 From Snow White to Shrek, from Fred Flintstone to SpongeBob SquarePants, the design of a character conveys personality before a single word of dialogue is spoken. Designing Characters with Personality shows artists how to create a distinctive character, then place that character in context within a script, establish hierarchy, and maximize the impact of pose and expression. Practical exercises help readers put everything together to make their new characters sparkle. Lessons from the author, who designed the dragon Mushu (voiced by Eddie Murphy) in Disney's Mulan—plus big-name experts in film, TV, video games, and graphic novels—make a complex subject accessible to every artist.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The

remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Vascular management and care has become a truly multidisciplinary enterprise as the number of specialists involved in the treatment of patients with vascular diseases has steadily increased. While in the past, treatments were delivered by individual specialists, in the twenty-first century a team approach is without doubt the most effective strategy. In order to promote professional excellence in this dynamic and rapidly evolving field, a shared knowledge base and interdisciplinary standards need to be established. Pan Vascular Medicine, 2nd edition has been designed to offer such an interdisciplinary platform, providing vascular specialists with state-of-the art descriptive and procedural knowledge. Basic science, diagnostics, and therapy are all comprehensively covered. In a series of succinct, clearly written chapters, renowned specialists introduce and comment on the current international guidelines and present up-to-date reviews of all aspects of vascular care.

Canada is packed with intriguing places for travel where heritage and landscape interact to create stories that fire our imagination. Scattered across the land are incredible tales of human life over the centuries. From the Majorville rock formation (dated as being older than Stonehenge), through the systems of walking trails developed by pre-contact Native Peoples, and the fur trade routes, to the more recent grand stories of the Chilkoote Gold Rush of 1897, Bob Henderson, the traveller, captures our living history in its relationship to the land - best expressed through the Norwegian quote "nature is the true home of culture." The diversity of fascinating content includes the ancient James Bay landmark (the "Wonderful" Stone); the mountain treks of naturalist Mary Schaffer Warren; the west coast observations of George Vancouver; practices such as dog sledding, warm winter camping and canoeing that allow for heritage insights; the trails of Dundas, Ontario; the exploits of missionary Gabriel Sagard; the recluse Louis Gamache of Anticosti Island; the abandoned gravesites along the coast of Newfoundland - to name but a few. As historian Michael Bliss once said, "We have to find a way to make history smell again." Author Bob Henderson brings the "fragrance of the past" into the present and invites us to imagine and participate. "Like an enthused hummingbird too eager to land, Bob Henderson leads a wide-ranging tour of the vast garden of Canadian history and landscape. Once entrusted with the scent of intrigue we are invited to follow these stories and trails deeper, make them speak and inform our own travels and impressions. Here are stepping stones and touchstones, paths toward richer engagements via a storied and fabulous past." — Alexandra & Garrett Conover, co-authors of *The Snow Walker's Companion* "I pulled off the river; a log cabin set back in the woods had caught

my eye. Though very old it was in good shape — there was no lock on the door. A framed note beside it read, 'Leave as you found it.' The interior was neat and tidy, a complete set of blackened pots hung on the walls, a small stack of kindling by the open door of a Findlay stove. 'A perfect place,' I thought to myself. As I turned to take in the rest of the cabin I saw before me Canada/Yukon rivers, Labrador fiords, Prairie medicine wheels, Superior's north shore, portage and trail - it was all there before me, across space and time. As I stood there ghosts emerged from the walls, trappers, cowboys, ill-fated explorers, lucky canoeists — all in the same room, all eager to tell their stories. Such is the nature of Bob Henderson's wonderful book." - Ian Tamblyn, songwriter

Do you want to understand Neural Networks and learn everything about them but it looks like it is an exclusive club? Are you fascinated by Artificial Intelligence but you think that it would be too difficult for you to learn? If you think that Neural Networks and Artificial Intelligence are the present and, even more, the future of technology, and you want to be part of it... well you are in the right place, and you are looking at the right book. If you are reading these lines you have probably already noticed this: Artificial Intelligence is all around you. Your smartphone that suggests you the next word you want to type, your Netflix account that recommends you the series you may like or Spotify's personalised playlists. This is how machines are learning from you in everyday life. And these examples are only the surface of this technological revolution. Either if you want to start your own AI enterprise, to empower your business or to work in the greatest and most innovative companies, Artificial Intelligence is the future, and Neural Networks programming is the skill you want to have. The good news is that there is no exclusive club, you can easily (if you commit, of course) learn how to program and use neural networks, and to do that Neural Networks for Beginners is the perfect way. In this book you will learn: The types and components of neural networks The smartest way to approach neural network programming Why Algorithms are your friends The "three Vs" of Big Data (plus two new Vs) How machine learning will help you making predictions The three most common problems with Neural Networks and how to overcome them Even if you don't know anything about programming, Neural Networks is the perfect place to start now. Still, if you already know about programming but not about how to do it in Artificial Intelligence, neural networks are the next thing you want to learn. And Neural Networks for Beginners is the best way to do it. Download Neural Network for Beginners now to get the best start for your journey to Artificial Intelligence. NEW YORK TIMES BESTSELLER • An inspiring personal story of redemption, second chances, and the transformative power within us all, from the founder and CEO of the nonprofit charity: water. At 28 years old, Scott Harrison had it all. A top nightclub promoter in New York City, his life was an endless cycle of drugs, booze, models—repeat. But 10 years in, desperately unhappy and morally bankrupt, he asked himself, "What would the exact

opposite of my life look like?" Walking away from everything, Harrison spent the next 16 months on a hospital ship in West Africa and discovered his true calling. In 2006, with no money and less than no experience, Harrison founded charity: water. Today, his organization has raised over \$400 million to bring clean drinking water to more than 10 million people around the globe. In Thirst, Harrison recounts the twists and turns that built charity: water into one of the most trusted and admired nonprofits in the world. Renowned for its 100% donation model, bold storytelling, imaginative branding, and radical commitment to transparency, charity: water has disrupted how social entrepreneurs work while inspiring millions of people to join its mission of bringing clean water to everyone on the planet within our lifetime. In the tradition of such bestselling books as Shoe Dog and Mountains Beyond Mountains, Thirst is a riveting account of how to build a better charity, a better business, a better life—and a gritty tale that proves it's never too late to make a change. 100% of the author's net proceeds from Thirst will go to fund charity: water projects around the world.
