Setting up the classroom is a fundamental part of a teacher's job, as a well-planned, aesthetically pleasing environment encourages children to learn and helps with classroom management. However, knowing how to create this environment is not instinctive and teachers are given little guidance, yet are expected to create a stimulating environment that is conducive to learning. The task can often be daunting and time-consuming, and teachers don't know where to begin. Classroom DIY provides teachers with the answer to these problems. A practical, step-by-step guide, written from firsthand experience, Classroom DIY will enable any primary teacher to make a spectacular job of setting up their room using any materials they have available. Guiding teachers through the process of setting up their space from planning to practice, this book includes advice on: laying out the room: what furniture to use and where best to position it organising areas for specific subjects, including maths, literacy, science and humanities how to create an inspiring classroom on a budget: recycling items for use in the classroom and the homemade approach how the learning environment can inspire and motivate pupils to learn, taking into account multiple intelligences and routines meeting the expectations of senior management teams. With 'teachers' tales' from a range of individuals in different schools and case studies illustrating solutions to teachers' specific problems with their classrooms, this book is must have for all newly qualified and practising teachers looking to inspire their pupils to learn through their classroom environment.

A Practical Guide to Setting and Achieving Goals Shepards/McGraw-Hill

This is the fifth revised edition of the best-selling A Practical Guide for Translators. It looks at the profession of translator on the basis of developments over the last few years and encourages both practitioners and buyers of translation services to view translation as a highly-qualified, skilled profession and not just a cost-led word mill. The book is intended principally for those who have little or no practical experience of translation in a commercial environment. It offers comprehensive advice on all aspects relevant to the would-be translator and, whilst intended mainly for those who wish to go freelance, it is also relevant to the staff translator as a guide to organisation of work and time. Advice is given on how to set up as a translator, from the purchase of equipment to the acquisition of clients. The process of translation is discussed from initial enquiry to delivery of the finished product. Hints are given on how to assess requirements, how to charge for work, how to research and use source material, and how to present the finished product. Guidance is given on where to obtain further advice and professional contacts. This revised edition updates practices in the translation profession and considers the impact of web-based translation offerings. Industry and commerce rely heavily on the skills of the human translator and his ability to make intellectual decisions that is, as yet, beyond the capacity of computer-aided translation.
