9th Grade High School Physics Chapter Problems, Practice Tests with MCQs (What is High School Physics & Problems Book 4)

This book is a collection of 954 multiple-choice questions in waves, thermodynamics, electricity, and magnetism. These questions have been

given, over couple of years, to the students of General Physics II course (Phys102) at King Fahd University of Petroleum and Minerals. They are organized according to the sections of Phys102 textbook: Fundamental of Physics by Halliday, Resnick and Walker, 6th edition. This collection might be very helpful for students preparing for exams in Phys102 or similar courses. We advise students strongly to study and understand the course material very well before attempting

practicing some of these questions. Instructors might also find this book a valuable source for questions that can be used in examples or tests.

The statistics provided with some of the questions might be very valuable in comparing performances. العيكان للنشر
