This book examines the development of innovative modern methodologies towards augmenting conventional plant breeding, in individual crops, for the production of new crop varieties under the increasingly limiting environmental and cultivation factors to achieve sustainable agricultural production, enhanced food security, in addition to providing raw materials for innovative industrial products and pharmaceuticals. This Volume 4, subtitled Nut and Beverage Crops, focuses on advances in breeding strategies using both traditional and modern approaches for the improvement of individual plantation crops. Included in Part I, eleven important nut species recognized for their economical and nutritional importance including Almond, Argan, Brazil nut, Cashew nut, Chestnut, Hazelnut, Macadamia, Peanut, Pine nut, Pistachio and Walnut. Part II covers two popular beverage species, coffee and tea. This volume is contributed by 53 internationally reputable scientists from 13 countries. Each chapter comprehensively reviews the modern literature on the subject and reflects the authors own experience.

What you would have said had you thought of it last night at the bar. Meet Man: He's witty, carefree, and probably not sober. He's Dean Martin meets Jack Benny, Don Draper, and Jack Donaghy. He imparts upon readers his clever, unabashed musings of romance, party culture, and bachelorhood. The life of the party, the collected contemplations in Man v. Liver will amuse and inform aspiring connoisseurs of class. In Man v. Liver, Man expels his alcohol-fueled wisdom to all who yearn to encapsulate themselves in a life of forgotten nights and fine tailored suits--which, as he will tell you, are handy to sleep in if you wish to be the best dressed at breakfast. Man v. Liver is a collection of witty musings accompanied by their creator: a roughly sketched, style-conscious bachelor who's never short on quips aimed at fellow party guests, dates, and, of course, his beloved liver.

Custom Rifles was a tour de force in the world of customized rifles when it was originally published in the 1950s, and it is still relevant today. The custom rifle is much more than just another shooting implement. Certainly, accuracy may be greatly improved over a particular rifle's off-the-shelf cousins, but the main reason that people customize rifles is to take advantage of the skills of the individual gunsmith and stockmaker to produce something that fits the individual needs of the owner. In this book, noted author and rifleman Jeff Cooper explains the different designs of action, custom barrels, the best types of wood for making stocks and of course the popular calibers of ammunition in use at the time, many of which are still with us today. This is more than just a book for the would-be customizer. It offers excellent information on what improves or affects the performance of a fine rifle.

"Riflecraft has been completely ignored since World War II", said Jeff Cooper, America's foremost rifle instructor. To remedy this situation, he took it upon himself to set down the fine art of the rifle before it was lost forever. In his no-holds-barred style, Cooper instructs you in everything you need to know about shooting the rifle, while entertaining you with tales of marksmanship, combat and big-game hunting.

My Dying Breath Librinova

Originally written in the 1950s, *Guns of the Old West* is a factual account of the guns used during, and after, one of the most romanticized and often misconstrued periods in American history. It covers a wide array of firearms, from the smallest of hideaway pistols - the Derringer - to the largest of Colt's single-action revolvers, the more recent Mauser "broomhandle," and the Colt 1911 auto pistol. Illustrated throughout, this book describes not only the evolution of fighting pistols and rifles during the 1800s and before, but also the men who created and used them. Of particular interest is the chapter titled "Frontier Life Insurance" that defines the code by which men lived and fought with their pistols. It was a time when the handgun was both a defensive and offensive weapon, much more than today, when it is considered mainly for defense. The chapter on "The Long Guns" covers the development of frontier rifles, from the famous Kentucky rifle of the plains and the mountain man's Hawken to the ever-popular Winchester lever actions.

Immediately following the Civil War, the United States Ordnance Department reported it had purchased 128,575 Remington revolvers during the conflict. During the Franco-Prussian War in 1870-71, Samuel Remington acted as an agent to acquire arms for the French War Ministry. Fifteen to twenty thousand Remington New Model Army revolvers were purchased from the Ordnance Department and sent to France. Donald Ware devoted twenty-five years of research in the Ordnance Department archives, the Remington factory's records, and Army and Navy records to assemble this detailed examination of the development and evolution of Remington revolvers from the beginning of the Civil War through the end of the Indian wars. In addition to information about the revolvers themselves, Ware shares tidbits that he uncovered along the way. For example, part of the equipment issued the Civil War soldier was a bullet mold for his revolver. During the War, the Ordnance Department issued combustible ammunition for revolvers, making the mold a superfluous appendage. To avoid carrying the extra weight, the mold was usually tossed away. In 1863 the Ordnance Department notified Remington there was no need to furnish molds with the revolvers and therefore saved the government eighteen cents on each revolver. "The Remington Society of America hereby endorses, and takes pleasure in recommending, Remington Army and Navy Revolvers, 1861-1888 by Don Ware. . . . this book is well researched, documented, factual, and quite informative. It reflects an enormous amount of research in primary documents and is a highly definitive work on these firearms. It will be a valuable asset for students and collectors of the Remington large frame revolvers field of antique arms and should become a standard reference."-- Richard J. Shepler, President, Remington Society of America
