Laboratory Medicine
The Diagnosis Of UW-
OncoPlex™ is a

cancer profiling test
developed by UW
faculty in the
Department of
Laboratory Medicine
and Pathology. The
test uses next-
generation “deep”
sequencing of a
patient’s tumor to
detect characteristic
genetic changes. More
than 350 genes related

to cancer treatment, prognosis, risk, and diagnosis are tested. Learn More Laboratory Medicine & Pathology | UW Medicine, Seattle The Biochemical Genetics Laboratory is concerned with the evaluation and diagnosis of patients and families with inherited metabolic disease. It monitors treatment and differentiates heterozygous carriers from noncarriers of genes by metabolite and enzymatic analysis of physiological fluids and tissues. Laboratory Genetics - Laboratory Medicine and Pathology ... Medical diagnosis (abbreviated Dx or D S) is the process of determining which disease or condition explains a person's symptoms and signs. It is most

often referred to as diagnosis with the medical context being implicit. The information required for diagnosis is typically collected from a history and physical examination of the person seeking medical care. . Often, one or more diagnostic ... Medical diagnosis - Wikipedia The Molecular Genetics Laboratory provides expertise in DNA and molecular genetic testing for both congenital and inherited cancer syndromes. Mayo Clinic board-certified laboratory directors are leaders in the field of genetic testing who continually strive to develop new test methods that improve patient care.
