 Acclaimed church leader, blogger, founder and chief strategic officer of The Unstuck Group, Tony Morgan unpacks the lifecycle of a typical church, identifies characteristics of each phase, and provides practical next steps a church can take to move towards sustained health. Think about your church for a moment. Is it growing? Is it diminishing? Is it somewhere in between?  
 Acclaimed church leader, blogger, and founder and chief strategic officer of The Unstuck Group, Tony Morgan has identified the seven stages of a church's lifecycle that range from the hopeful and optimistic days of launch, to the stagnating last stages of life support. Regardless of the stage in which you find your church, it carries with it the world's greatest mission—to "go and make disciples of all the nations . . ." With eternity at stake the Church should be doing most everything within its power to see lives changed forever. The Church should strive for the pinnacle of the lifecycle, where they are continually making new disciples and experiencing what Morgan refers to as "sustained health." In The Unstuck Church, Morgan unpacks each phase of the church lifecycle, and offers specific and strategic next steps the church leader can take to find it's way to sustained health . . . and finally become unstuck. The Unstuck Church is a call for honest an assessment of where your church sits on the lifecycle, and a challenge to move beyond it.

 A Simple Mindset Tweak Will Change Your Life. After a fifteen-year nightmare operating a stagnant service business, Sam Carpenter developed a down-to-earth methodology that knocked his routine eighty-hour workweek down to a single hour—while multiplying his bottom-line income more than twenty-fold. In *Work the System*, Carpenter reveals a profound insight and the exact

uncomplicated, mechanical steps he took to turn his business and life around without turning it upside down. Once you "get" this new vision, success and serenity will come quickly. You will learn to: • Make a simple perception adjustment that will change your life forever. • See your world as a logical collection of linear systems that you can control. • Manage the systems that produce results in your business and your life. • Stop fire-killing. Become a fire-control specialist! • Maximize profit, create client loyalty, and develop enthusiastic employees who respect you. • Identify insidious "errors of omission." • Maximize your biological and mechanical "prime time" so that you are working at optimum efficiency. • Design the life you want—and then, in the real world, quickly create it! You can keep doing what you have always done, and continue getting mediocre, unsatisfactory results. Or you can find the peace and freedom you've always wanted by transforming your business or corporate department into a finely tuned machine that runs on autopilot!

Economic development in the long run is seen as a process of structural change that is affected by economic growth. Malaysia is

one of the middle-income economies that are going through rapid structural change. Since the mid 1980s it has changed to an industrially based economy with large-scale export of electrical and electronic components. However, thirty years after Malaysia's re-distributive policies have been exercised, regional inequality still exists. This book examines the nature and impact of regional policies in relation to the patterns of demographic and economic structural change and in relation to growth, distribution and income disparities across regions in Peninsular Malaysia. The book also explores the degree to which differences in regional manufacturing distribution and concentration have contributed to regional inequality. It concludes with a number of recommendations for regional policies that will reduce this inequality.
