Lemon-Aid New and Used Cars and

Trucks 2007-2017 BRILL

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Behavioral archaeology offers a way of examining the past by highlighting human engagement with the material culture of the time. 'Behavioral Archaeology: Principles and Practice' offers a broad overview of the methods and theories used in this approach to archaeology. Opening with an overview of the history and key concepts, the book goes on to systematically cover both principles and practice: the philosophy of science and the scientific method; artifacts and human behavior; archaeological inference; formation processes of the archaeological record; technological change; behavioral change; and ritual and religion. Detailed case studies show the relevance of behavioral method and theory to the

wider field of archaeological studies. The book will be invaluable to students of archaeology and anthropology.

Since the beginning of his poetic career in the 1990s, derek beaulieu has created works that have challenged readers to understand in new ways the possibilities of poetry. With nine books currently to his credit, and many works appearing in chapbooks, broadsides, and magazines, beaulieu continues to push experimental poetry, both in Canada and internationally, in new directions. Please, No More Poetry is the first selected works of derek beaulieu. As the publisher of first housepress and, more recently, No Press, beaulieu has continually highlighted the possibilities for experimental work in a variety of writing communities. His own work can be classified as visual poetry, as concrete poetry, as conceptual work, and beyond. His work is not to be read in any traditional sense, as it challenges the very idea of reading; rather, it may be understood as a practice that forces readers to reconsider what they think they know. As beaulieu continues to push himself in new directions, readers will appreciate the work that he has created to date, much of which has become unavailable in Canada. With an introduction by Kit Dobson and an interview with derek beaulieu by Lori Emerson as an afterword, Please, No More Poetry offers readers an opportunity to gain access to a complex experimental poetic practice through thirty-five selected representative works. Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
