 Carburetter  
 Tuning Guide - Amal  
 Important notes  
 about CV carb tuning! To properly tune,  
 you MUST: 1. Have selected the BEST  
 main jet for full throttle power (not just a  
 "good" main jet - we mean "the BEST  
 main jet" for power at high rpm). That  
 eliminates the common severe tweaking  
 of the midrange and lower tuning ranges  
 to compensate for a "wrong" main jet.

2. CV Carb Tuning Procedures - Factory  
 ProSolution Check the air filter to see if it  
 is blocked or dirty. Remove the filter and  
 put in new plugs to see if idle improves  
 Adjust the mixture screw to lean the

 whether you have a fuel-mixture screw  
 or... Install a smaller pilot jet. Move down  
 to a marginally ...Mikuni Tuning and  
 Jetting Guide - THE VINTAGE BIKE  
 BUILDER Find the adjustment screws on  
 the front of the carburetor. There should  
 be two screws on the front of the  
 carburetor, which are used to adjust the  
 air and fuel mixture. Often these look  
 like flat-head screws and you can use a  
 screwdriver to turn them, adjusting the  
 amount of fuel and air mixing in the  
 carb. How to Adjust a Carburetor: 10  
 Steps (with Pictures) - wikiHow Here's our

simple outline for basic tuning to get you started. 1) Idle Circuit: With your idle circuit, start at 1 1/2 to 2 turns out on the mixture screw and then wind your idle screw back to give a very slow idle whilst at operating engine temp with the bike upright. Tuning Tips & Manual Downloads | Mikunioz The pilot screw on your carb controls the idle to about 1/8 - 1/4 throttle position. The pilot screw, which is also made of brass, is long and skinny with a tapered end and a spring. It typically sits on the outside of the carb body. The exact location of the pilot screw will determine whether it controls the air flow or the fuel flow. Motorcycle Carb Tuning & Rejetting | MotorcycleZombies.com Mikuni Motorcycle Carburetor Theory 101 Motorcycle carburetors look very

complex, but with a little theory, you can tune your bike for maximum performance. All carburetors work under the basic principle of atmospheric pressure. Atmospheric pressure is a powerful force which exerts pressure on everything. Mikuni carburetor operation and tuning H Type Carburetor: Tuning (Multi-Carbs) Remove the air cleaners and carry out the instructions in item 1 (single units) on all carburetors then: 1. (a) Slacken one of the clamping bolts on the throttle spindle interconnections. (b) Disconnect the jet control linkage by removing one or, in the case of triple carburetors, two of the linkage swivel pins. Tuning - Multi - SU Carburetors Linkage Setup. Setting up and adjusting the carburetor linkage is relatively straightforward. In the relaxed position...
