## **NATHAN MACIAS**

*Anchoring Systems and Procedures for Large Tankers* Routledge  
Anthropogenic greenhouse gas (GHG) emissions are dramatically influencing the environment, and research is strongly committed to proposing alternatives, mainly based on renewable energy sources. Low GHG electricity production from renewables is well established but issues of grid balancing are limiting their application. Energy storage is a key topic for the further deployment of renewable energy production. Besides batteries and other types of electrical storage, electrofuels and bioderived fuels may offer suitable alternatives in some specific scenarios. This Special Issue includes contributions on the energy conversion technologies and use, energy storage, technologies integration, e-fuels, and pilot and

large-scale applications.

Guide Marine Safety Manual Taylor & Francis  
A comprehensive training and reference manual used as a textbook in maritime institutions. Addresses the prevention, control, and extinguishing of fires aboard commercial vessels and on offshore drilling rigs. Includes chapters on emergency procedures and equipment as well as case studies of past shipboard fires. Generously illustrated with drawings, photos, diagrams, tables, and checklists. Recommended reading for all maritime personnel and kept both in shipboard reference libraries and in the offices of maritime executives.

*Proceedings of the Marine Safety Council* MDPI  
This is volume 1 of a 2-volume set. Marine Design XIII collects the contributions to the 13th International Marine Design Conference (IMDC 2018, Espoo, Finland, 10-14 June 2018). The aim of this IMDC series of conferences is to promote all aspects of marine design as an engineering discipline. The focus is on key design challenges and opportunities in the area of current maritime technologies and markets, with special emphasis on:  
• Challenges in merging ship design and marine applications of experience-based industrial design • Digitalisation as technological enabler for stronger link between efficient design, operations and

maintenance in future • Emerging technologies and their impact on future designs • Cruise ship and icebreaker designs including fleet compositions to meet new market demands To reflect on the conference focus, Marine Design XIII covers the following research topic series:

- State of art ship design principles - education, design methodology, structural design, hydrodynamic design;
- Cutting edge ship designs and operations - ship concept design, risk and safety, arctic design, autonomous ships;
- Energy efficiency and propulsions - energy efficiency, hull form design, propulsion equipment design;
- Wider marine designs and practices - navy ships, offshore and wind farms and production. Marine Design XIII contains 2 state-of-the-art reports on design methodologies and cruise ships design, and 4 keynote papers on new directions for vessel design practices and tools, digital maritime traffic, naval ship designs, and new tanker design for arctic. Marine Design XIII will be of interest to academics and professionals in maritime technologies and marine

design.

Paradise Cay Publications  
DECK CADETS, DECK RATINGS &/OR INEXPERIENCED SEAFARERS THIS MANUAL IS FOR YOU My name is Philip Rendado, Author/Entrepreneur and former Third Officer. This book is a compilation of - knowledge never truly taught at school regarding being a deck officer - actual procedures on the bridge (used onboard) - actual procedures on how to do your job as a seafarer onboard the ship Remember once you go onboard the ship, the details may be slightly different from what you are going to experience, but for the most part it will be the same.

The Command Companion of Seamanship Techniques is the latest work from the well-respected marine author, D J House. It contains all the information needed for command posts at sea. · All aspects of shipboard management are discussed, with special emphasis placed on health and safety. · Guidelines on how to respond to accidents and emergencies at sea · Contains the most recent SOLAS revisions and a discussion of marine law to keep you up to date with the latest rules and regulations. In order to aid learning, the book includes a number of worked examples in the text along with questions and answers at the end of chapters. The author tells you how to respond to accidents and

emergencies at sea, in the event, for example of cargo contamination, collision, loss of stability due to cargo shift and damage due to flooding, fire plus loss of life/crew. In addition, the SOLAS revisions and a discussion of marine law is included to keep you up to date with all the latest rules and regulations. In order to aid learning, this book will include a number of worked examples in the text along with questions and answers at the end of chapters. D J House is senior lecturer in Nautical studies at the Nautical college, Fleetwood. His sea-going experience includes general cargo, reefer, bulk cargo, passenger and liner trades, underwater operations, and roll-on/roll-off ferries. He is a well-known marine author and has written *Seamanship Techniques Volumes 1 and 2* (combined) and he has revised *Cargo Work in the Kemp & Young series. Sailing Directions (planning Guide)*. Routledge

Includes Errata Sheet of Notice to Mariners (NTM) 22/13. This book contains a complete copy of the Inland and International Navigation Rules as presented by the United

States Coast Guard. The Coast Guard requires that an up-to-date copy such as this one be carried on all vessels 12 meters (39 feet) or more in length at all times. In addition to a complete copy of the USCG edition (COMDTINST M16672.2D), Paradise Cay Publications has added the following features to make our book more useful and comprehensive. 1) We have created an Annotated Contents. This added feature will help guide the reader to a desired rule. The topic of each subsection of the rules has been noted for quick reference along with the page numbers for Inland and International Rules. 2) We have updated this edition for corrections presented in Notice to Mariners up through November 15, 2004. 3) We have included detailed instructions on how to log on to the NGA (National Geospatial-Intelligence Agency, formerly NIMA) website and update this Rules Publication. *United Kingdom Offshore Legislation Guide 1981* University of Rhode Island, Center for Ocean Management Studies

The complete study and revision guide for the International Standards of

Training, Certification and Watchkeeping (STCW). For all ranks and serving crew in the mercantile marine, this study pack covers everything students need to revise when preparing for the oral assessment taken as part of the Deck Certificate of Competency at either junior or senior levels. Since publication of the first edition, there have been many new innovations throughout the industry. This guide is fully updated to reflect these changes and includes practice questions on International Safety Management (ISM), Electronic Chart Display and Information Systems (ECDIS) and the International Code for the Security of Ships and Port Facilities (ISPS), as well as hundreds of additional tutorial questions throughout the book and the accompanying interactive CD. This edition of *The Seamanship Examiner* has been fully updated with the latest amendments to the COLREGs and is a trusted study aid for all international STCW Deck Officer candidates including Officer of the Watch, Chief Mate and Master positions, plus those working coastal and inland waters in the

fishing industry such as Deck Officers.

### **Guide to Port Entry**

Safety and Security at Sea is concerned with the safe operation of ships and consequently with preventing errors and oversights. This book contributes to safety where it is most effective - right at the site of work, on board the ship itself. It is here, indisputably, that it will prevent accidents and save lives. It translates theory into practice besides covering several new and current topics. This book is aimed at every deck officer - at every rank and on all ships. The book also attends to other manifest needs and discusses piracy, stowaways, management of crew on board and several other new and current topics in the interest of safety. All deck officers will find, when preparing for professional examinations, that the area which the oral section of these examinations at any level (Class One, Two or Three) cover - safety - is the one in which this book specialises. It will be an invaluable aid in passing these exams. By discussing essential details in every part of a

voyage, parts that form different subjects in the theoretical section, it becomes an excellent reference book for them. In addition, it will also assist the staff of shipping companies in compiling ship operation manuals. This book includes the advice of various notices from the Marine Safety Agency and of guidelines from the International Maritime Organisation. It explains their requirements - International safety management code, emergency pollution control plans and others. In order to deal with ship board work thoroughly, this book takes an entire voyage into account. That is the reason for the sequence of its chapters to correspond to the progress of an actual voyage. The book begins with a ship embarking on a voyage and, in succession, conveys its message in a comfortable language. The last chapter leaves the reader at the beginning of another, but a safer, voyage. A summary is included at the end of each chapter. Brings ship operations up to date and gives information on improving professional skills of personnel. The author writes with the

benefit of valuable experience about practical work on a ship. Includes a discussion of piracy at sea - a phenomenon that has become a major threat at sea today.
