BRENNAN AVILA*Information or Disinformation?* Springer

This open access book was prepared as a Final Publication of the COST Action IC1406 "High-Performance Modelling and Simulation for Big Data Applications (cHiPSet)" project. Long considered important pillars of the scientific method, Modelling and Simulation have evolved from traditional discrete numerical methods to complex data-intensive continuous analytical optimisations. Resolution, scale, and accuracy have become essential to predict and analyse natural and complex systems in science and engineering. When their level of abstraction raises to have a better discernment of the domain at hand, their representation gets increasingly demanding for computational and data resources. On the other hand, High Performance Computing typically entails the effective use of parallel and distributed processing units coupled with efficient storage, communication and visualisation systems to underpin complex data-intensive applications in distinct scientific and technical domains. It is then arguably required to have a seamless interaction of High Performance Computing with Modelling and Simulation in order to store, compute, analyse, and visualise large data sets in science and engineering. Funded by the European Commission, cHiPSet has provided a dynamic trans-European forum for their members and distinguished guests to openly discuss novel perspectives and topics of interests for these two communities. This cHiPSet compendium presents a set of selected case studies related to healthcare, biological data, computational advertising, multimedia, finance, bioinformatics, and telecommunications.

Marketing Strategy Walter de Gruyter GmbH & Co KG

Academic and industrial research around polymer-based colloids is huge, driven both by the development of mature technologies, e.g. latexes for coatings, as well as the advancement of new materials and applications, such as building blocks for 2D/3D structures and medicine. Edited by two world-renowned leaders in polymer science and engineering, this is a fundamental text for the field. Based on a specialised course by the editors, this book provides the reader with an invaluable single source of reference.

The first section describes formation, explaining basic properties of emulsions and dispersion polymerization, microfluidic approaches to produce polymer-based colloids and formation via directed self-assembly. The next section details characterisation methodologies from microscopy and small angle scattering, to surface science and simulations. The final chapters close with applications, including Pickering emulsions and molecular engineering for materials development. A comprehensive guide to polymer colloids, with contributions by leaders in their respective areas, this book is a must-have for researchers and practitioners working across polymers, soft matter and chemical and molecular engineering.

Future Prospects for Food and Feed Security "O'Reilly Media, Inc."

The Perfect Slime presents the latest state of knowledge and all aspects of the Extracellular Polymeric Substances, (EPS) matrix - from the ecological and health to the antifouling perspectives. The book brings together all the current material in order to expand our understanding of the functions, properties and characteristics of the matrix as well as the possibilities to strengthen or weaken it. The EPS matrix represents the immediate environment in which biofilm organisms live. From their point of view, this matrix has paramount advantages. It allows them to stay together for extended periods and form synergistic microconsortia, it retains extracellular enzymes and turns the matrix into an external digestion system and it is a universal recycling yard, it protects them against desiccation, it allows for intense communication and represents a huge genetic archive. They can remodel their matrix, break free and eventually, they can use it as a nutrient source. The EPS matrix can be considered as one of the emergent properties of biofilms and are a major reason for the success of this form of life. Nevertheless, they have been termed the "black matter of biofilms" for good reasons. First of all: the isolation methods define the results. In most cases, only water soluble EPS components are investigated; insoluble ones such as cellulose or amyloids are much less included. In particular in environmental biofilms with many species, it is difficult to impossible isolate, separate the various EPS molecules they are encased in and to define which species produced which EPS. The regulation and the factors which trigger or inhibit EPS production are still very poorly

understood. Furthermore: bacteria are not the only microorganisms to produce EPS. Archaea, Fungi and algae can also form EPS. This book investigates the questions, What is their composition, function, dynamics and regulation? What do they all have in common?

The Year in Trade IWA Publishing

This second edition of An Engineer's Guide to Automated Testing of High-Speed Interfaces provides updates to reflect current state-of-the-art high-speed digital testing with automated test equipment technology (ATE). Featuring clear examples, this one-stop reference covers all critical aspects of automated testing, including an introduction to high-speed digital basics, a discussion of industry standards, ATE and bench instrumentation for digital applications, and test and measurement techniques for characterization and production environment. Engineers learn how to apply automated test equipment for testing high-speed digital I/O interfaces and gain a better understanding of PCI-Express 4, 100Gb Ethernet, and MIPI while exploring the correlation between phase noise and jitter. This updated resource provides expanded material on 28/32 Gbps NRZ testing and wireless testing that are becoming increasingly more pertinent for future applications. This book explores the current trend of merging high-speed digital testing within the fields of photonic and wireless testing.

Artificial Intelligence and International Economic Law Thomson South-Western

This open access book provides insight into the implementation of Life Cycle approaches along the entire business value chain, supporting environmental, social and economic sustainability related to the development of industrial technologies, products, services and policies; and the development and management of smart agricultural systems, smart mobility systems, urban infrastructures and energy for the built environment. The book is based on papers presented at the 8th International Life Cycle Management Conference that took place from September 3-6, 2017 in Luxembourg, and which was organized by the Luxembourg Institute of Science and Technology (LIST) and the University of Luxembourg in the framework of the LCM Conference Series.

World Development Report 2020 World Bank Publications
Artificial intelligence (AI) technologies are transforming

economies, societies, and geopolitics. Enabled by the exponential increase of data that is collected, transmitted, and processed transnationally, these changes have important implications for international economic law (IEL). This volume examines the dynamic interplay between AI and IEL by addressing an array of critical new questions, including: How to conceptualize, categorize, and analyze AI for purposes of IEL? How is AI affecting established concepts and rubrics of IEL? Is there a need to reconfigure IEL, and if so, how? Contributors also respond to other cross-cutting issues, including digital inequality, data protection, algorithms and ethics, the regulation of AI-use cases (autonomous vehicles), and systemic shifts in e-commerce (digital trade) and industrial production (fourth industrial revolution). This title is also available as Open Access on Cambridge Core.

A Guide for Small and Medium-sized Exporters Frontiers Media SA

The 2021 edition looks into the latest trends in global trade, with an in-depth analysis of trade in goods and services and in value-added terms. It points to the major changes in recent years, highlighting the leading traders, the best-performing regions, the most traded goods and services, and the performance of least-developed countries. The publication also looks into the impact of COVID-19 on global trade and the outlook for 2021. In an introduction to the publication, Director-General Roberto Azevêdo says: "The WTO plays a critical role in compiling and analysing trade data. While the ongoing pandemic represents a dramatic break with nearly all recent economic trends, the fact remains that patterns in global trade offer useful insights for what the future may hold." The report looks into the shifting patterns in global trade across a range of sectors, pinpointing areas that have seen major changes in recent years. These include trade in renewable energy goods, such as solar panels and electric cars, and trade in plastics. It also focuses on the impact of trade tensions in sectors such as iron and steel and the effects of the COVID-19 pandemic in areas such as tourism. The report's analytical chapters are complemented by 65 tables providing a detailed breakdown of various aspects of merchandise trade and trade in commercial services. The merchandise trade data in the report was compiled in collaboration with the United Nations Conference on Trade and Development (UNCTAD) while commercial services data was jointly produced with UNCTAD and

the International Trade Centre (ITC) in cooperation with the United Nations Statistics Division.

Beef Products : Raw, Processed, Prepared Artech House

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Preventing Tobacco Use Among Youth and Young Adults A Report of the Surgeon General

World Investment Report 2020 Simon & Schuster Books For Young Readers

A pragmatic, common sense approach to the detection, evaluation and management of breast diseases and related imaging findings! The fourth edition of this best selling "how-to" book includes major revisions, including the expansion of the screening mammography and breast MRI chapters, as well as the addition of digital breast tomosynthesis studies. Rather than having selected cropped images, the print and online versions of this book provide the reader with thousands of high quality images and complete imaging evaluations, from the screening images to the diagnostic mammogram, and—when appropriate—images from ultrasound, MRI, imaging guided biopsy, and preoperative wire localizations. Bulleted "key-facts" describe clinical, imaging and histological findings for a spectrum of breast diseases. With this book, breast-imaging radiologists are strongly encouraged to provide clinical, imaging and pathology concordance for optimal patient care, as well as direct and clinically relevant communication with providers and patients.

International Production Beyond the Pandemic United Nations Publications

In today's digital age, online and mobile advertising are of growing importance, with advertising no longer bound to the traditional media industry. Although the advertising industry still has broader access to the different measures and channels, users and consumers today have more possibilities to publish, get informed or communicate – to "co-create" –, and to reach a bigger audience. There is a good chance thus that users and consumers are better informed about the objectives and persuasive tricks of the advertising industry than ever before. At the same time, advertisers can inform about products and services without the limitations of time and place faced by traditional mass media. But will there really be a time when advertisers and consumers have equal power, or does tracking users online and offline lead to a situation where advertisers have more information about the consumers than ever before? The volume discusses these questions and related issues.

Learn how to perform data analysis with the R language and software environment, even if you have little or no programming experience. With the tutorials in this hands-on guide, you'll learn how to use the essential R tools you need to know to analyze data, including data types and programming concepts. The second half of Learning R shows you real data analysis in action by covering everything from importing data to publishing your results. Each chapter in the book includes a quiz on what you've learned, and concludes with exercises, most of which involve writing R code. Write a simple R program, and discover what the language can do Use data types such as vectors, arrays, lists, data frames, and strings Execute code conditionally or repeatedly with branches and loops Apply R add-on packages, and package your own work for others Learn how to clean data you import from a variety of sources Understand data through visualization and summary statistics Use statistical models to pass quantitative judgments about data and make predictions Learn what to do when things go wrong while writing data analysis code *Trip Generation Analysis* Harvard Business Review Press Gynecologic and obstetric surgery is a craft that requires sound knowledge and skills. The specifics of each individual case must be understood to enable the best surgical management approach

and to minimize complications. This resource book offers insightful management options to many of the challenges a gynecologic or obstetric surgeon may face before, during and after an operation. Divided into two sections, the book first covers general preoperative, intraoperative and postoperative challenges and, second, specific surgical procedures. It provides advice on both general gynecologic and obstetric operations, as well as subspecialist areas such as reproductive surgery, urogynecology and gynecologic oncology. The chapters are concise, beginning with illustrative case histories followed by background, management options, and any preventative approaches. Designed to guide the surgeon to safe practice throughout all stages, they offer practical and step-by-step help.

MARKETING STRATEGY, 6e, International Edition edition emphasizes teaching students to think and act like marketers. It presents strategy from a perspective that guides strategic marketing management in the social, economic, and technological arenas in which businesses function today--helping students develop a customer-oriented market strategy and market plan. Its practical approach to analyzing, planning, and implementing marketing strategies is based on the creative process involved in applying marketing concepts to the development and implementation of marketing strategy. An emphasis on critical thinking enables students to understand the essence of how marketing decisions fit together to create a coherent strategy. Well-grounded in developing and executing a marketing plan, the text offers a complete planning framework, thorough marketing plan worksheets, and a comprehensive marketing plan example for students to follow.

The Business and Law of Fashion and Retail CRC Press

While the REST design philosophy has captured the imagination of web and enterprise developers alike, using this approach to develop real web services is no picnic. This cookbook includes more than 100 recipes to help you take advantage of REST, HTTP, and the infrastructure of the Web. You'll learn ways to design RESTful web services for client and server applications that meet performance, scalability, reliability, and security goals, no matter what programming language and development framework you use. Each recipe includes one or two problem statements, with

easy-to-follow, step-by-step instructions for solving them, as well as examples using HTTP requests and responses, and XML, JSON, and Atom snippets. You'll also get implementation guidelines, and a discussion of the pros, cons, and trade-offs that come with each solution. Learn how to design resources to meet various application scenarios Successfully design representations and URIs Implement the hypertext constraint using links and link headers Understand when and how to use Atom and AtomPub Know what and what not to do to support caching Learn how to implement concurrency control Deal with advanced use cases involving copying, merging, transactions, batch processing, and partial updates Secure web services and support OAuth
Publishers, Distributors, & Wholesalers of the United States Cambridge University Press

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

Edible Insects "O'Reilly Media, Inc."

This book provides stimulating and timely suggestions about

expanding the world food supply to include a variety of minilivestock. It suggests a wide variety of small animals as nutritious food. These animals include arthropods (insects, earthworms, snails, frogs), and various rodents. The major advantage of minilivestock is that they do not have t

Preventing Tobacco Use Among Youth and Young AdultsA Report of the Surgeon GeneralThis Surgeon General's report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco.Programming Collective IntelligenceBuilding Smart Web 2.0 Applications

The National Institutes of Health Publication 07-6242, The Role of the Media in Promoting and Reducing Tobacco Use, NCI Tobacco Control Monograph 19, (the 19th of the Tobacco Control Monograph series of the National Cancer Institute (NCI) provides a critical, scientific review and synthesis of current evidence regarding the power of the media both to encourage and discourage tobacco use. The work presented is the most current and comprehensive distillation of the scientific literature on media communications in tobacco promotion and tobacco control. The six main parts of this monograph deal with aspects of media communications relevant to tobacco promotion and tobacco control. Part 1, an overview, frames the rationale for the monograph's organization and presents the key issues and conclusions of the research as a whole and of the individual chapters. This section describes media research theories that guided this assessment of the relationship between media and tobacco use, which can be viewed as a multilevel issue ranging from consumer-level advertising and promotion to stakeholder-level marketing aimed toward retailers, policymakers, and others. Part 2 further explores tobacco marketing—the range of media interventions used by the tobacco industry to promote its products, such as brand advertising and promotion, as well as corporate sponsorship and advertising. This section also evaluates the evidence for the influence of tobacco marketing on

smoking behavior and discusses regulatory and constitutional issues related to marketing restrictions. Part 3 explores how both the tobacco control community and the tobacco industry have used news and entertainment media to advocate their positions and how such coverage relates to tobacco use and tobacco policy change. The section also appraises evidence of the influence of tobacco use in movies on youth smoking initiation. Part 4 focuses on tobacco control media interventions and the strategies, themes, and communication designs intended to prevent tobacco use or encourage cessation, including opportunities for new media interventions. This section also synthesizes evidence on the effectiveness of mass media campaigns in reducing smoking. Part 5 discusses tobacco industry efforts to diminish media interventions by the tobacco control community and to use the media to oppose state tobacco control ballot initiatives and referenda. Finally, Part 6 examines possible future directions in the use of media to promote or to control tobacco use and summarizes research needs and opportunities. Key lessons from this volume can inform policymakers as well as scientists and

practitioners. Most critical from a policy standpoint is the conclusion, supported by strong evidence, that both exposure to tobacco marketing and depictions of tobacco in movies promote smoking initiation. In the United States in 2005—the same year in which 2.7 million American adolescents aged 12 to 17 used cigarettes in the past month¹ and 438,000 Americans died prematurely from diseases caused by tobacco use or secondhand smoke exposure²—the tobacco industry spent \$13.5 billion (in 2006 dollars) on cigarette advertising and promotion,³ an average of \$37 million per day. The tobacco industry continues to succeed in overcoming partial restrictions on tobacco marketing in the United States, and tobacco marketing remains pervasive and effective in promoting tobacco use. Efforts to curb the depiction of tobacco use in movies have increased in recent years, and the evidence reviewed here indicates that progress in this area could be expected to translate into lower rates of youth smoking initiation in the future. Strong evidence indicates that media campaigns can reduce tobacco use. This volume highlights

the complexities of assessing the media's influence on tobacco-related attitudes and behavior. A vast range of research is reviewed.~

Learning R "O'Reilly Media, Inc."

Answers legal questions of concern to tenants and explains how to deal with a landlord who is acting unfairly

An Engineer's Guide to Automated Testing of High-Speed Interfaces, Second Edition United Nations

Peter Norton is a pioneering software developer and author.

Norton's desktop for windows, utilities, backup, antivirus, and other utility programs are installed on millions of PCs worldwide. His inside the IBM PC and DOS guide have helped millions of people understand computers from the inside out. Peter Norton's introduction to computers incorporates features not found in other introductory programs. Among these are the following: Focus on the business-computing environment for the 1990s and beyond, avoiding the standard 'MIS approach.': A 'glass-box' rather than the typical 'black-box' view of computers-encouraging students to explore the computer from the inside out.
