For Beginners. No Reading Sheet Music Required! "Playing the Piano for the rest of us" is a course created for people who want to play the piano without having to commit to years of study and practice before being able to play songs they really want to. Finally a piano course for people who want to play with other musicians without having to learn to read sheet music, to enjoy themselves or be included in groups, like church groups or bands, or just friends and family. Most of the piano instruction I have seen falls into two categories... it's too hard, so you quit, or, it doesn't teach enough foundational skills and knowledge so the only thing learned is how to play songs that the course taught. I like the saying, "Give a man a fish, feed him for a day.

Teach him to fish, feed him for a lifetime." This course hopes to be part of the latter, for people who want to play and enjoy the piano or keyboard. Many existing courses teach too much at once like classical piano finger-skills, music theory and how to read sheet music. Students often get lost and discouraged somewhere between reading sheet music and having too hard of a time getting their hands to work together, others teach a set of playing skills that allow the student to play a limited amount of songs or music, but no freedom to find and play what the student really wanted to in the first place. Classical training is fantastic, but can often times be overkill for people who want to accompany others or want to play and / or sing using chord music.

Ultimately the student gets rolled over from too much and too hard of a learning curve, like a wave that came crashing down on their hopes and dreams. Some training methods don't provide enough foundation to enable the student to continue growing themselves, at their own pace, as they desire after they've completed the course. This course hopes to open the door for people to play the piano and then release them to grow-on! Learning to read chord music is the difference between a person having to "learn, read and interpret an extremely complicated map with a key of over 20 symbols," compared to having to read a simple map of "start point, landmark, end point."

You may be surprised to find out that there are only four chords that make up most of the songs you hear. In fact, one of those four is just the fundamental chord, but with a shifted down bass note and sounds darker. This means that you only need to learn-and you absolutely can learn-how to recognize three main chords with just your ear. You'll be able to play most songs without needing any sheet music or searching for the chords online. If you've ever wanted to know how to hear a song and play the chords by ear, Piano Chords Three: Numbers is a way to do that! Here's how it works: Professionals listen for the chords in a song as numbers instead of the chord names. Each key changes the names of

the chords, but not the numbers. For instance, in the key of C, the 1 chord is C. In the key of G, the 1 chord is G. The 1 chord is a very simple chord to hear. Once you hear the fundamental, distinct tone of the 1 you can then find the key by testing several chords until you find the right one. Then you not only know what key you are in but also the fundamental 1 chord for that key. All the other chords in the song build from that one!

Piano Chords Three: Numbers includes:-Welcome: Why Numbers and What Are They?-One: The 1 Chord and Its Dominance-Two: The 4 and 5: The Other Pillars-Three: The 6m: Just A Dark 1 Chord-Four: The 2m: The New 4-Five: The "Over" or Passing Chords: 1/3, 5/7, and 4/1-Six: The 3m and 7dim-Seven: The ?7, 2, and 3: The Accidentals-Eight:
