BECKER GATES

A Dictionary of Computer Science Penguin

After 24 years, Special Forces legend Josh Kavanagh has retired from the military. But now that he's home, he's finding that everyone has a different understanding of his motivations, and realizes there are some wounds no amount of time can heal. Josh's traumatized sister Suki, thinks her big brother is a hero and has come home to punish her rapist, the youngest son of a ruthless, crooked billionaire who lives to get revenge on anyone he sees as a threat to his family, wealth, and power. Josh's childhood sweetheart, Rachel, hopes he's returning for her—the fierce girl he left behind when he joined the military. But Rachel doesn't know about Mia, the woman in France ... And Josh isn't coming home alone. The Oath Group, an elite force of private military contractors, is already in Montana waiting for their commander to arrive. The DOD and CIA don't want President Trump to know they hired Josh's Oath Group to examine dangerous white supremacist militias that are threatening the U.S. Constitution. That covert black-ops military operation is starting in Idaho and Montana. Josh and his teams have to get the job done while preserving their anonymity—and their lives.

An Arabic-English Vocabulary of the Colloquial Arabic of Egypt The Floating Press

Including examples of real usage, this handy volume provides clear information about grammar and punctuation that we need on a day-to-day basis in over 300 entries. Revised and updated, The Oxford A-Z of Grammar and Punctuation offers accessible and coherent explanations across a broad range of topics, and is the first port of call for any reader seeking clear, authoritative help with grammar and punctuation. Both easy to use and comprehensive, it is an essential tool for writing at home, in the office, at school, and at college.

Song of Lawino and Song of Ocol Institute of Kiswahili Research University of Dar Es Salaam

The Gospel Hymn Book has been revised to bring it up to date. It combines a mixture of old and new hymns suitable for general and evangelistic use.

Qur'anic Pictures of the Universe "O'Reilly Media, Inc."

Build mobile applications for Nokia's S60 phones using the hot Qt GUI tool This vital primer—written by developers involved in the latest release of Qt—is a must for anyone wanting to learn this cutting-edge programming environment. Qt is a multi-platform, C++ GUI toolkit that allows you to develop applications and user interfaces once, then deploy them across many desktop and embedded operating systems, without rewriting the source code. Now being applied to the S60 platform (Nokia's new, uniform UI), Qt promises to save development resources, cut costs, and get you to market faster. This unique guide helps you master this exciting tool with step-by-step instruction from some of the best developers in the S60 field. Find easy-to-access tips, techniques, examples, and much more. Walks you through installation of the Qt developer platform and SDK Explains the basic Qt environment and how it can save you development time Delves into the extension of Qt for the S60, including communication and sensors Provides plenty of examples to help you quickly grasp concepts Help revolutionize the S60 mobile market and stay ahead of the crowd with your own state-of-the-art applications, developed with Qt and the detailed information in this unique guide.

The Spirit of Prophecy Apress

Describes the comics produced by Marvel in which Stan Lee was involved, from Captain America in 1941 to Spiderman/Kingpin in 1997, also relating the history of Marvel, and the comics industry in general, during this period.

Modeling and Animation Using Blender Marvel

"Rest in Christ reviews the principles of finding rest in Jesus Christ. It shows how sitting at the feet of Jesus can bring genuine spiritual, mental, relational, and physical rest"--

Kamusi Ya Kiingereza-Kiswahili Islamic Book Trust

On July 26, 2003, the 50th anniversary of the Moncada Army Barracks raid in Santiago de Cuba, something unexpected happens. When Fidel Pérez and his brother accidentally tumble to their deaths from their Havana balcony, the neighbors' outcry, "Fidel has fallen," is misinterpreted by those who hear it. The misinformation quickly ripples outward, and it reawakens the city. Three Cubans in particular are affected by the news—an elderly vagrant Saturnina, Professor Pedro Valle, and his student Camilo—all haunted by the past and now forced to confront a new future, perhaps another revolution. Their stories are beautifully intertwined as they converge in the frantic crowd that gathers in La Plaza de la Revolución. By turns humorous and deeply poignant, *The Death of Fidel Pérez* reflects on the broken promises of the Cuban Revolution and reveals the heart of a people with a long collective memory.

Containing the Vernacular Idioms and Expressions, Slang Phrases, Etc., Etc., Used by the Native Egyptians Scientific American

Settle in for a series of spooky tales that will delight even the most discerning reader. This collection of ghost stories from literary luminaries is the perfect choice for curling up in front of a roaring fire or reading aloud on a dark and stormy night.

Quranic Sunnah Arco Pub

This book presents a new study of one of the major themes of the Qur'an. The theme of Qur'anic pictures of the universe treated here pertains to as yet a little explored facet of Islamic cosmology. Through this particular thematic study of the Qur'an the author has made a significant contribution to the contemporary understanding of the scriptural foundation of Islamic cosmology and the present discourse on epistemology of scientific exegesis (tafsir 'ilmy) of the Qur'an. The book offers many new insights that will prove particularly helpful to those interested in deepening their understanding of Qur'anic perspectives on cosmology, the natural sciences, and religion and science. Osman Bakar, who earned a doctorate in Islamic philosophy from Temple University, Philadelphia, is currently Distinguished Professor and Director of Sultan Omar Ali Saifuddin Centre for Islamic Studies (SOASCIS) at Universiti Brunei Darussalam. He was formerly Deputy Vice Chancellor (Academic & Research) of University of Malaya, Malaysia Chair of Southeast Asian Islam at the Prince Talal al-Waleed Center for Muslim-Christian Understanding, Georgetown University, Washington DC, and Deputy Chief Executive Officer (CEO), International Institute of Advanced Islamic Studies, Malaysia (IAIS). An Emeritus Professor of Philosophy of Science at the Department of Science and Technology Studies, University of Malaya, he was also the founder of the university's Center for Civilizational Dialogue (1996). Dr Bakar is an author of 20 books and more than 300 articles on various aspects of Islamic thought and civilization, particularly Islamic science and philosophy and Islam in Southeast Asia. He was a member of the Council of 100 Leaders of the West-Islamic World Initiative for Dialogue founded by the World Economic Forum, Davos, Switzerland. He has been named several times among the 500 most influential Muslims in the world (including the latest 2016 edition). In 1994 he was made a Dato' by HH the Sultan of Pahang and in 2000 a Datuk by the Malaysian King. His two most well-known books, *Classification of Knowledge in Islam and Tawhid and Science*, have been translated into numerous languages. His latest books are *Islamic Civilization and the Modern World: Thematic Essays* (2014) and *Islamic Perspectives on Science and Technology* (co-editor, 2016).

Tap into the wisdom of experts to learn what every programmer should know, no matter what language you use. With the 97 short and extremely useful tips for programmers in this book, you'll expand your skills by adopting new approaches to old problems, learning appropriate best practices, and honing your craft through sound advice. With contributions from some of the most experienced and respected practitioners in the industry--including Michael Feathers, Pete Goodliffe, Diomidis Spinellis, Cay Horstmann, Verity Stob, and many more--this book contains practical knowledge and principles that you can apply to all kinds of projects. A few of the 97 things you should know: "Code in the Language of the Domain" by Dan North "Write Tests for People" by Gerard Meszaros "Convenience Is Not an -ility" by Gregor Hohpe "Know Your IDE" by Heinz Kabutz "A Message to the Future" by Linda Rising "The Boy Scout Rule" by Robert C. Martin (Uncle Bob) "Beware the Share" by Udi Dahan

[Blender 2.80: The Rise of Eevee](#) Oxford University Press

Discover the 3D-modeling and animation power of Blender 3D. This book starts with a brief introduction to Blender 3D including installation and the user interface. The following two chapters then introduce you to the upgraded tools in Blender 2.80 for 3D modeling, texturing, shading, and animation. The last chapter discusses the Blender game engine and all its core features. Along the way you'll see why Blender 3D has proved its competency in UV unwrapping, texturing, raster graphic editing, rigging, sculpting, animating, motion graphics, and video editing through the years. Modeling and Animation Using Blender gives a thorough tour of Blender Eevee, covering its new features and how to make best use of them. After reading this book you will have the confidence to choose Blender for your next project. What You Will Learn Master the features of Blender Eevee Work with modeling, animation, and much more using the updated software Understand important concepts such as physics and particles Who This Book Is For Art enthusiasts and professionals who want to learn Blender 3D. Blender 3D professionals who want to learn about the latest version would find the book useful.

[Advanced Do-It-Yourself Java Games: An Introduction to Java Threads and Animated Video Games](#) is the third book of the Do-It-Yourself Java Games series. The previous book in the series, [More Do-It-Yourself Java Games](#), taught event-driven programming. Those games started with an initial window, then waited for the program user to take an action. The games in this book require the same kind of event-driven user interfaces, but add threads to perform automated, simultaneous activity, whether the user takes an action or not. You'll learn more advanced programming techniques as you create 8 new games with sound and animation. You'll learn to use abstract classes, interfaces, state-driven programming, and the model/view/controller design. This book assumes you either have experience creating event-driven user interfaces with Java Swing or you have read the second book, [More Do-It-Yourself Java Games: An Introduction to Java Graphics and Event-Driven Programming](#). The Do-It-Yourself Java Games series of books uses a unique "discovery learning" approach to teach computer programming: learn Java programming techniques more by doing Java programming than by reading about them. Through extensive use of fill-in blanks, with easy one-click access to answers, you will be guided to write complete programs yourself, starting with the first lesson. You'll create puzzle and game programs and discover how, when, and why Java programs are written the way they are. [Daily Manna](#) Sterling Publishing Company Incorporated

[Do-It-Yourself Java Games](#) uses a unique "discovery learning" approach to teach computer programming: learn Java programming techniques more by doing Java programming than by reading about them. Through extensive use of fill-in blanks, with answers in the back of the book, you will be guided to write complete programs yourself, starting with the first lesson. You'll create puzzle and game programs like Choose An Adventure, Secret Code, Hangman, Crazy Eights, and many more,

[97 Things Every Programmer Should Know](#) Unbridled Books

[Do-It-Yourself Multiplayer Java Games: An Introduction to Java Sockets and Internet-Based Games](#) is the fourth book of the Do-It-Yourself Java Games series. The previous books introduced games you could play by yourself or against the computer. This book will teach you to use Java sockets and TCP/IP to create games to play with your friends within a home network or over the internet. You'll learn to create games for any number of players, games that will pair up any two players, and games that restrict who is allowed to play. This book will guide you to create seven complete games: a turn-based strategy game, a timed competition, a continuous motion game, a fast-paced action game, and more. This book assumes you already have strong Java programming skills. This book assumes you either have experience creating event-driven user interfaces with Java Swing or you have read the second book, [More Do-It-Yourself Java Games: An Introduction to Java Graphics and Event-Driven Programming](#). This book also assumes you either have experience with Java Threads and abstract classes or that you have read the third book, [Advanced Do-It-Yourself Java Games: An Introduction to Java Threads and Animated Video Games](#). The Do-It-Yourself Java Games series of books uses a unique "discovery learning" approach to teach computer programming: learn Java programming techniques more by doing Java programming than by reading about them.
