How do we learn to die? Most of us spend our lives avoiding that question, but this luminous book--a major best-seller in France--answers it with a directness and eloquence that are nothing less than transforming. As a psychologist in a hospital for the terminally ill in Paris, Marie de Hennezel has spent seven years

tending to people who are relinquishing their hold on life. She tells the stories of her patients and their families. de Hennezel teaches us how to turn death--our loved ones' or our own--from something lonely and agonizing into a sacred passage. She discusses the importance of an honest reckoning, the value of ritual, the necessity of touch. In imparting these lessons, *Intimate Death* becomes a guide to living more fully, more intensely, than we had thought possible. "Unique...Of all the books I have read about the endings of our lives, this elegiac testimony has taught me the most."--

Sherwin B. Nuland, M.D., author of *How We Die* "The quiet, obvious truths [de Hennezel] discovers in her work--these things have a kind of cumulative power."--*Washington Post Book World* From the Trade Paperback edition.

Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that

faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

Major accidents are rare events due to the many barriers, safeguards and defences developed by modern technologies. But they continue to happen with saddening regularity and their human and financial consequences are all too often unacceptably catastrophic. One of the greatest challenges we face is to develop more effective ways of both understanding and limiting their occurrence. This lucid book presents a set of common principles to further our knowledge of the causes of major accidents in a wide variety of high-technology systems. It also describes tools

and techniques for managing the risks of such organizational accidents that go beyond those currently available to system managers and safety professionals. James Reason deals comprehensively with the prevention of major accidents arising from human and organizational causes. He argues that the same general principles and management techniques are appropriate for many different domains. These include banks and insurance companies just as much as nuclear power plants, oil exploration and production companies, chemical process installations and air, sea and rail transport. Its unique combination of principles and practicalities make this seminal book essential reading for all whose daily business is to manage, audit and regulate hazardous technologies of all kinds. It is relevant to those concerned with understanding and controlling human and organizational factors and will also interest academic readers and those working in industrial and government agencies. When the Facts Change Elsevier  
New drugs, new devices, improved surgical techniques, and innovative diagnostic procedures and equipment

emerge rapidly. But development of these technologies has outpaced evaluation of their safety, efficacy, cost-effectiveness, and ethical and social consequences. This volume, which is "strongly recommended" by The New England Journal of Medicine "to all those interested in the future of the practice of medicine," examines how new discoveries can be translated into better care, and how the current system's inefficiencies prevent effective health care delivery. In addition, the book offers detailed profiles of 20 organizations currently involved in medical technology assessment, and proposes ways to organize U.S. efforts and create a coordinated national system for evaluating new medical treatments and technology.

*Essays, 1995-2010* World Health Organization

Patient engagement should be envisaged as a key priority today to innovate healthcare services delivery and to make it more effective and sustainable. The experience of engagement is a key qualifier of the exchange between the demand (i.e. citizens/patients) and the supply process of healthcare services. To understand and detect the strategic levers

that sustain a good quality of patients' engagement may thus allow not only to improve clinical outcomes, but also to increase patients' satisfaction and to reduce the organizational costs of the delivery of services. By assuming a relational marketing perspective, the book offers practical insights about the developmental process of patients' engagement, by suggesting concrete tools for assessing the levels of patients' engagement and strategies to sustain it. Crucial resources to implement these strategies are also the new technologies that should be (1) implemented according to precise guidelines and (2) designed according to a user-centered design process. Furthermore, the book describes possible fields of patients' engagement application by describing the best practices and experiences matured in different fields

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates

trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

The Sustainable Development Report 2021 features the SDG Index and Dashboards, the first and widely used tool to assess country performance on the UN Agenda 2030 and the Sustainable Development Goals. The report analyses and outlines what needs to happen for the Decade of Action and Delivery of the SDGs. In order to build back better following the Covid-19 pandemic, especially low-income countries will need increased fiscal space. The report frames the implementation of the SDGs in terms of six broad transformations. The authors examine country performance on the SDGs for 193 countries using a wide array of indicators, and calculate future trajectories, presenting a number of best practices to achieve the historic Agenda 2030. The views expressed in this report do not reflect the views of any organizations, agency or programme of the United Nations. This title is available as Open Access on Cambridge Core.

This publication outlines the performance of the Asian Development Bank (ADB) in achieving the goals of Strategy 2030, the institution's long-term strategic framework. It is the 13th in a series of annual reports that tracks development progress in Asia and the Pacific, assesses ADB's development effectiveness over the years, and identifies areas where the institution's performance needs to be further strengthened.

The creation of the Economic and Monetary Union (EMU) and the introduction of the euro have given a strong impetus to fiscal policy coordination in the European Union (EU). The EU fiscal framework and the Stability and Growth Pact provide for the systematic

surveillance of the fiscal policies of the large and heterogeneous group of 25 Member States. In this book, contributors from leading academic and international-policy institutions give a comprehensive overview of the central themes of current fiscal policy, including the impact of ageing populations on fiscal sustainability, the conduct of fiscal policy over the economic cycle, creative accounting in response to fiscal rules, fiscal decentralization, EU enlargement, and the link between expenditure reform and economic growth.

“Farmaci oppioidi e Cannabis nella terapia del dolore” rappresenta il frutto di alcuni studi, condotti per almeno tre lustri nel Dipartimento di Farmacia e nel Centro Interdipartimentale di Ricerca in Farmacoeconomia e Farmacoutilizzazione (CIRFF) della Federico II, e si rivolge sia a chi presta servizio ogni giorno in una farmacia, sia a chi, studioso, docente o studente, è interessato ad approfondire l'argomento. Il testo, utilizzando un approccio interdisciplinare, si muove su piani euristici differenti. Naturalmente,

ampio spazio è stato dedicato alla parte farmaceutica, analizzando tutti gli aspetti chimici e farmacologici connessi a questo tema. Un secondo punto di rilievo riguarda la problematica normativa legata alla dibattuta questione dell'utilizzo in terapia degli oppioidi e della Cannabis. In tal senso, si è cercato di offrire una prospettiva chiara ed esauriente del complesso quadro legislativo vigente: a partire dalle prime leggi promulgate dal Regno d'Italia, fino ad arrivare alle ultime circolari ministeriali in materia, è stata rivista ed esaminata l'intera normativa sulle sostanze stupefacenti, spiegandone anche i passaggi più delicati e controversi. Infine, soprattutto per ciò che concerne le ricadute sulla terapia del dolore, una parte significativa del libro si è concentrata sull'interpretazione medica e terapeutica, dove i farmaci oppioidi e la Cannabis costituiscono non solo una feconda frontiera di ricerca, ma anche un consolidato ed efficace strumento per contrastare alcune tipologie di dolore. Molecular Basis of Aging Il farmaco: ricerca, sviluppo e applicazione in terapia Venous access devices are necessary for any patient requiring repeated blood

sampling, parenteral nutrition, chemotherapy, antibiotic therapy or other IV treatments to be delivered in the hospital setting or at home. In the last decade, ultrasound-guided PICCs and Midline catheters – inserted by adequately trained physicians or nurses – have suddenly and widely spread in the field of venous access devices all over the world. The introduction and diffusion of PICCs in Italy has been historically linked to the GAVeCeLT association (the Italian Group of Long Term Venous Access Devices) and particularly to the authors' scientific and didactic activity. This volume examines the clinical indications for these devices and illustrates the details of their insertion and management in several clinical settings. Furthermore, all the specifications regarding the materials to use and all the aspects related to device removal and replacement, as well as the different strategies for complications prevention, are thoroughly discussed.

*Ultrasound Guided Regional Anesthesia*  
Edward Elgar Publishing

Ultrasound technology is enabling anesthesiologists to perform regional anesthetic procedures with greater

confidence in accuracy and precision. With improvements in visualizing neural anatomy and needle movement, ultrasound guidance improves patient safety and operating room efficiency. This book offers a detailed, stepwise approach to this technique, identifying pearls and pitfalls to ensure success. Topics are organized into four chapters. The first chapter provides the basic principles behind ultrasound guided regional anesthesia, setting a strong context for the rest of the book. The last three cover the nerve blocks: upper extremity, lower extremity, and chest, trunk and spine. Each nerve block is comprehensively explained, divided up by introduction, anatomy, clinical applications, technique, alternate techniques, complications, and pearls. This new edition includes discussions of 6 new blocks: the suprascapular block, axillary nerve block for shoulder surgery, fascia iliaca block, lateral femoral cutaneous block, and the adductor canal block. This edition also contains over 40 new procedural and imaging figures, an appendix on what blocks to perform for specific surgeries, and new information on choice of local

anesthetic agent, types of catheters and practical ultrasound physics to help improve scanning. *Ultrasound Guided Regional Anesthesia* provides authoritative, in-depth coverage of ultrasound guided regional anesthesia for the anesthesiologist beginning to use ultrasound and makes a great reference for the more seasoned physician.

*Molecular Basis of Aging* is a collection of papers that discuss the molecular aspects of aging in the light of molecular biology, biochemical gerontology, and genetics. Each chapter of the book contains a different study about the topic, which includes the effects of aging on DNA synthesis; the amplification of extrachromosomal circular copies and mitochondrial DNA during aging; and the altered actions of hormones and neurotransmitters during aging. The book also encompasses the loss of responsiveness to growth factors in cell senescence; the integration of cellular-molecular and neuroendocrine concepts of aging; changes and inactivation of enzymes during aging; and the

relationship of aging with free radicals. The text is recommended for molecular biologists, biochemists, and gerontologists who wish to study further the effects of aging on the body on a molecular level.

The development of a sociology of medical knowledge is both assessed and contributed to in *Medical Talk and Medical Work*. Underlying the analysis is research on the work of haematologists, which offers a rich resource for understanding the complexities and contradictions between physical bodies and social embodiment, medical talk and technical apparatus. Using but moving beyond this specific material, Paul Atkinson demonstrates the strengths and weaknesses of the existing understanding of medical knowledge. Among the issues explored are: the place of interaction

among doctors, rather than between doctors and patients, in defining the construction of medical knowledge; the ways in which clinical opinion is socially produced and the nature of the local settings through which this process occurs; and the relations among medical knowledge, medical language and the increasingly technological contexts of contemporary medical practice.

“In an era of growing anti-intellectualism, [Judt's] essays remind us of what we gain when we stick fast to high ethical and intellectual standards, and what is lost when we let them slip.” —Mark Mazower, *Financial Times* “Scintillating journalism . . . This collection is a reminder of Judt's clear mind and prose and, as Homans says in her lovely introduction, his fidelity to hard facts and to honest appraisal of the modern scene.” —Samuel Moyn, *The New York Times Book Review* In an age in which the lack of independent public intellectuals has often been sorely lamented, the historian Tony Judt played a rare and valuable role, bringing together history and current events, Europe and

America, what was and what is with what should be. In *When the Facts Change*, Tony Judt's widow and fellow historian Jennifer Homans has assembled an essential collection of the most important and influential pieces written in the last fifteen years of Judt's life, the years in which he found his voice in the public sphere. Included are seminal essays on the full range of Judt's concerns, including Europe as an idea and in reality, before 1989 and thereafter; Israel, the Holocaust and the Jews; American hyperpower and the world after 9/11; and issues of social inclusion and social justice in an age of increasing inequality. Judt was at once most at home and in a state of what he called internal exile from his native England, from Europe, and from America, and he finally settled in New York—between them all. He was a historian of the twentieth century acutely aware of the dangers of ethnic exceptionalism, and if he was shaped by anything, it was the Jewish past and his own secularism. His essays on Israel ignited a firestorm debate for their forthright criticisms of Israeli government policies relating to the Palestinians and the

occupied territories. Those crucial pieces are published here in book form for the first time, including an essay, never previously published, called "What Is to Be Done?" These pieces are suffused with a deep compassion for the Israeli dilemma, a compassion that instilled in Judt a sense of responsibility to speak out and try to find a better path, away from what he saw as a road to ruin. When the Facts Change also contains Judt's homages to the culture heroes who were some of his greatest inspirations: Amos Elon, François Furet, Leszek Kolakowski, and perhaps above all Albert Camus, who never accepted the complacent view that the problem of evil couldn't lie within us as

well as outside us. Included here too is a magnificent two-part essay on the social and political importance of railway travel to our modern conception of a good society; as well as the urgent text of "What Is Living and What Is Dead in Social Democracy," the final public speech of his life, delivered from a wheelchair after he had been stricken with a terrible illness; and a tender and wise dialogue with his then-teenage son, Daniel, about the different outlooks and burdens of their two generations. To read When the Facts Change is to miss Tony Judt's voice terribly, but to cherish it for what it was, and still is: a wise, human, deeply informed view on our most pressing concerns, delivered in good faith.

Focusing on the practices and politics of heritage-making at the individual and the local level, this book uses a wide array of international case studies to argue for their potential not only to disrupt but also to complement formal heritage-making in public spaces. Providing a much-needed clarion call to reinsert the individual as well as the transient into more collective heritage processes and practices, this strong contribution to the field of Critical Heritage Studies offers insight into benefits of the 'heritage from below approach' for researchers, policy makers and practitioners.
