to upset not only the Russian special services, but also all those people in whose way developers of the Catalog of human population got. And, in this civilization, there are countless numbers of such people: from psychologists (who become no longer needed by anyone) to organizers of this civilization themselves. Since from the standpoint of the Catalog of human population—technogenic civilization without a human, which they

lovingly built for many centuries, is simply trash, to put it mildly, and beneath all criticism. And, they themselves are also trash. However, regular people, who (thanks to the scientific discovery made by Andrey Davydov) got the source with answers to all of their questions and individual recipes, now no longer need to pay "experts on the human soul" for being shamelessly fooled. Therefore, whoever tries to kill developers of the Catalog of human population in the future must know that it is no longer possible, as they already became part of history of humanity. After all, at the current stage of development, a Homo sapiens has only one possibility to continue to live after death, to live through the ages: in the product that he/she created. And, those, who tried and continue to try to kill them, were nobodies and will remain nobodies, who one day will cease to exist without leaving a trace. As for organizers of this "civilization"—maybe instead of trying to find new recipes to destroy "excess billions" and trying to examine human potential using Neanderthal methods, it

would be more reasonable not only to find out the recipe of how to make Homo sapiens a 100% controllable producer and consumer from the source (which, by the way, seems to have been left to humanity by creators of nature and a human on this planet), but also how to build a civilization without quotes? After all, it only seems to them that they are the main deceivers, while in reality they were fooled, and fooled majorly.

Like *The Man Who Mistook His Wife for a Hat*, this is a fascinating voyage into a strange and wonderful land, a provocative meditation on communication, biology, adaptation, and culture. In *Seeing Voices*, Oliver Sacks turns his attention to the subject of deafness, and the result is a deeply felt portrait of a minority struggling for recognition and respect—a minority with its own rich, sometimes astonishing, culture and unique visual language, an extraordinary mode of communication that tells us much about the basis of language in hearing people as well. Seeing

Voices is, as Studs Terkel has written, "an exquisite, as well as revelatory, work."
