The (Mis)Behaviour of Markets Profile Books

The Mandate of Heaven examines the first European version of Sunzi's Art of War, which was translated from Chinese by Joseph Amiot, a French missionary in Beijing, and published in Paris in 1772. His work is presented in English for the first time. Amiot undertook this project following the suppression of the Society of Jesus in France with the aim of demonstrating the value of the China mission to the French government. He addressed his work to Henri Bertin, minister of state, beginning a thirty-year correspondence between the two men. Amiot framed his translation in order to promote a radical agenda using the Chinese doctrine of the "mandate of heaven." This was picked up within the sinophile and radical circle of the physiocrats, who promoted China as a model for revolution in Europe. The work also arrived just as the concept of strategy was emerging in France. Thus Amiot's Sunzi can be placed among seminal developments in European political and strategic thought on the eve of the revolutionary era.

Le guide de la parfaite secrétaire médicale FeniXX

More than 1 billion children - half of all children in the world - are exposed to violence every year, in many forms and places, online and off. Whether a target or a witness, a child's exposure to violence has a severe impact on mental health. Such experiences with violence are often traumatic, evoking toxic responses to stress that cause both immediate and longterm physiological and psychological damage, including depression, post-traumatic stress disorder, borderline personality disorder, anxiety, substance use disorders, sleep and eating disorders, and suicide. As the international community begins a Decade of Action to deliver the Sustainable Development Goals (SDGs) by 2030, mental health must be imperative to measures employed to prevent and respond to violence against children and fulfill the promises of the Convention on the Rights of the Child. In support of that process, this publication provides an overview of international evidence on the ways in which violence harms

children's mental health, considering both diverse settings and forms of violence, developmental differences in the aftermath, and the most significant risk and protective factors. Highlighting the urgent need for action alongside continued gaps in knowledge of worthwhile solutions, the report also offers existing, effective approaches that should be pursued.

La médecine du sport occupe une place de plus en plus importante dans le champ d'activité du médecin et tout particulièrement du médecin généraliste : du simple certificat pour permettre à un élève de participer à des activités sportives spécifiques (piscine, tennis...) au suivi d'un sportif confirmé, tout praticien est confronté aux questions posées par la pratique sportive de son patient, quels que soient son niveau de pratique ou son état de santé. Toutes les questions que peut se poser le médecin trouveront leurs réponses dans cet ouvrage et notamment sur la surveillance, le diagnostic, le conseil et la prescription d'activité physique. Il rappelle les fondements de la médecine du sport, établit les relations entre la pratique sportive et la physiopathologie, notamment cardio-vasculaire, passe en revue la traumatologie et les pathologies liées à la pratique sportive, pour finir sur les données actuelles en matière de nutrition du sportif. Cette cinquième édition, entièrement revue et refondue, est un panorama complet de la médecine et de la pathologie du sport. Elle développe les avancées tant dans le domaine de la traumatologie que de l'imagerie sans oublier les spécificités de l'activité physique liées à l'âge, au sexe ou aux pathologies chroniques. Elle fait également le point sur des thèmes d'actualité comme l'entraînement et le surentraînement, les urgences sur le terrain, le coup de chaleur et la lutte contre le dopage. Écrit par les experts les plus reconnus, abondamment illustré, clair et didactique, cet ouvrage constitue une référence indispensable pour les médecins généralistes. "Mabanckou dazzles with technical dexterity and emotional depth" in his debut novel, winner of the Grand Prix Littéraire de l'Afrique Noire (Publishers Weekly, starred review). This tale of wild adventure reveals the dashed hopes of Africans living between worlds. When Moki returns to his village from France wearing designer clothes and affecting all the manners of a Frenchman, Massala-Massala, who lives the life of a humble peanut farmer after giving up his studies, begins to dream of following in Moki's footsteps. Together, the two take wing for Paris, where Massala-Massala finds himself a part of an underworld of out-of-work undocumented immigrants. After a botched attempt to sell metro passes purchased with a stolen checkbook, he winds up in jail and is deported. Blue White Red is a novel of postcolonial Africa where young people born into poverty dream of making it big in the cities of their former colonial masters. Alain Mabanckou's searing commentary on the lives of Africans in France is cut with the parody of African villagers who boast of a son in the country of Digol. Praise for Alain Mabanckou and Blue White Red "Mabanckou counts as one of the most successful voices of young African literature." —Internationales Literaturfestival Berlin "The African Beckett." —The Economist "Blue White Red stands at the beginning of the author's remarkable and multifaceted career as a novelist, essayist and poet . . . this debut novel shows much of his style and substance in remarkable ways . . . Dundy's translation is excellent." —Africa Book Club "Mabanckou's provocative novel probes the many facets of the 'migration adventure.'" —Booklist *Croissance* Hachette Éducation

Pendant la crise du COVID-19, les discours médiatiques et politiques ont placé les soignants sous les feux de la rampe. Mais qui sont ces « soignants », ou plutôt ici ces soignantes ? Elles ont accepté de participer à une étude qualitative visant à mieux comprendre leurs métiers et la manière dont la crise du COVID-19 a impacté leur vie personnelle et leur exercice professionnel. Le besoin de parole était tel que les résultats de l'enquête ici présentés dépassent ces éléments. Raisons de l'engagement dans les métiers soignants, actions de résistance face aux injonctions changeantes et jugées ineptes des autorités de santé, considérations du soin, formes de reconnaissance que le travail apporte... Ces soignantes décrivent les effets loupe de la crise sanitaire sur ce qu'elles vivent au quotidien et expriment les représentations qui sous-tendent leurs manières d'exercer.

Festivals and the French Revolution--the subject conjures up visions of goddesses of Liberty, strange celebrations of Reason, and the oddly pretentious cult of the Supreme Being. Every history of the period includes some mention of festivals; Ozouf shows us that they were much more than bizarre marginalia to the revolutionary process.

This publication offers a framework for the empowerment of people living in poverty throughout the world that concentrates on increasing people's freedom of choice and action to shape their own lives. explains why it could happen again if we don't act now. Fractal geometry is the mathematics of roughness: how to reduce the outline of a jagged leaf or static in a computer connection to a few simple mathematical properties. With his fractal tools, Mandelbrot has got to the bottom of how financial markets really work. He finds they have a shifting sense of time and wild behaviour that makes them volatile, dangerous - and beautiful. In his models, the complex gyrations of the FTSE 100 and exchange rates can be reduced to straightforward formulae that yield a

much more accurate description of the risks involved.
