Review **ATMOSPHERIC SCIENCE \u0026 CLIMATOLOGY**ClimatologyClimatology (from Greek

κλίμα, klima, "place, zone"; and -λογία, -logia) or climate science is the scientific study of climate,

scientifically defined as weather conditions averaged over a period of time.Climatology -

WikipediaClimatology, branch of the atmospheric sciences concerned with both the description of

climate and the analysis of the causes of climatic differences and changes and their practical

consequences.Climatology | meteorology | BritannicaClimatology is the study of the atmosphere

and weather patterns over time. This field of science focuses on recording and analyzing weather

patterns throughout the world and understanding the atmospheric conditions that cause them. It is

sometimes confused with meteorology, which is the study of weather and weather

forecasting.Climatology | National Geographic Societythe science that deals with the phenomena

of climates or climatic conditions.Climatology | Definition of Climatology at

Dictionary.comClimatology is the scientific study of climate. Climate is defined as weather patterns

that have been averaged over a given period of time to obtain a consistent pattern of the expected

atmospheric conditions. Weather is the atmospheric condition of a particular place over a short

period of time, normally a day.What is Climatology? - WorldAtlasPhysical climatology attempts to

explain the properties of climates by the earth-sun geometry, atmospheric composition, ground

characteristics, and the laws of physics. Synoptic climatology draws linkages between physical and

dynamic aspects of the large-scale atmospheric circulation and surface weather tendencies at

regional and local scales.Climatology - an overview | ScienceDirect TopicsClimatology is the study

of the myriad factors that influence weather, and the influence of weather on the environment.

These include water, atmosphere, and geology. Climatology studies all of these things over the

course of time, typically a 30 year cycle. What Does a Climatologist Do?How to Become a

Climatologist | EnvironmentalScience.orgClimatology, or sometimes known as climate science, is

the study of the Earth's weather patterns and the systems that cause them. From the ocean

oscillations to trade winds, pressure systems that drives temperature, airborne particles that

influence local conditions and even the phases of the moon and Earth's wobble all affect the

climate (1).Climatology: The Science of Global Weather Systems over ...Climatology is an

interdisciplinary science of meteorology, geography, geology, oceanography, and physics.

Climatology has undergone significant change in recent years. Due to the noticeable climate

change, climatology today is much more than the study of climate elements and factors: it has

become a decisive factor for the future of our planet.Climatology: Books and Journals |

comprehensive approach, which required dozens of experts in epidemiology, ecology, climatology,

veterinary medicine and entomology, is both costly and relatively rare.Climatology | Definition of

Climatology by Merriam-WebsterWeather and climate are integral parts of the Earth system. The

monitoring of meteorological variables, together with the knowledge and modelling of underlying

processes, are key to understanding our interaction with the natural environment.MSc Applied

Meteorology and Climatology - postgraduate ...Time-series analysis is routinely found in physics,

electronics, geophysics, astrophysics, climatology, computer science and biometric applications. From the Cambridge English Corpus Another significant omission is any discussion of geography, climatology and environmental history, all areas where there is considerable scholarly activity. CLIMATOLOGY | meaning in the Cambridge English Dictionary The description and scientific study of climate. Descriptive climatology deals with the observed geographic or temporal distribution of meteorological observations over a specified period of time. Scientific climatology addresses the nature and controls of the earth's climate and the causes of climate variability and change on all timescales. Climatology - Glossary of Meteorology Climatology is the study of the slowly varying behavior of Earth's atmosphere, oceans, and land (climate) over a period of time. It can also be thought of as weather over a period of time. It is considered a branch of meteorology. A person who studies or practices climatology professionally is known as a climatologist. How Climatology Is Different From Meteorology Climatology is sometimes defined as the geographical part of meteorology. The factual data on the types of climate and their distribution on earth, which are obtained from statistical analysis of series of long-term meteorological observations, are the concern of climatography.
