PASS THE LEED GREEN ASSOCIATE EXAM WITH FLYING COLORS! The LEED Green Associate V4 Exam Complete Study Guide aims to provide deep insight into the principles of green building; and helps the reader to learn, rather than to memorize the essential information for the exam. Thus, this approach equips candidates to successfully pass the LEED Green Associate exam with flying colors in order to actively apply green building and LEED principles in real life. This book is the only resource a candidate needs, in order to successfully pass the exam. As LEED v4 is quite different in comparison to the former versions, the book was entirely re-written; thus, it was not updated from a previous edition. All of the chapters contain guidance on the aspects that require extensive attention, while the book points out the finer details to focus on for the exam purposes. It does not matter how much time passes after taking the exam, as learning the real reasons behind the green building and LEED principles through observation will help to consolidate this information concisely. Even though the LEED Green Associate exams are sometimes referred to as conceptual exams, in reality the exam goes well beyond that. Without diving into the LEED prerequisites and credits, a candidate cannot ever guarantee passing the test; as a result, the book covers the core concepts of each LEED credit category, and then evaluates the LEED prerequisites and credits to demonstrate how those green building concepts turn into real projects with LEED requirements. Pass the LEED Green Associate exam with flying colors! Thoroughly understand and apply the green building principles for life, and retain all the information you have learned Apply the green building and LEED principles in real life Know all the important things to consider during the exam beforehand The book is also recommended for students, professionals, and anyone who has not chosen to take an LEED professional exam, but nonetheless retains a strong interest in LEED and green buildings.

Learn the Tips, Become One of Those Who Know Building Construction and Architectural Practice, and Thrive! For architectural practice and building design and construction industry, there are two kinds of people: those who know, and those who don't. The tips of building design and construction

and project management have been undercover-until now. Most of the existing books on building construction and architectural practice are too expensive, too complicated, and too long to be practical and helpful. This book simplifies the process to make it easier to understand and uncovers the tips of building design and construction and project management. It sets up a solid foundation and fundamental framework for this field. It covers every aspect of building construction and architectural practice in plain and concise language and introduces it to all people. Through practical case studies, it demonstrates the efficient and proper ways to handle various issues and problems in architectural practice and building design and construction industry. It is for ordinary people and aspiring young architects as well as seasoned professionals in the construction industry. For ordinary people, it uncovers the tips of building construction; for aspiring architects, it works as a construction industry survival guide and a guidebook to shorten the process in mastering architectural practice and climbing up the professional ladder; for seasoned architects, it has many checklists to refresh their memory. It is an indispensable reference book for ordinary people, architectural students, interns, drafters, designers, seasoned architects, engineers, construction administrators, superintendents, construction managers, contractors, and developers. You will learn: 1.How to develop your business and work with your client. 2.The entire process of building design and construction, including programming, entitlement, schematic design, design development, construction documents, bidding, and construction administration. 3.How to coordinate with governing agencies, including a county's health department and a city's planning, building, fire, public works departments, etc. 4.How to coordinate with your consultants, including soils, civil, structural, electrical, mechanical, plumbing engineers, landscape architects, etc. 5.How to create and use your own checklists to do quality control of your construction documents. 6.How to use various logs (i.e., RFI log, submittal log, field visit log, etc.) and lists (contact list, document control list, distribution list, etc.) to organize and simplify your work. 7.How to respond to RFI, issue CCDs, review change orders, submittals, etc. 8.How to make your architectural practice a profitable and successful business. About the author Gang Chen holds a master's degree from the School of Architecture, University of Southern California (USC), Los Angeles, and a bachelor's degree from the School of Architecture, South China University of Technology. He has over 20 years of professional experience. Many of the projects he was in charge of or participated in have been published extensively in Architecture, Architectural Record, The Los Angeles Times, The Orange County Register, etc. He has worked on a variety of unusual projects, including well-known, large-scale healthcare and hospitality projects with over one billion dollars in construction costs, award-winning school designs, highly-acclaimed urban design and streetscape projects, multifamily housing, high-end custom homes, and regional and neighborhood shopping centers. Gang Chen is a LEED AP and a licensed architect in California. He is also the internationally acclaimed author for other fascinating books, including Planting Design Illustrated and LEED Exam Guides Series, which include one guidebook for each of the LEED exams.

What others are saying about "LEED Green Associate Exam Guide"...(Part I) "Finally! A comprehensive study tool for LEED GA Prep!" "I took the one-day Green LEED Green Associate course and walked away with a power point binder printed in very small print--which was missing MUCH of the required information (although I didn't know it at the time). I studied my little heart out and took the test, only to fail it by 1 point. Turns out I did NOT study all the material I needed to in order to pass the test. I found this book, read it, marked it up, retook the test, and passed it with a 95%. Look, we all know the LEED Green Associate Exam is new

and the resources for study are VERY limited. This one's the VERY best out there right now. I highly recommend it." --Consultant VA "Complete overview for the LEED Green Associate exam" "I studied this book for about three days and passed the exam ... if you are truly interested in learning about the LEED system and green building design, this is a great place to start." --K.A.
