Here is a typical classroom scenario: out of the thirty children, two-thirds speak a different language at home and only speak English at school. Even though many pupils' English skills are almost non-existent, teachers are expected to provide the national curriculum for every child in the class. Teaching Children English as an Additional Language solves this problem with a ten-week teaching programme of units and lesson activities for children aged seven-eleven (Key Stage 2) new to English. It will help these children learn some very basic English sentences, questions and

vocabulary, to get them through regular day-to-day routines more easily. By offering a flexible step by step approach this book helps EAL teachers to: identify learners' individual needs teach grammar and vocabulary support teaching through speaking and listening assess pupils to inform future planning The programme also contains emergency lessons to support learners in the first three days, cross curricular links, ways of using a home-school learning book and an opportunity for the child to make a booklet about themselves. It fosters the child's home language, incorporates different learning styles as well as including a wealth of carefully tailored,

themed resources. The programme is complete with activities, resources and assessment materials and helpful tips on how to develop a successful EAL department.

This book explores teachers' cognitions about the teaching of writing in English as a foreign language (EFL) and their teaching practice, as well as factors influencing the formation and reformation process of their cognition. Taking stock of Bakhtin's dialogism as the theoretical framework, the authors argue that the formation and reformation of teacher cognition is a dialogic process. A systematic

analysis of participating teachers' cognition formation and re-formation process suggests the highly individual nature of teachers' cognitions. EFL researchers and teachers, teacher educators, teacher education policymakers, university administrators and EFL textbook writers could draw on the findings of the study to provide better resources to implement the teaching of EFL writing more effectively. The study has adopted a mixed-methods approach, whose quantitative results show the patterns and differences of teacher cognition among teachers of different backgrounds and with different schooling, education and working

experiences. The qualitative findings show in detail teachers' cognition formation and reformation processes and the factors contributing to such processes, revealing convergence and divergence of teachers' stated cognitions, with a focus on the discrepancy between teacher cognition and teaching practice. These are useful lenses through which researchers and teachers will find significant implications for offering EFL writing instruction more effectively.

(1200+ Solved MCQs) Cambridge University Press Contemporary English second edition has refined the content and skills adult ESL students need to know to survive and thrive living in the United States. The emphasis on grammar, vocabulary, graphic literacy, critical thinking skills, life skills, and workplace skills has all been retained and presented in meaningful contexts through topics of high interest to adult students. Lessons are self-contained, remaining appropriate for both standard and open enrollment situations. Student Book Features Student Book interiors are now in 4-color with more real-life photographs. New vocabulary is

introduced twice in each student unit along with practice exercises. It is then recycled throughout the series for maximum exposure. Specific workbook practice, plus one activity master per unit in the Teacher's Edition extends this exposure. Grammar structures are presented then recycled twice throughout the series - first in an informal review and second in a formal review - to enable students to revisit and expand upon their grammar acquisition. The 2nd edition provides for a more logical progression of grammar scope and sequence. Organizing Your Ideas (Books 1 and 2 only) teaches students how to think graphically using

organizers like idea maps, Venn Diagrams, and T-charts. Graphic Literacy Activities (Books 3 and 4 only) familiarize students with bar graphs, tables, and charts to help them understand what they read on the job or in the newspapers. Community involvement focus - one page per unit, tied in specifically with the unit topic - helps students become more participatory in their jobs, communities, and families. Notes in the Annotated Teacher's Editions also provide more ideas for student participation.
