*Cross-examination of Expert Witnesses* John Wiley & Sons

Today, financial clients are profoundly skeptical. They've been burned. Their consultants and advisors talk too much, use too much confusing technical jargon, work from too many boilerplate scripts, repeat too many generic caveats and useless disclaimers. Above all, clients say, their advisors don't listen well, and don't

link their own needs and views to the recommendations they present. To succeed in today's radically new environment, financial advisors must first transform the way they communicate. In *The Financial Professional's Guide to Communication*, one of the world's leading experts on the financial client relationship shows them how to do precisely that. Drawing on his experience training elite financial professionals worldwide, Bob Finder shows how to actively listen, speak plainly with precision and passion, and engage clients with uncommon effectiveness. Finder demonstrates how to focus relentlessly on what matters most to each individual client, and then deliver intensely relevant recommendations with clarity and impact, in your own voice. You'll learn how to bring imagination, creativity, and even entertainment to your presentations and conversations, and use constructive criticism to keep improving with every new client meeting. Using these proven techniques, you can deliver truly extraordinary levels of professionalism and service, gain the powerful new competitive edge you're desperately searching for

– and earn equally powerful rewards for yourself.

Financial statements facilitate the communication between corporations and various stakeholders. The integrity, stability and transparency of such communication help preserving Hong Kong as a top global financial centre. To many laypersons, looking through financial statements can be like reading novels in a foreign language, with a sea of jargon obscuring the statements' true meaning. Financial Analysis in Hong Kong 2nd Edition is a product of experience, feedback and chapter review as well as an update of the changes in practices, guidelines, standards and legislations since its 1st edition in 2008. This 2nd edition provides a clear, concise reference for analysing corporations' financial statements. Based on the evaluations of published financials, this book is a convenient standalone guide for both novices and financial professionals in the boardroom and beyond.

Criminal and terrorist organisations are increasingly turning to white collar crime such as fraud, e-crime, bribery, data and identity theft, in addition to more violent activities involving kidnap and ransom, narcotics and arms trafficking, to fund their activities and, in some cases pursue their cause. The choice of victims is global and indiscriminate. The modus operandi is continually mutating and increasing in sophistication; taking advantage of weaknesses in the system whether they be technological, legal or political. Countering these sources of threat finance is a shared challenge for governments, the military, NGOs, financial institutions and other businesses that may be targeted. Shima Keene's *Threat Finance* offers new thinking to equip any organisation regardless of sector and geographical location, with the knowledge and tools to deploy effective counter measures to tackle the threat. To that end, she brings together a wide variety of perspectives - cultural, legal, economic and technological - to explain the sources, mechanisms and key intervention methodologies. The current environment continues to favour the criminal and the terrorist. *Threat Finance* is an essential read for fraud and security practitioners, financial regulators, policy-makers, intelligence officials, judges and barristers, law enforcement officers, and researchers in this field. Dr Keene offers an antidote to the lack of good, applied, research; shortcomings in in-house financial and forensic expertise; misdirected financial compliance schemes; legal and judicial idiosyncrasies; unhelpful organisation structures and poor communication. She argues convincingly for a coherent, aggressive, informed and cross-disciplinary approach to an ever changing and rapidly growing threat.

Learn what to expect—and what's expected—as an expert witness Serving as a financial expert witness or consultant in lawsuits is a stressful, challenging, and tough business. In *Financial Expert Witness Communication: A Practical Guide to Reporting and Testimony*, financial forensic expert Bradley J. Preber leverages more than 30 years of experience to create a practical guide for financial expert witnesses as they face litigation reporting and testimony. *Financial Expert Witness Communication* covers all areas of financial litigation including

accounting, financial forensics, forensic technology, and damages—all from the point of view of an expert witness. The book is especially helpful for those who expect to be formally designated as an expert witness; however, it is also appropriate for financial forensic accountants, litigation consultants, and attorneys as they navigate the unique playing field of the financial litigation process. This book gives financial experts strategies to defend the analysis, conclusions, and expert opinions they have at their disposal. It also provides thorough explanations of compliance, data limitations, and due diligence as well as how to handle demanding legal counsel, with a goal of better preparing them for the entire legal process. The book is part of the Wiley Corporate F&A Series and was created as an educational resource for nonattorney financial experts involved with U.S.-based civil litigation or alternative dispute resolution proceedings. It takes a well-rounded approach by including special chapters on such concepts as retention, privilege, responsibilities, ethics, and testimony, all written by a nationally recognized expert. As a bonus, the companion website presents an additional expert witness case study and guidelines for fulfilling an expert witness role.

There is no end in sight to the frequency with which physicians, nursing professionals and other healthcare providers will become lawsuit targets in our litigious society. While politicians, practitioners, insurance companies and trial attorneys debate the nation's chronic malpractice crisis, suits continue to be filed. In addition, once COVID-19 is behind us and the unprecedented public support for health care providers wanes, as it will, it is anticipated that physicians and nurses will become malpractice defendants to a remarkable degree. National legislative fact-finding committees and investigative bodies, which may be charged with the responsibility of pursuing a solution, likely will never achieve a global remedy. Although curtailed by some states, national legislation has not addressed baseless malpractice suites or grossly excessive monetary verdicts. Another approach exists, however. Health care providers can impact the existing system and influence the malpractice environments in a tangible, positive and powerful fashion. Although there will be debate over tort reform in order to bring some degree of protection to the malpractice defendant, individual case success, defined from the defendant's perspective as a no-cause trial verdict, can be realized if well-credentialed and experienced health care professionals are willing to assist the malpractice defense bar as expert witnesses. The benefits to the health care community and the individuals who are willing to participate are innumerable and worth considering.
