"Clever, surprisingly fast-paced, and enlightening." —Forbes Most new products fail. So do most businesses. And most of us, if we are honest, have experienced a major setback in our personal or professional lives. So what determines who will bounce back and

follow up with a home run? What separates those who keep treading water from those who harness the lessons from their mistakes? One of our most popular business bloggers, Megan McArdle takes insights from emergency room doctors, kindergarten teachers, bankruptcy judges, and venture capitalists to teach us how to reinvent ourselves in the face of failure. The Up Side of Down is a book that just might change the way you lead your life.

The Upside-Down Magic kids are back in another topsy-turvy adventure in the next installment of this New York Times bestselling series! It's Big Night in Dunwiddle . . . and that means the whole school has a sleepover like no other. For one night every year, magic students run through the halls, hunting for the objects that will win them a super special prize. Nory is super excited for the scavenger hunt. Not only because she likes winning, but also because if her team wins, she thinks there's a chance her best friend Elliott won't move away to attend super snobby Sage Academy. Sebastian is a little less excited once the hunt is on. Yes, he has magical powers that help his team -- like being able to see invisible things or anything that makes a sound. The problem is that the really loud sounds are hurting him . . . and nobody seems to care. The kids in Upside-Down Magic know their five F's (Flares, Flyers, Fuzzies, Flickers, and Fluxers) -- but to win this night, a sixth F is the most important . . . Friendship. This Ambigram Book Has Two Stories in One Scholastic Inc. Illus. in full color. A bear explores a carton on a truck and gets carried away. By the time he has returned, the reader will be exposed to the concepts of "inside, outside, upside down."

Amigo, a black retriever whose name means "friend" in Spanish, loves having someone rub his tummy and sleeping with his favorite stuffed bear as a pillow. As he drifts off to sleep, he gives a deep sigh and rolls upside down. When he's awake, the dog chases all animals--actually, anything with four legs. His owners don't give him many chances to chase things, so he dreams about them. The problem is he always winds up in trouble. By the story's end, it is hoped that he has learned that chasing animals is not a good idea. Notice Amigo's favorite bear doing something in each of the illustrations. He may be hidden or not! Is the bear real or not? It's up to you to find out.

"Human beings have been smart enough to turn nature to their ends, generate vast wealth for themselves, and double their average life span. But are they smart enough to solve the problems of the 21st century?" -- Thomas Homer-Dixon In The Ingenuity Gap, Thomas Homer-Dixon, "global guru" (the Toronto Star), asks: is our world becoming too complex, too fast-paced to manage? The challenges facing us converge, intertwine, and remain largely beyond our ken. Most of us suspect the "experts don't really know what's going on; that as a species we've released forces that are neither managed nor manageable. We are fast approaching a time when we may no longer be able to control a world that increasingly exceeds our grasp. This is "the ingenuity gap" -- the term coined by Thomas Homer-Dixon -- the critical gap between our need for practical, innovative ideas to solve complex problems and our actual supply of those ideas. Through gripping narrative stories and incidents that exemplify

his arguments, he takes us on a world tour that begins with a heartstopping description of the tragic crash of United Airlines Flight 232 from Denver to Chicago and includes Las Vegas in its desert, a wilderness beach in British Columbia, and his solitary search for a little girl in Patna, India. He shows how, in our complex world, while poor countries are particularly vulnerable to ingenuity gaps, our own rich countries are not immune, and we are caught between a requirement for ingenuity and an increasingly uncertain supply. When the gap widens, political disintegration and violent upheaval can result, reaching into our own economies and daily lives in subtle ways. In compelling, lucid, prose, he makes real the problems we face and suggests how we might overcome them.

**The World Turned Upside Down** Simon and Schuster  
Determined city girl Dory Oslo, unwillingly agrees when her mom tells her she should plant a garden. How could something grow in their city plot with only a piece of sun shining above the buildings? Her determination to wake up those plants is strong and what follows is nothing short of a miracle. Only something highly unusual is happening, or is it? This story uses gardening as a tie-in to discussions about not giving up, trying something new, being a strong-minded girl and of course, the beauty of nature itself.

In "The Upside of Down," Dr. Stowell presents tribulation as God's tool to prepare Christians for His use. It is through trials that God draws us closer if we will rely on Him. Citing numerous passages of Scripture and the personal experience of Christians who have suffered, Stowell explains that ordeals will come, but we can respond productively in the midst of trouble if we remember that there is an ultimate purpose behind our suffering and that the "end of the ride is God's responsibility."

New edition with updated content. In a world shaped by Covid-19

and characterised by fake news, manipulated feeds of information and divisive social-media agendas, it's easy to believe that our time is the most challenging in human history. It's just not true. It is a time of extraordinary opportunity. But only if you have the right mindset and attitude. Fear of the future breeds inaction and leads to strategic paralysis. Problem-solvers thrive in chaotic and uncertain times because they act to change their future. Winners recognise that in a world of growing uncertainty, you need to resort to actions on things you can control. A robust mindset is the one common characteristic Bruce Whitfield has identified in two decades of interrogating how South Africa's billionaires and start-up mavericks think differently. They don't ignore risk or hope that problems will go away. They constantly measure, manage, consider and weigh up opportunities in a tumultuous sea of uncertainty and find ways around obstacles. If, as Nobel Prize-winning economist Robert Shiller suggests, the stories we tell affect economic outcomes, then we need to tell different stories amidst the noise and haste of a rapidly evolving world.

adventure. . . . A rare, special book, Toots and the Upside-Down House combines fantasy and adventure with the real, everyday issues of love and loss. This is a dazzling debut novel, one that children--and parents--will return to again and again.

After graduating from college, Jen Gotch was living with her parents, heartbroken and lost, when she became convinced that her skin had turned green.
