In his latest offering, John Davis tackles the "human" side of a lean initiative -- cultivating a lean culture and gaining employee buy-in. How managers deal with these issues will ultimately determine their success. *Leading the Lean Initiative: Straight Talk on Cultivating Support and Buy-in* shows you how to lead a lean effort and effectively manage change. It is a practical manual for the new manager. Though directed at plant managers, and specifically those new to their jobs, this book benefits anyone taking on a

leadership role. Davis provides complete direction on the crucial first steps and advise on competently responding to the "unknown and unexpected." In addition the book covers how to: Gain the respect and active support of the workforce. Work effectively with unions and customers. Create a culture for change. Actively seek out key people in your organization. Diplomatically buck the system. Extend lean to the entire enterprise. Develop and effectively earmark your plan for operation. Cultivate a winning relationship with your boss. Deal with major setbacks in business conditions. Throughout the text, Davis weaves the story of Jim Warring, a plant manager who is new to the job, detailing his frustrations, challenges, and accomplishments, and

how he handles the daily responsibilities of a plant manager. At the end of each chapter, Davis rates Warring on how he performed in his role as plant manager and as a leader of the plant's lean initiative by presenting "The Warring Scorecard." Davis points out where he succeeded, and where he made some serious mistakes. Leading the Lean Initiative: Straight Talk on Cultivating Support and Buy-in, is a valuable resource or all managers in any industry. This book will show you how to effectively lead in your organization and how to cultivate a cooperative environment.

This book introduces the readers to the new concept of cognitive cities. It demonstrates why cities need to become cognitive and why therefore a concept of cognitive city is needed. It highlights the main building blocks of cognitive cities and illustrates the concept by various cases. Following a concise introductory chapter the book features nine chapters illustrating various aspects and dimensions of cognitive cities. The logic of its structure proceeds from more general considerations to more specific

illustrations. All chapters offer a comprehensive view of the different research endeavours about cognitive cities and will help pave the way for this new and innovative approach to governing cities in the future.

Ina Ferris examines the way in which the problem of 'incomplete union' generated by the formation of the United Kingdom in 1800 destabilised British public discourse in the early decades of the nineteenth century. Ferris offers the first full-length study of the chief genre to emerge out of the political problem of Union: the national tale, an intercultural and mostly female-authored fictional mode that articulated Irish grievances to English readers. Ferris draws on current theory and archival research to show how the national tale crucially intersected with other public genres such as travel narratives, critical reviews and political discourse. In this fascinating study, Ferris shows how the national tales of Morgan, Edgeworth, Maturin, and the Banim brothers dislodged key British assumptions and foundational narratives of history, family and gender in the period.

Designed for both the student and hobbyist, this updated revision is an introduction to the theory and practice of electronics including advances in microcontrollers, sensors, and wireless communication. Each chapter contains a brief lab to demonstrate the topic under discussion, then moves on to use all of the knowledge mastered to build a programmable robot (Arduino and Netduino). New material on using Raspberry Pi and Python has been included. The companion files include short videos of the labs, soldering skills, and code samples for programming of the robot. Covering both the theory and also its practical applications, this text leads the reader through the basic scientific concepts underlying electronics, building basic circuits, learning the roles of the components, the application of digital theory, and the possibilities for innovation

by combining sensors, motors, and microcontrollers. It includes appendices on mathematics for electronics, a timeline of electronics innovation, careers in electronics, and a glossary. **FEATURES:** Includes companion files with over twenty video tutorials on currents, soldering, power supply, resistors, decoder circuits, Raspberry Pi, animations of featured circuits and more (files also available from the publisher for downloading) Features a chapter on using Raspberry Pi and Python in electronic projects and a new chapter on Cybersecurity and the Internet of Things (IoT) Leads the reader through an introductory understanding of electronics with simple labs and then progressing to the construction of a microcontroller-driven robot using open source software and hardware (Netduino and Arduino versions) Presents theoretical concepts in a conversational tone, followed by hands-on labs to engage readers by presenting practical applications.

#### **Five Rules for Your Economic**

**Liberation** Lippincott Williams & Wilkins True power in this world comes from economic independence, but too many people have too much month left at the end of their money. John Hope Bryant, founder and CEO of Operation HOPE, illuminates the path toward liberation that is hiding in plain sight. His message is simple: the supermajority of people who live in poverty, whom Bryant calls the invisible class, as well as millions in the struggling middle class, haven't gotten "the memo"—until now. Building on his personal experience of rising up from economically disadvantaged circumstances and his work with Operation HOPE, Bryant teaches readers five rules that lay the foundation for achieving financial freedom. He emphasizes the inseparable connection between "inner capital" (mindset, relationships, knowledge, and spirit) and "outer capital" (financial wealth and property). "If you have inner capital," Bryant writes, "you can never be truly poor. If you lack inner capital, all the money in the world cannot set you free." Bryant gives readers tools

for empowerment by covering everything from achieving basic financial literacy to investing in positive relationships and approaching wealth with a completely new attitude. He makes this bold and controversial claim: "Once you have satisfied your basic sustenance needs—food, water, health, and a roof over your head—poverty has more to do with your head than your wallet." Bryant wants to restore readers' "silver rights," giving them the ability to succeed and prosper no matter what very real roadblocks society puts in their way. We have more power than we realize, if only we can recognize and claim it. "We are our first capital," Bryant writes. "We are the CEOs of our own lives."

One of the most profound changes in business and society is the emergence of the post-Millennial generation, Gen Z. While every new generation has faced its share of disruption in technology, economics, politics and society, no other generation in the history of mankind has had the ability to connect every human being on the planet to each other and in the process to provide the opportunity for each person to be fully educated, and socially and economically engaged. What might this mean for business, markets, and educational institutions in the future? In this revolutionary new book, *The Gen Z Effect: The Six Forces Shaping the Future of Business*, authors Tom Koulopoulos and Dan Keldsen delve into a vision of the future where disruptive invention and reinvention is the acknowledged norm, touching almost every aspect of how we work, live and play. From radical new approaches to marketing and manufacturing to the potential obliteration of intellectual property and the shift to mass innovation, to the decimation of our oldest learning institutions through open source and adaptive learning, *The Gen Z Effect* provides a mind-bending view of why we will need to embrace Gen Z as the last, best hope for taking on the world's biggest challenges and opportunities, and how you can prepare yourself and your business for the greatest era of disruption,

prosperity, and progress the world has ever experienced.

*A Newsletter for the University of the Witwatersrand Community* Routledge Consumer Product Innovation and Sustainable Design follows the innovation and evolution of consumer products from vacuum cleaners to mobile phones from their original inventions to the present day. It discusses how environmental concerns and legislation have influenced their design and the profound effects

these products have had on society and culture. This book also uses the lessons from the successes and failures of examples of these consumer products to draw out practical guidelines for designers, engineers, marketers and managers on how to become more effective at product development, innovation and designing for environmental sustainability.

don't remember to this day where we all slept, though there was a funeral now and then to thin us out. This is the powerful story of two hard-driven men – one a celebrated English novelist, the other a successful Irish entrepreneur – and of their sons, in whom are invested all their fathers' hopes and ambitions. Oliver Essex and Rory O'Riorden grow up as friends, but in the years after the Great War their fathers' lofty plans have unexpected consequences.
