 ...Definition.

Phytochemicals are chemicals of plant origin. Phytochemicals (from Greek phyto, meaning "plant") are chemicals produced by plants through primary or secondary metabolism. They generally have biological activity in the plant host and play a role in plant growth or defense against competitors, pathogens, or predators.. Phytochemicals generally are regarded as research compounds

...Phytochemical - WikipediaThe screening of natural products continues to be the origin of countless therapeutic agents [53]. Greater plants like a source for brand new potential drugs continues to be largely untouched and only a tiny proportion of these continues to be exposed to phytochemical analysis and also the fractions posted to medicinal screening is extremely low.Phytochemical screening of medicinal plants thesis writingphytochemical screening of plants is the need of the hour in order to discover and develop novel therapeutic agents with improved efficacy. Numerous research groups have also reported such studies throughout the world [4-8]. Thus, the
