The second edition of this book is a practical revision guide for postgraduate students preparing for clinical examinations in internal medicine. Authored by an experienced postgraduate examiner, the book presents a series of short and OSCE cases presented in a uniform format, offering guidance on examination

techniques, common mistakes made by candidates, and typical presentation of findings. Divided into seven sections, the book begins with advice on how to prepare for and pass clinical examinations. The remaining chapters cover cases relevant to different systems of the body - cardiovascular; respiratory; abdominal; neurological; endocrine, rheumatologic, connective tissue and skin; and eye and fundus. Each case provides a summary of diagnosis, differential diagnosis, management, and further information often required in examinations. The questions and model answers are similar to those most frequently encountered in examinations. The comprehensive text is enhanced by illustrations and figures to assist learning and will be useful not only to candidates preparing for postgraduate clinical examinations, but also to undergraduate students. P.A.C.E.S examination. It is also suitable

for undergraduates, postgraduates and practicing clinicians. The book analyses the M.R.C.P P.A.C.E.S examination. It then analyses the principles of clinical methods, describes techniques in detail and gives relevant findings and their causes. In More Detail: A.C.E.S for P.A.C.E.S. starts off with a short discussion of examinations in general and then discusses the M.R.C.P P.A.C.E.S. examination in detail. The next part of the book is an analysis and then a discussion of clinical skills followed by a general outline on how one should approach the development of clinical skills. A detailed discussion of the organ systems follows with a chapter dedicated to each system. Each chapter is divided into three sections. Initially there is a detailed description of clinical method. Next there is an outline of the common conditions that may occur in relation to each system. The final section of each chapter contains a description of clinical findings and the conditions in which they occur. The approach taken by this book is a description of the findings that may occur at each step of the clinical encounter. The last chapter discusses communication and ethics. This chapter begins with an analysis of the way in which candidates are assessed at examinations. It then analyses communication and ethics and describes a method of communication. An appendix is included which gives a summary of history taking and examination techniques for each system.

Clinical Medicine for the MRCP PACES Saunders

This review book comprehensively covers most aspects of the Objective Structured Clinical Examination (OSCE). Each chapter provides a meticulous overview of a topic featured in the OSCE, including general surgery, pediatrics, psychiatry, obstetrics and gynecology, gastroenterology, geriatrics, hematology, and ethics. Common scenarios for each topic are featured in every chapter, accompanied by instructions and tips on how to take a patient's history, diagnose a patient, discuss treatment options, and address patient concerns under each scenario. Possible areas of difficulty, common candidate mistakes made, and important differential diagnosis are outlined in each chapter. The text is also supplemented with check-lists, photographs, and tables for enhanced readability and ease of use. Written by experts in their respective fields, The Objective Structured Clinical Examination Review is a valuable resource for medical students and residents preparing for the OSCE.

Clinical Skills John Wiley & Sons

This classic text is much beloved by medical students and physicians-in-training throughout the English-speaking world, as its many editions indicate. It is chock full of the pearls of clinical wisdom that students and practitioners treasure, and many of these lessons apply to medicine in general. The book was well characterized by a reviewer of an earlier edition for The New England Journal of Medicine: 'If only one book about surgery could be made available to physicians from all specialties, it should probably be Silen's recent revision of Cope's Early Diagnosis of the Acute Abdomen. Since the book first appeared, it has remained the classic treatise on the initial approach to abdominal pain.' Because acute, severe abdominal pain is still a common problem whose misdiagnosis can result in quick death, each generation of beginning physicians is faced with the urgency of learning to make a diagnosis in this high-anxiety situation, and they appreciate the wise, humane, precisely detailed guidance offered by Cope and Silen. For the 22nd Edition, Dr. Silen has again updated the text in a respectful but significant way. He has added a chapter on the increasing disorder of diverticulitis, reexamines the use of analgesics, emphasizes the costs of over-testing, and updates all recommendations regarding trauma, radiologic studies, and therapeutic recommendations.

This classic textbook aims to assist clinicians develop the consultation skills required to elicit a clear history, and the practical skills needed to detect clinical signs of disease. Where possible, the physical basis of clinical signs is explained to aid understanding. Formulation of a differential diagnosis from the information gained is introduced, and the logical initial investigations are included for each system. The first part of the book addresses the general principles of good interaction with patients, from the basics of taking a history and examining, to the use of pattern recognition to identify spot diagnoses. The second

part documents the relevant history, examination and investigations for all the major body systems. The third part illustrates the application of these skills to specific clinical situations. The final part covers preparation for assessments of clinical skills and the use of these skills in everyday practice. The book has accompanying videos demonstrating many of the key clinical examination routines as set out in the book. A new editorial team has undertaken a substantial review of the book's contents and with the help of many new authors has radically revised the order and approach of the text. Several new chapters have been created including a chapter on patients with mental disorders; a chapter covering the approach to a deteriorating patient; a chapter on assessment of patients towards the end of life and two new chapters on applying the key clinical skills during assessments and in practice. The structure of the text has been rationalised with careful use of boxes, tables and figures to set out the concepts for maximum clarity.
