William McDonough, architect, author and pioneer of the circular economy talks to us about design principles for the creating in today's world. It's called "Cradle to cradle" and it's design thinking that marks a tremendous departure from the way we currently make and take things to market. It challenges the linear economy's "business as usual" approach by closing the loop on "take, make, waste".

William McDonough on Cradle to Cradle - The Beautiful Truth

William McDonough was quoted in Amazon's press release saying: "Cradle to Cradle certification provides a framework for product optimization based on the principles of designing with safe and healthy materials, using clean renewable energy and water, celebrating diversity, and eliminating the concept of waste," said McDonough.

William McDonough Waging Peace Through Commerce

Cradle-to-cradle design (also referred to as 2CC2, C2C, cradle 2 cradle, or regenerative design) is a biomimetic approach to the design of

products and systems that models human industry on nature's processes, where materials are viewed as nutrients circulating in healthy, safe metabolisms. The term itself is a play on the popular corporate phrase "cradle to grave", implying that the C2C model is sustainable and considerate of life and future generations—from the birth, or "cradle", of one ...
