War Made Invisible Taylor & Francis

See "Stephen Marglin on the Future of Capitalism" at FORA.tv. Economists celebrate the market as a device for regulating human interaction without acknowledging that their enthusiasm depends on a set of half-truths: that individuals are autonomous, self-interested, and rational calculators with unlimited wants and that the only community that matters is the nation-state. However, as Stephen Marglin argues, market relationships erode community. In the past, for example, when a farm family experienced a setback--say the barn burned down--neighbors pitched in. Now a farmer whose barn burns down turns, not to his neighbors, but to his insurance company. Insurance may be a more efficient way to organize resources than a community barn raising, but the deep social and human ties that are constitutive of community are weakened by the shift from reciprocity to market relations. Marglin dissects the ways in which the foundational assumptions of economics justify a world in which individuals are isolated from one another and social connections are impoverished as people define themselves in terms of how much they can afford to consume. Over the last four centuries, this economic ideology has become the dominant ideology in much of the world. Marglin presents an account of how this happened and an argument for righting the imbalance in our lives that this ideology has fostered.

Too Much and Not the Mood Thomas Nelson

Natural phenomena, revolutionary inventions, scientific facts, and the most up-to-date questions are all explained in detailed text that is complemented by visually arresting graphics. Six major sections are further broken down into subsections that encompass everything from microscopic life to nuclear power.

A deeply humane new collection by a luminary of Bengali literature A radiant collection of poetry about womanhood, intimacy, and the body politic that together evokes the arc of an ordinary life. Nabaneeta Dev Sen's rhythmic lines explore the joys and agonies of first love, childbirth, and decay with a restless, tactile imagination, both picking apart and celebrating the rituals that make us human. When she warns, "know that blood can be easily drawn by lips," her words tune to the fierce and biting depths of language, to the "treachery that lingers on tongue tips." At once compassionate and unsparing, conversational and symphonic, these poems tell of a rope shivering beneath an acrobat's nimble feet or of a twisted, blood-soaked umbilical cord -- they pluck the invisible threads that bind us together.

Solve Any Problem Faster, with Less Risk and Lower Cost

Unprecedented access to infinite solutions has led us to realize that having all of the answers is not the answer. From innovation teams to creativity experts to crowdsourcing, we've turned from one source to another, spending endless cycles pursuing piecemeal solutions to each challenge we face. What if your organization had an effective and systematic approach to deal with any problem? To find better solutions, you need to first ask better questions. The questions you ask determine which solutions you'll see and which will remain hidden. This compact yet powerful book contains the formulas to reframe any problem multiple ways, using 25 lenses to help you gain different perspectives. With visual examples and guidance, it contains everything you need to master any challenge. This book will help you: Discover why we are hardwired to ask ineffective questions and learn to work through those barriers. Understand the power and importance of well-defined questions. Reframe any problem multiple ways to help you find the optimal solution. Move from idea-based innovation to question-based innovation that drives higher ROI. Apply just one of the lenses and you will quickly discover better solutions. Apply all of them and you will be able to solve any problem-in business and in life.

Brands and Their Companies Simon and Schuster

This book is an ethnographic study of the travelling art exhibition Indian Highway that presented Indian contemporary art in Europe and China between 2008 and 2012, a significant period for the art world that saw the rise and fall of the national exhibition format. It analyses art exhibition as a mobile "object" and promotes the idea of art as a transcultural product by using participant observation, in-depth interviews, and multi-media studies as research method. This work encompasses voices of curators, artists, audiences, and art critics spread over different cities, sites, and art institutions to bridge the distance between Europe and India based on vignettes along the Indian Highway. The discussion in the book focuses on power relations, the contested politics of representation, and dissonances and processes of negotiation in the field of global art. It also argues for rethinking analytical categories in anthropology to identify the social role of contemporary art practices in different cultural contexts and also examines urban art and the way national or cultural values are reinterpreted in response to ideas of difference and pluralism. Rich in empirical data, this book will be useful to scholars and researchers of modern and contemporary art, Indian art, art and visual culture, anthropology, art history, mobility, and transcultural studies.

Readers of all ages love Dr. Seuss's spooky and silly story about facing your fears! Featuring over 50 special glow-in-the-dark bonus stickers and a luxe, gift-worthy cover that glows in the dark and has a matte "soft-touch" finish! I was deep within the woods When, suddenly, I spied them. I saw a pair of pale green pants With nobody inside them! What's a pair of empty green trousers doing by itself in the woods? Or riding a bike through town? The narrator of What Was I Scared Of? does not want to find out. The spooky pants give him the creeps! This Seussian gem from The Sneetches and Other Stories shines on its own as it delivers a timeless message about fear and tolerance. Perfect for slumber parties and perusal by flashlight--it comes with a sheet of spooky glowing stickers bound inside as an added bonus!

This is a book about the behind-the-scenes reality of a life in

ministry. It tells you what Zack Eswine wishes somebody else would've told him. With over 20 years of experience in ministry, Zack shares with incredible honesty about his own failures, burnout, and pain, all the while addressing the complexities of leadership decisions, church discipline, family dynamics, and so on. Presenting sound pastoral theology couched in autobiographical musings and powerful prose, this book offers a fresh and biblically faithful approach to the care of souls, including your own.

Coloniality and Racial (In)Justice in the University examines the disruption and remaking of the university at a moment in history when white supremacist politics have erupted across North America, as have anti-racist and anti-colonial movements. Situating the university at the heart of these momentous developments, this collection debunks the popular claim that the university is well on its way to overcoming its histories of racial exclusion. Written by faculty and students located at various levels within the institutional hierarchy, this book demonstrates how the shadows of settler colonialism and racial division are reiterated in "newer" neoliberal practices. Drawing on critical race and Indigenous theory, the chapters challenge Eurocentric knowledge, institutional whiteness, and structural discrimination that are the bedrock of the institution. The authors also analyse their own experiences to show how Indigenous dispossession, racial violence, administrative prejudice, and imperialist militarization shape classroom interactions within the university.

Important new insights into how various components and systems evolved Premised on the idea that one cannot know a science without knowing its history, History of Wireless offers a lively new treatment that introduces previously unacknowledged pioneers and developments, setting a new standard for understanding the evolution of this important technology. Starting with the background-magnetism, electricity, light, and Maxwell's

Electromagnetic Theory-this book offers new insights into the initial theory and experimental exploration of wireless. In addition to the well-known contributions of Maxwell, Hertz, and Marconi, it examines work done by Heaviside, Tesla, and passionate amateurs such as the Kentucky melon farmer Nathan Stubblefield and the unsung hero Antonio Meucci. Looking at the story from mathematical, physics, technical, and other perspectives, the clearly written text describes the development of wireless within a vivid scientific milieu. History of Wireless also goes into other key areas, including: The work of J. C. Bose and J. A. Fleming German, Japanese, and Soviet contributions to physics and applications of electromagnetic oscillations and waves Wireless telegraphic and telephonic development and attempts to achieve transatlantic wireless communications Wireless telegraphy in South Africa in the early twentieth century Antenna development in Japan: past and present Soviet quasi-optics at near-mm and sub-mm wavelengths The evolution of electromagnetic waveguides The history of phased array antennas Augmenting the typical, Marconi-centered approach, History of Wireless fills in the conventionally accepted story with attention to more specific, less-known discoveries and individuals, and challenges traditional assumptions about the origins and growth of wireless. This allows for a more comprehensive understanding of how various components and systems evolved. Written in a clear tone with a broad scientific audience in mind, this exciting and thorough treatment is sure to become a classic in the field.

The Fortnightly Motilal Banarsidass Publ.

With a new preface by the author on the Gaza war An unflinching exposé of the hidden costs of American war-making written with "an immense and rare humanity" (Naomi Klein) by one of our premier political analysts Every election cycle, candidates across the political spectrum repudiate what has become one of the most consequential and enduring components of American foreign policy: the forever war. Yet, once the ballots have been cast and the camera crews go home, the American war machine chugs along in almost complete obscurity. The journalist and political analyst Norman Solomon's War Made Invisible is a "gripping and painful study" (Noam Chomsky) of the mechanisms behind our invisible, but perpetual, national state of war. From ever-compliant journalists serving as little more than stenographers for the Pentagon to futuristic military technology,

horrifying in its destructive power, that makes dropping a bomb or pulling the trigger on a drone strike more of an abstraction than a moral calculation, Solomon's "staggeringly important intervention" (Naomi Klein) exposes the profoundly human consequences at home and abroad of the bipartisan commitment to war making. In an era of increasing global instability in which it is all too easy to succumb to despair, Solomon pierces the "manufactured 'fog of war' . . . [and] casts sunlight, the best disinfectant, on the propaganda that fuels perpetual war" (Amy Goodman). Now in paperback with a new preface by the author on the Gaza war, Solomon's incisive, ever-timely analysis "provide[s] the fresh and profound clarity that our country desperately needs" (Daniel Ellsberg) now more than ever. *New York Review of the Telegraph and Telephone and Electrical Journal* The New Press

The economic sanctions imposed on Iraq from 1990 to 2003 were the most comprehensive and devastating of any established in the name of international governance. In a sharp indictment of U.S. policy, Gordon examines the key role the nation played in shaping the sanctions.

In/Visible War addresses a paradox of twenty-first century American warfare. The contemporary visual American experience of war is ubiquitous, and yet war is simultaneously invisible or absent; we lack a lived sense that "America" is at war. This paradox of in/visibility concerns the gap between the experiences of war zones and the visual, mediated experience of war in public, popular culture, which absents and renders invisible the former. Large portions of the domestic public experience war only at a distance. For these citizens, war seems abstract, or may even seem to have disappeared altogether due to a relative absence of visual images of casualties. Perhaps even more significantly, wars can be fought without sacrifice by the vast majority of Americans. Yet, the normalization of twenty-first century war also renders it highly visible. War is made visible through popular, commercial, mediated culture. The spectacle of war occupies the

contemporary public sphere in the forms of celebrations at athletic events and in films, video games, and other media, coming together as MIME, the Military-Industrial-Media-Entertainment Network.

Across three centuries, AJYB has provided insight into major trends. Part I of the current volume contains two chapters on Jewish Americans in 2020 by the Pew Research Center, including reactions from 16 prominent social scientists. Subsequent chapters analyze the development of Holocaust consciousness in America, recent domestic and international events as they affect the American Jewish community, and the demography and geography of the US, Canada, and world Jewish populations. Part II provides lists of Jewish institutions, including federations, community centers, social service agencies, national organizations, camps, museums, and Israeli consulates. The final chapters present lists of Jewish periodicals and broadcast media, Jewish Studies programs, books, journals, articles, websites, research libraries, and academic conferences and lists of major events in the past year, Jewish honorees, and obituaries. This volume employs an accessible style, making it of interest to public officials, Jewish professional and lay leaders, as well as the general public and academic researchers. For more than 120 years the American Jewish Year Book has served as an indispensable resource for scholars, clergy, and lay leaders, providing crucial, detailed insights into demographic shifts and sociological trends in the North American Jewish community. The latest edition continues to fulfill these important needs with essential articles on the landmark Pew Report and the impact of the Holocaust in the American Jewish community and American in general. This is a must-have volume for any serious student of the contemporary Jewish world. Jeffrey Shoulson, Senior Vice Provost for Academic Affairs, Professor of Literatures, Cultures, and Languages, and English, Director Emeritus Center for Judaic Studies and Contemporary Jewish Life, University of Connecticut The American Jewish Year Book is a critical snapshot of Jews and Jewish Studies in the United States in a particular year, and a valuable resource for scholars studying the changes in Jewish communities and Jewish Studies in the United States (and beyond!) over time. The AJYB highlights major publications and data that are consistently used in research, and its scholarly

essays contextualize the information in an easily readable context. The lists of important institutions and organizations are invaluable for someone interested in the broader Jewish experience (or, at the most practical, a Jewish organization in their neighborhood!). Christopher White points to ways that both spiritual practices and scientific speculation about multiverses and invisible dimensions are efforts to peer into the hidden elements and even existential meaning of the universe. Creatively appropriated, these ideas can restore a spiritual sense that the world is greater than anything our eyes can see.
