Assemblies for Mack Trucks The unit
pump injection system (UPS) injects the
fuel into the engine cylinder. It consists
of an electronically controlled unit pump
and a nozzle holder assembly connected
via a precisely adapted high-pressure

line. The unit injector system (UIS) is a nozzle holder assembly with integrated high-pressure pump. Unit-pump-system and unit-injector-system The Unit Pump System (UPS) is a system for diesel direct injection. It is closely related to the Unit Injector System (UIS) and is exclusively available for commercial vehicles. Bosch was the world first manufacturer to market this technology, also known as the unit Pump System. Electronic Unit Injector & Electronic Unit Pump In unit injector (UI) and unit pump (UP) systems, each engine cylinder is served by a separate injection pumping element or injection pump in close proximity to the cylinder. Unit pump (UP) systems enable short high pressure fuel lines by locating the pump close to the injector. Unit Injector

and Unit Pump Systems - DieselNet The N2 Electronic Unit Injector (EUI) is a lightweight, compact unit that injects diesel fuel directly into the combustion chamber. See Figure "N2 Electronic Unit Injector Cross-section". 1. Series 60 - Section 2.3 N2 Electronic Unit Injector ... Definition of Core: The core is the old unit, which was replaced by the new or rebuilt item. Many replacement parts such as pumps, injectors, turbochargers and high pressure oil pumps have a core charge that is associated with the part. Electronic Unit Pump for 2003 - 2006 Mack E7 Series ... Unit pump system and unit injector system
 Electronic Unit Injectors & Unit Pumps (EUI's & EUP's) Introduction The demands for cleaner engine emissions, improved power, quieter operation and better fuel economy has helped inspire the development of even more efficient fuel injection systems. The unit injection system integrates the injection pump and nozzle into a single module.
 Electronic Unit Injectors
 2-08 Early Lucas electronic diesel unit injector A Unit injector (UI) is a high pressure integrated direct fuel injection system for diesel engines, combining the injector nozzle and the injection pump in a single component. The plunger pump used is usually driven by a shared camshaft.
 Unit injector - Wikipedia
 Delphi E3 Diesel Electronic Unit Injector High

speed dual valve operation for accurate control of injection events High pressure injection for optimized combustion and reduced aftertreatment Lightweight, compact design for enhanced efficiency Available with a wide range of high pressure nozzle options Multiple injection capability with ...
 Delphi E3 Diesel Electronic Unit Injector - Delphi Power ...
 The fuel pump is combined with the fuel level sending unit and float in the "fuel pump module assembly," which fits inside the tank through a hole in the top of the tank. The fuel pump assembly is held in place with fasteners or a lock ring, and sealed with a gasket or O-Ring. Replacing the pump module usually requires dropping the fuel tank. The wiring and fuel line connections are on the outside of the tank.
