The CCIE lab exam is an eight-hour, hands-on exam which requires you to configure a Cisco enterprise voice solution over an IP network. Although basic network connectivity is provided, you will be responsible for configuring the pre-installed applications to satisfy the requirements of the lab, and to troubleshoot important parameters of a voice network, such as quality of service, VLANs, gateways and gatekeepers. CCIE Voice Lab Exam LiveLessons is a comprehensive video training package that helps you prepare for the rigorous CCIE Voice lab exam. Expert voice instructor Kevin Wallace provides you with more than 17 hours of video based on the 12 strategies he developed for how to tackle the CCIE Voice lab exam on exam day. The product includes 18 videos that walk you through a mock CCIE Voice lab exam designed by the author to illustrate his valuable 12-step process for exam success, the same method Kevin used to pass the CCIE Voice exam. In addition to these 18 mock-lab tutorials, Kevin also provides you with 12 supplemental video lessons covering both test taking tips and concepts that it is critical to

know before attempting the exam. Finally, this hands-on, step-by-step video training tool also includes downloadable documentation that covers base configurations (and a listing of hardware) for all routers and switches, including the PSTN/Frame Relay Switch router as well as all the configurations performed in the mock-lab walkthrough videos. About the Author: With Cisco experience dating back to

1989 (on a Cisco AGS+ router running Cisco IOS 7.x), Kevin Wallace, CCIE#7945, has been a network design specialist for the Walt Disney World Resort, a Senior Technical Instructor for SkillSoft, and a network manager for Eastern Kentucky University. Kevin holds a bachelor's of science degree in electrical engineering (focusing on digital
