 This volume presents
 current developments in
 the field of finance from
 an emerging markets
 perspective. Featuring
 most of the contributions
 presented at the second
 International Conference
 on Economics and Finance
 (ICEF-2020), Goa, India,
 this volume serves as a
 valuable forum for
 discussing financial
 performance and well-
 being, economic policy
 uncertainty, efficiency of
 commodity markets and
 various recent trends in
 the banking and financial
 sector. It provides an
 analysis of the current
 state of the financial
 sector and proposes
 solutions to challenging
 topics including
 bankruptcy, audit quality
 and liquidity crises.

Popular topics such as
 cryptocurrency, stock
 market volatility and
 board governance are
 also covered.

 The 10th International
 Symposium on Process
 Systems Engineering,
 PSE'09, will be held in
 Salvador-Bahia, Brazil on
 August 16-20, 2009. The
 special focus of PSE 2009
 is Sustainability, Energy
 and Engineering. PSE
 2009 is the tenth in the
 triennial series of
 international symposia on
 process systems
 engineering initiated in
 1982. The meeting is
 bringing together the
 worldwide PSE community
 of researchers and
 practitioners who are
 involved in the creation
 and application of
 computing-based
 methodologies for
 planning, design,
 operation, control and
 maintenance of chemical
 and petrochemical
 process industries. PSE'09
 will look at how the PSE
 methods and tools can
 support sustainable
 resource systems and
 emerging technologies in
 the areas of green
 engineering:
 environmentally
 conscious design of

industrial processes. PSE
 methods and tools

 Publications
 Focusing on the use of
 technology in survey
 research, this book
 integrates both theory
 and application and
 covers important
 elements of survey
 research including survey
 design, implementation
 and continuing data
 management.
*Foreign Affairs Manual:
 Visas (4 pts.)* Springer
 This book constitutes
 revised selected papers
 from the 4th European
 Conference on
 Information Literacy, ECIL
 2016, held in Prague,
 Czech Republic, in
 October 2016. The 52 full
 and 19 short papers
 presented in this volume
 were carefully reviewed
 and selected from 259
 submissions. They were
 organized in topical
 sections named: inclusive
 society and democracy;
 employability and
 workplace; various

literacies; reading preference: print vs electronic; theoretical aspects; higher education; discipline based studies; research methods; children and youth; country based studies; academic libraries; librarians; and teaching methods and instruction.

Management Elsevier
This two-volume set of LNCS 13393 and LNCS 13394 constitutes - in conjunction with the volume LNAI 13395 - the refereed proceedings of the 18th International Conference on Intelligent Computing, ICIC 2022, held in Xi'an, China, in August 2022. The 209 full papers of the three proceedings volumes were carefully reviewed and selected from 449 submissions. This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this

conference was "Advanced Intelligent Computing Technology and Applications". Papers focused on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

Safety in the Mining Industry Morgan & Claypool Publishers
Our world is being revolutionized by data-driven methods: access to large amounts of data has generated new insights and opened exciting new opportunities in commerce, science, and computing applications. Processing the enormous quantities of data necessary for these advances requires large clusters, making distributed computing paradigms more crucial than ever. MapReduce is a programming model for expressing distributed computations on massive datasets and an execution framework for large-scale data processing on clusters of commodity servers. The programming model provides an easy-

to-understand abstraction for designing scalable algorithms, while the execution framework transparently handles many system-level details, ranging from scheduling to synchronization to fault tolerance. This book focuses on MapReduce algorithm design, with an emphasis on text processing algorithms common in natural language processing, information retrieval, and machine learning. We introduce the notion of MapReduce design patterns, which represent general reusable solutions to commonly occurring problems across a variety of problem domains. This book not only intends to help the reader "think in MapReduce", but also discusses limitations of the programming model as well. This volume is a printed version of a work that appears in the Synthesis Digital Library of Engineering and Computer Science. Synthesis Lectures provide concise, original presentations of important research and development topics, published quickly, in digital and print formats. Theories and Application Springer Nature
 Personality Disorders: Toward the DSM-V offers a scientifically balanced evaluation of competing theoretical perspectives and nosological systems for personality disorders. Editors William T. O'Donohue, Scott O. Lilienfeld, and Katherine A. Fowler have brought together recognized authorities in the field to offer a synthesis of competing perspectives that provide readers with the richest and most nuanced assessment possible for each disorder. The result is a comprehensive, current, and critical summary of research and practice guidelines related to the personality disorders.

NBS Special Publication Springer Nature
 Reflective practice is at the heart of effective teaching, and this book helps you develop into a reflective teacher of ICT. Everything you need is here: guidance on developing your analysis and self-evaluation skills, the knowledge of what you are trying to achieve and why, and examples of how experienced teachers deliver successful lessons. The book shows you how

to plan lessons, how to make good use of resources and how to assess pupils' progress effectively. Each chapter contains points for reflection, which encourage you to break off from your reading and think about the challenging questions that you face as a new teacher. The book comes with access to a companion website, www.sagepub.co.uk/secondary, where you will find:

- Videos of real lessons so you can see the skills discussed in the text in action
- Links to a range of sites that provide useful additional support
- Extra planning and resource materials. If you are training to teach ICT this book will help you to improve your classroom performance, by providing you with practical advice, but also by helping you to think in depth about the key issues. It also provides examples of the research evidence that is needed in academic work at Masters level, essential for anyone undertaking an M-level PGCE.

 How do people identify with organizations? What role does organizational

identity play in organizational strategy? Identity in Organizations investigates the fundamental character of organizational identity and individual identification with an organization. Through the use of an unconventional, conversational format the reader is drawn into a provocative discussion among key organizational scholars that focuses on three different paradigmatic views of identity: a functionalist perspective, an interpretive perspective, and a postmodern perspective. Similarities and distinctions among these ways of understanding are explored and numerous theoretical and practical insights are gained. This groundbreaking book concludes with a discussion of the relevance of identity as a construct in organizational study and observations on conversation and theory building. Many well-known scholars participate in the conversation, including Jay Barney, Denny Gioia, Mary Jo Hatch, Stuart Albert, Anne Huff, Judi McLean Parks, and Rod Kramer. Identity in Organizations will be of interest to professionals

and students of organizational studies, human resource management, industrial psychology, sociology of work, psychology, and organizational communication. Teaching ICT SAGE For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network. **The Practice of Survey Research** Resources in Education Current Index to Journals in Education Information Literacy: Key to an Inclusive Society How do technology and organization interact to shape organizational structures and processes? What organizational, political and social processes constrain technological development? What forces shape the articulation of organizational and technological systems? Answering these and other pivotal questions,

this volume centres on the role of theory for advancing our knowledge of communication technology in organizations at several levels - micro, group and macro. The distinguished contributors examine richly diverse topics, including telecommunications, communication networks and new media, the use of group decision support systems and discretionary databases. U.S. Government Research Reports This volume provides a precise and comprehensive description of human motivation. Drawing on psychology, education and management, Ford integrates classic and contemporary motivation theory into a unified framework - Motivational Systems Theory - from which he derives 17 principles for motivating people. The book provides concrete examples throughout and includes a chapter on practical applications such as: promoting social responsibility in young people; increasing motivation for learning and school achievement; increasing work productivity and job satisfaction; and helping

people lead emotionally
healthy lives.
